

SCDOT OpenRoads Designer Workspace Installation Instructions

April 26, 2021

SCDOT is providing this workspace for testing and training purposes only. **This workspace release shall not be used for production work.**

This workspace includes items for Surveys, Roadway and Drainage. Each is still a work in progress and there remains much to be done.

The workspace should be used with OpenRoads Designer Connect Edition – 2020 Release 3 Version 10.9.0.91.

The zipped file is setup to extract the workspace files to this location:

C:\ProgramData\Bentley\OpenRoads Designer CE\Configuration

Under Organization-Civil there will be a new SCDOT folder and a SCDOT.cfg. Under Workspaces there will be a new SCDOT folder and SCDOT.cfg and likewise for the Worksets.

Once you launch the OpenRoads Designer product, you should be able to select the **SCDOT** Workspace and **SCDOT** Workset to begin your project testing.

Please contact Iris Neal @ nealif@scdot.org or Seth Lown @ lownsa@scdot.org for additional questions, bug reporting, or enhancement suggestions. Thank you for your time reviewing this workspace!
