## INSTRUCTIONAL BULLETIN NO. 95-19

**SUBJECT:** Paving Under Gaurdrail

**EFFECTIVE DATE:** December 1, 1995

**SUPERSEDES:** Instructional Bulletin No. 95-17

**RE:** Special Drawing 403-2/Metric Standard Drawing 403-2

Paving under guardrail may be used only in median applications around bridge piers. Other applications, especially in the median, may be discussed on a project by project basis.

Some Districts may pave under guardrail with maintenance funding. A note on the typical section sheet will be necessary when a District provides for the paving under guardrail during construction of the project. In english unit projects, Special Drawing 403-2 "Paving Under Guardrail" should not be placed in the plans in this case.

The note should read:

"Hot Laid Asphalt Concrete Plant Mix Under Guardrail" to be completed by others prior to the erection of guardrail

A special provision should be included in the proposal to indicate that other forces may need to work on the project during the prosecution of the contract. Prime contractors will be required to coordinate their work with those providing for the paving under the guardrail.

E. S. Eargle

Road Design Engineer
