ENVIRONMENTAL RE-EVALUATION FORM

FHWA South Carolina

State File #	Fed Project #	Project ID	Route	County
	P027662	P027662	I-20/I-26/I-126	Lexington and Richla

Project Name/Description

The FHWA and SCDOT propose to upgrade the I-20/26/126 corridor and reconstruct associated interchanges in Richland and Lexington Counties, South Carolina. The primary purpose of the proposed Carolina Crossroads project is to implement a transportation solution(s) that would improve mobility and enhance traffic operations by reducing existing traffic congestion within the I-20/26/126 corridor while accommodating future traffic needs.

1. DOCUMENT TYPE: ☒ EIS ☐ EA ☐ CE (non Programmatic) ☐ PCE (No FHWA Approval Required)

A. Other Actions Associated with the Project:

- ☐ Section 4(f) Evaluation
- ☒ Section 106 Compliance
- ☒ Wetland Finding/Section 404 Compliance
- ☒ T & E Species Biological Assessment
- ☐ None

2. DOCUMENT APPROVAL DATE: May 2, 2019

3. DATE(S) OF PRIOR RE-EVALUATIONS:

4. PROJECT DEVELOPMENT STAGE:

- ☐ Final Design
- ☒ ROW
- ☐ Construction
- ☐ Other, Specify

5. HAS DESIGN OR ROW CHANGED SINCE THE LAST APPROVAL?:
(if "NO" then Go To Item 7)

☒ YES ☐ NO

6. DESCRIPTION OF CURRENT PROJECT/DESIGN CHANGES:

See attached Supporting documentation.

7. HAVE THERE BEEN SIGNIFICANT CHANGES IN THE AFFECTED ENVIRONMENT OR HAVE THE ENVIRONMENTAL STUDIES BEEN UPDATED SINCE THE LAST PROJECT APPROVAL?: (If "NO" to both Items 5 and 7, Go To Item 10) ☒ YES ☐ NO

8. APPROVED DOCUMENT(S) RE-EVALUATION:

A. REVIEW OF EFFECTS: (Complete this section if "YES" to either Item 5 or Item 7)

SOCIAL ENVIRONMENT	CHANGE		REMARKS
1. Land Use	☐ YES	☒ NO	
2. Community	☐ YES	☒ NO	
3. Relocations	☐ YES	☒ NO	
4. Churches/Institutions	☐ YES	☒ NO	
5. Title VI/E.O. 12898	☐ YES	☒ NO	
6. Economic	☐ YES	☒ NO	
7. Controversy	☐ YES	☒ NO	
8. Other; Specify	☐ YES	☒ NO	

NATURAL ENVIRONMENT	CHANGE		REMARKS
1. Wetlands	☒ YES	☐ NO	See Support documentation attached
2. Water Quality	☐ YES	☒ NO	
3. Wild/Scenic Rivers	☐ YES	☒ NO	
4. Farmland	☐ YES	☒ NO	
5. T & E Species	☐ YES	☒ NO

CULTURAL ENVIRONMENT	CHANGE		REMARKS
1. Historic Sites	☐ YES	☒ NO	
2. Archaeological Resources	☒ YES	☐ NO	Saluda Canal - see Appendix B
7. Other; Specify	☐ YES	☒ NO	

PERMITS	CHANGE		REMARKS
1. U.S. Coast Guard	☐ YES	☒ NO	
2. Forest Service/USACE/USFWS Land	☐ YES	☒ NO	
3. Section 404	☐ YES	☒ NO	
4. Other; Specify	☐ YES	☒ NO	

Have the required permits been obtained? ☐ YES ☒ NO

If "YES" what is the expiration date?

***If permits have expired, permits will need updated and attached to re-evaluation.**

9. NEED FOR PUBLIC INVOLVMENT:

☒ A public hearing/public information meeting was held for the project on: August 23, 2018

☒ There have been no changes in project design or environmental effects which would require a public hearing [or additional public hearing if one has already been held] or public information meeting.

☐ The change(s) in project design and/or effects require(s) an additional public hearing/public information meeting. The meeting is scheduled for:

10. FINDINGS/CONCLUSIONS:

☒ Based on the analysis contained in this re-evaluation, it has been determined that the change in project design and/or environmental effects would not significantly alter the conclusions reached in the approved environmental document and/or previous re-evaluation(s).

☐ There have been no changes in the design/ROW of this project nor have there been changes in project effects or the affected environment. Therefore, the conclusions reached in the approved environmental document and/or previous re-evaluation(s) remain valid.

NEPA ENVIRONMENTAL COMMITMENTS FORM

Project ID : P027662 County : Richland/Lexingt District : District 1 Doc Type: RE-Eval Total # of Commitments: 30

Project Name: I-20, I-26, I-126 Carolina Crossroads Corridor Improvements

The Environmental Commitment **Contractor Responsible** measures listed below **are to be included in the contract and must be implemented**. It is the responsibility of the Program Manager to make sure the Environmental Commitment **SCDOT Responsible** measures are adhered to. If there are questions regarding the commitments listed please contact:

CONTACT NAME: Brian Klauk, PE **PHONE #:** (803)-737-5051

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment NEPA Doc Ref: Chapter 2, Section 2.2.2.2 Responsibility: SCDOT

Mass Transit

SCDOT will work with CMRTA and CMCOG to develop two park-and-ride lots to improve mobility during construction and mitigate congestion resulting from the project. SCDOT would construct the two sites and maintain them during construction of the project. Engineering feasibility, timing and continued maintenance of the sites would be determined in coordination with CMRTA and the CMCOG prior to the start of construction. In the event a permanent site cannot be developed, SCDOT would work with CMRTA and CMCOG to identify and provide funding for existing parking lots that could be leased for park-and-ride use during construction.

