MEMORANDUM TO GROUP LEADERS AND CONSULTANTS

SUBJECT: Payment of Spiral Reinforcing Steel in Columns and Drilled Shafts

Beginning with the June, 1997 Letting, the Bridge Design Office will detail all new bridge projects using the following method for measurement and payment of spiral reinforcing bars used in columns and drilled shafts. Projects which are completed or which are near completion need not be reworked.

The spiral reinforcing bars used in columns and drilled shafts shall be separated from the other project reinforcing steel quantities and shall be measured and paid for using the following bid item.

<u>Item No.</u>	<u>Pay Item</u>	<u>Pay Unit</u>
7031210	Spiral Reinf. Steel for Column (Bridge)	kg (Metric) lbs. (English)

This revision is the result of an AGC request to separate the more costly spiral reinforcing steel from the other project reinforcing steel.

Roque L. Kneece
Bridge Design Engineer
