Subject: RE: SCDOT Emergency Package 4 Kershaw Richland Williamsburg Utilities

Verizon Business (aka MCI) does not have any facilities near any of these four bridge locations. Please remove me from the distribution list for this package.

Thanks,

Micah Tyson

Good Afternoon-

For your information, SCDOT plans to select a design build contractor to perform repairs at the following four locations (Google placemarks are attached):

S-28-36 (Pine Grove Road) over Twenty-Five Mile Creek – Kershaw County - Project ID P029412
S-40-69 (Congress Road) over Jumping Run Creek – Richland County - Project ID P029342
S-40-827 (Rockbridge Road) over Spring Lake – Richland County - Project ID P029343
S-45-51 (Battery Park Road) over Black Mingo Creek – Williamsburg County - Project ID P029461

All four locations will be packaged in a single contract under Contract ID 8804670. We will begin our procurement on Friday, December 4, and we expect to execute a contract in mid-December. Once we execute the contract, we will provide our usual letter that assigns the utility coordinator for the designer/contractor. The contractor will have approximately six months to complete the work for all four bridges. We look forward to working with you on these projects. If you have any questions at all, please let me know. Thanks!

William “Tyke” Redfearn III, P.E.

Tyke, on S-51 in Williamsburg County Santee has power (contact listed below). FTC does not have facilities and I'm still trying to get in touch with Williamsburg County Water. Just an update.
