Project Name/Description

SCDOT proposes to re-construct the existing I-85/I-385 interchange to improve the operational efficiency of the interchange to accommodate existing and projected traffic volumes. The proposed improvements include new direct-connect ramps; a new collector-distributor (C-D) along I-385; elimination of the C-D along I-85 southbound; and will isolate/modify several merge points. These improvements will address the documented deficiencies associated with the existing facility.
