ATTACHMENT 3.3

Appendix/Attachment Title

Complex Inspector Summary Form (CISF)

Appendix/Attachment Revision and Year:

Version 1.0, 2026

Appendix/Attachment Introduction and Discussion

Per the BIGD, the inspection of bridges with complex features may have specific requirements for the BITL. BrM allows only a single BITL to be listed and initiate an inspection of bridges with complex features. In cases where the BrM BITL does not hold the required certifications or training, but another member of the team does, Section 2 of the CISF provides a means of preserving their qualifications in the bridge record. Once the CISF has been approved by the BMO or its designee, the BITL of record can be granted a temporary status which allows the complex inspection to be initiated in BrM.

The BIGD also contains alternative provisions allowing a BITL with less than 5 years to serve as a BITL on a bridge with complex features if certain experience requirements are documented, and with the approval of the BIPM. Section 3 of the CISF provides a means for the reporting BITL to collect and report their experience. Attachment 3.3 will be sent to the BMO Quality Engineer or their designee for approval prior to initiating the inspection.

Use the command button at the bottom of the page to send this form to the BMO for review.

Appendix/Attachment Description

If a BITL is requesting approval to initiate and inspect a bridge with complex features, the BITL shall complete the form and the BIPM/BMO, or their designees shall approve the request for each inspection event in BrM.

The BMO will review the CISF and temporarily provide qualifications as necessary in BrM to perform the subject inspection, if the form is acceptable
