

TYPICAL SECTIONS FOR BITUMINOUS SURFACING

SCALE: 1 IN. = 2 FT.

NOTE: Excavation of Intercepting Ditches should be done in advance of excavation of adjoining roadway cuts. Material excavated from these ditches shall be used in roadway embankments.

Note: Attention is called to the fact that all trees within the R.O.W. are not to be cleared and grubbed. Live oaks and other specimens that are not to be cleared & grubbed will be marked and listed.
