WATER QUALITY DESIGN MEMORANDUM NO. 2015-1

SUBJECT: Revised Erosion Control Data Sheets

EFFECTIVE DATE: November 6, 2015

SUPERSEDES: Instructional Bulletin 2011-4

RE: None

The existing Microsoft Excel-based data sheets for Erosion Control records have been revised. The primary goals of the new sheets are 1) to allow them to be printed directly to Adobe PDF format and included in the plan set without the need to transfer the sheets into MicroStation, and 2) to reduce manual calculations and repetitive data entry through Excel's tabular references and automatically-calculated formulas. Secondary goals include minor revisions and updates and the ability to apply digital seals to the final plans.

The new Excel file and a guide to completing and printing the sheets are available online. The files can be found at: http://www.scdot.org/doing/cadd_DesignFiles.aspx.
