SECTION 501

**PORTLAND CEMENT CONCRETE PAVEMENT**

**501.2.1 Portland Cement, Fly Ash, and Water-Granulated Blast Furnace Slag**

This subsection is amended such that, in addition to the materials given as allowable, the use of qualified Portland cement Type IL (Portland-limestone cement) and qualified Portland cement Type I(SM) (slag modified Portland cement) is permitted. Specific restrictions regarding the substitution of fly ash or water-granulated blast furnace slag when using Type I(SM) cement given in **Subsection 701** are waived; Type IL and Type I(SM) cement may be replaced as given in **Subsection 701.4.9 Paragraphs C and D** in the same manner as for Type I, Type II, and Type III Portland cement.
