

RIGID BARRIER ADJACENT TO WALL

Notes:

For Coarse Aggregate Backfill, use Aggregate No. 5, No. 57, No. 67, or No. 6M.

Where the wall weep holes extend through the barrier, wrap 1/2" preformed joint filler around the pipe.

*For rigid barrier adjacent to the CSX bridge abutment and pier wall at the S-42-1009 (Dewberry Road) crossing only, the 6 inch offset and backfill may be eliminated provided a bondbreaking material is placed between the barrier and wall.
