

**HOURLY RESTRICTIONS FOR LANE CLOSURES
On
MULTILANE PRIMARY and SECONDARY ROUTES**

The Department prohibits the installation of lane closures, flagging operations, road closures, shoulder closures, pacing operations or any operations that will impact the efficient flow of traffic or hinder normal traffic operations on the roads of the South Carolina state highway system during those times listed below, peak travel hours, holidays, holiday weekends, extended holiday periods, weekends, special events or any time traffic volumes are high.

Do not close travel lanes on high volume highways during peak traffic periods or any time traffic volumes exceed the numerical values determined to be acceptable by the Department. Do not close travel lanes or roads with high volume commuter traffic during peak traffic periods. The Department reserves the right to modify these restrictions as listed as conditions warrant and as directed by the Engineer.

In accordance with **Engineering Directive Number 32, Hourly Restrictions for Lane Closures on Interstate and Primary Routes**, all Department forces and all entities contracted by the Department will not install lane closures or interfere with or impact normal traffic operations on primary and secondary routes during those times of the day when traffic volumes in the travel lanes remaining open to traffic exceed 800 vehicles per hour per lane per direction.

In addition to the multilane primary and secondary routes included in this list, ALL multilane primary and secondary routes with traffic volumes that exceed 800 vehicles per hour per lane per direction are subject to hourly lane closure restrictions.

For questions regarding these restrictions, contact the District Traffic Engineer in that engineering district unless otherwise directed.
