

Table of Contents	
Preface	
Chapter 1 – Introduction	
Chapter 2 – Glossary	
Chapter 3 – Reserved	
Chapter 4 – Subsurface Investigation Guidelines	
Chapter 5 – Field and Laboratory Testing Procedures	
Chapter 6 – Materials Description, Classification, and Logging	
Chapter 7 – Geomechanics	
Chapter 8 – Geotechnical LRFD Design	
Chapter 9 – Geotechnical Resistance Factors	
Chapter 10 – Geotechnical Performance Limits	
Chapter 11 – South Carolina Geology and Seismicity	
Chapter 12 – Geotechnical Earthquake Engineering	
Chapter 13 – Geotechnical Seismic Hazards	
Chapter 14 – Geotechnical Seismic Design	
Chapter 15 – Shallow Foundations	
Chapter 16 – Deep Foundations	
Chapter 17 – Embankments	
Chapter 18 – Earth Retaining Structures	
Chapter 19 – Ground Improvement	
Chapter 20 – Geosynthetic Design	
Chapter 21 – Geotechnical Reports	
Chapter 22 – Plan Preparation	
Chapter 23 – Specifications and Special Provisions	
Chapter 24 – Construction QA/QC	
Chapter 25 – Reserved	
Chapter 26 – Geotechnical Software	

Index
Appendix A – Geotechnical Design Section Forms
Appendix B – Reserved
Appendix C – MSE Walls
Appendix D – Reinforced Soil Slopes
Appendix E – Geotechnical Template Plans
Appendix F – Geotechnical Specifications List
Appendix G – SCDOT Software List
Appendix H – Shear Wave Velocity Profiles
Appendix I – Shear Strength Ratio Triggering Method
Appendix J – Flow Charts
Appendix K – Performance Objective Development
