INSTRUCTIONAL BULLETIN NO. 2000-4

Subject: Removal & Disposal of Asphalt Pavement (Metric)

Effective Date: July 1, 2000

Supersedes: Instructional Bulletin 96-16

RE: Standard Specifications (Edition of 2000) and Plan Preparation Guide Chapter

When preparing metric plans, the above subject pay item will be measured and paid for by the square meter. This is a change to our present method of measurement. In order to maintain some uniformity in the method of measurement between English and metric pay items, this change is necessary. You may reference the description of work and Method of Measurement and Basis of Payment in Section 202 of the 2000 Standard Specifications. Although the 2000 Standard Specifications are in English, a soft conversion to metric will provide the guidance in order to calculate quantities.
