APPENDIX C

Appendix/Attachment Title

Inspection Report Submittal Process

Appendix/Attachment Revision and Year:

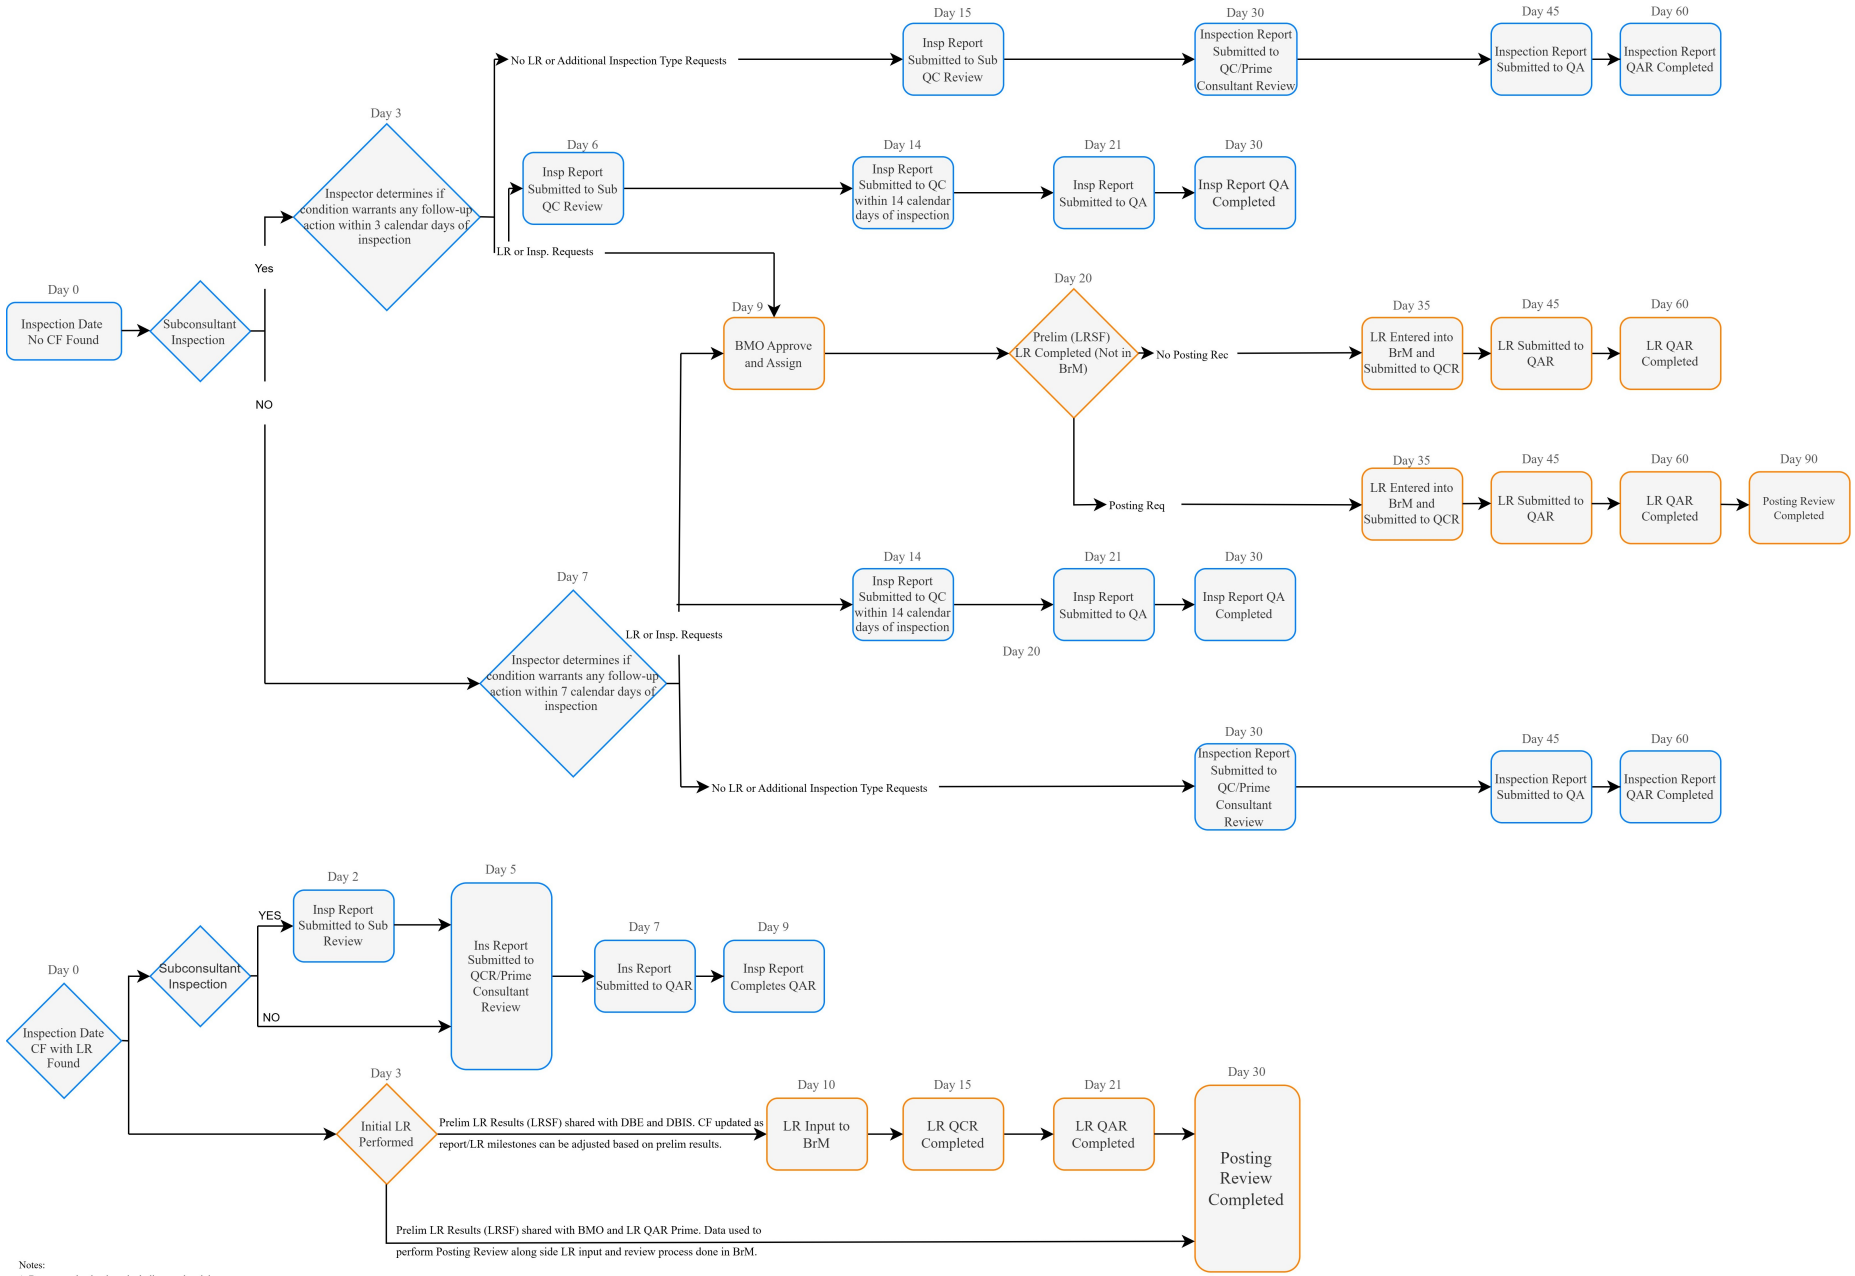

Version 1.0, 2026

Appendix/Attachment Introduction and Discussion

This flowchart includes SCDOT's requirements for the submittal of inspection reports and load ratings. This flowchart also includes the required review timelines.

Appendix/Attachment Description

The flowchart timeline is determined if there is a Critical Finding linked to a bridge inspection or if there is a follow-up action after the inspection. Follow-up actions include a load rating, a hydraulic analysis, or an in-depth inspection.

Notes:
1. Days are calendar days, including weekend days.
2. The BMO can request shorter timeframes. For example, when a follow-up action is needed or a Critical Finding is discovered on an NHS bridge.
3. The shortened inspection report submittal timeline shown in the flow chart depicts the timeline to complete a requested load rating, however, the shortened timeline shall be used if any follow-up action is required such as an underwater inspection request or an "A Flag" repair recommendation.
4. The dates are taken from the Inspection Completion Date (SNBI Item B.IE.03) which is "Day 0".