☐ Special Provision

Non-Standard Commitment NEPA Doc Ref: Chapter 2, Section 2.2.9 Responsibility: SCDOT

Mass Transit

SCDOT will implement a congestion management tool/commuter services application to improve mobility during construction and mitigate congestion by informing commuters of available options such as carpooling, ridesharing, vanpools and other transit oriented options.

☐ Special Provision

Non-Standard Commitment NEPA Doc Ref: Chapter 2 Responsibility: SCDOT

Mass Transit

SCDOT will assist COMET/CMRTA ongoing efforts through such measures as accommodating transit (bus) stops at interchange locations, which may include bus turnouts. In addition, SCDOT will work with CMRTA to monitor bus operations and capacity during construction and in the event that capacity is reached, SCDOT will provide support in determining funding for enhanced bus service during construction based upon a framework to be agreed upon with CMRTA.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 2, Section 2.2.2.2 | Responsibility: Contractor/SCDOT

Bicycle/Pedestrian

Prior to final design, SCDOT will coordinate with the City of Columbia and CMCOG to ensure that existing and planned bicycle and pedestrian facilities identified in the local and regional plans and existing and proposed connections to such facilities are accommodated where located within the limits of the Carolina Crossroads project at crossing routes and interchanges where feasible.

During construction, SCDOT will accommodate bicycle/pedestrian access. SCDOT will coordinate with the local municipalities and/or trail groups to post information on temporary sidewalk or bicycle facility closures or detours. Sidewalk and/or bicycle lane/path closures will be communicated to the agency with jurisdiction at least 48 hours in advance and appropriate signage will be placed.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.3 | Responsibility: SCDOT

Displacements

SCDOT will acquire all new right-of-way and process any relocations in compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S. C. 4601 et seq.) and the SCDOT ROW Manual. The purpose of these regulations is to ensure that owners of real property to be acquired for federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owner, to minimize litigation and relieve congestion in the courts, and to promote public confidence in federal and federally-assisted land acquisition programs.
Temporary construction easements may be needed for some properties. SCDOT will temporarily use these properties during construction and would provide compensation to the landowner for the temporary use. The property will be fully returned to the owner when the use of the property is no longer required, typically when construction is complete.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.3 | Responsibility: Contractor/SCDOT

Public Involvement

Changes in access for school bus routes will be discussed with the school system in advance of when they will actually take place, so that the school systems can adjust routes in a timely manner. Coordination with local school districts will also occur during construction. SCDOT and the contractor will coordinate with the school system during development of the community outreach program.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment	NEPA Doc Ref: Chapter 3, Section 3.3	Responsibility: Contractor/SCDOT

Public Involvement During Construction

Written translations of public involvement documents will be provided for Spanish language speaking populations, as well as other measures determined by SCDOT to ensure meaningful access to project information during construction. Efforts will be made to ensure meaningful opportunities for public participation during construction. Additional meetings will be held when warranted to address community concerns.

☐ Special Provision

Non-Standard Commitment	NEPA Doc Ref: Chapter 3, Section 3.13	Responsibility: Contractor/SCDOT

Public Involvement During Construction

The contractor(s), through a community outreach program, will let the community know what types of closures to expect (i.e. temporary, long-term), when to expect them and who to contact, if needed.

SCDOT and the contractor(s) will coordinate with emergency service providers such as police, fire protection and ambulance services before construction to ensure that access for emergency vehicles will be maintained.

☐ Special Provision

Non-Standard Commitment	NEPA Doc Ref: Chapter 3, Section 3.5	Responsibility: Contractor/SCDOT

Noise

Based on the studies thus far accomplished, SCDOT intends to install highway traffic noise abatement measures in the form of a barrier at Noise Sensitive Area (NSA) O and S. These barriers are located on the south side of I-20 from the Saluda River extending approximately 2,300 feet west (Barrier O), and on the south side of I-20 from the Broad River Road exit extending approximately 4,380 feet east towards the Broad River (Barrier S). These preliminary indications of likely abatement measures are based upon preliminary design for a barrier cost of $35.00 per square foot that will reduce the noise level by at least 5dB(A) for residences. If it subsequently develops during final design that these conditions have substantially changed, the abatement measures might not be provided. A final decision of the installation of the abatement measure(s) will be made upon completion of the project's design. Since there are residences located on the opposite side of the interstate adjacent to Barriers O and S, sound absorption materials will be added to the barriers to minimize noise reflectivity of the barriers towards receptors on the other side of the interstate.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.5 | Responsibility: SCDOT

Noise

In order to help local officials and developers consider highway traffic noise in the vicinity of a proposed Type I project, SCDOT will inform them of the predicted future noise levels and the required distance from the roadways needed to ensure that noise levels remain below the NAC for each type of land use per 23 CFR 772.17. The information will be provided within three months of the Record of Decision (ROD) publication. This commitment has been completed.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.5 | Responsibility: CONTRACTOR

Noise

During construction, powered construction equipment will not be operated during the traditional evening and/or sleeping hours within 150 feet of a noise sensitive site, to be decided either by local ordinances and/or agreement with SCDOT.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.6 | Responsibility: CONTRACTOR

Water Quality

The contractor(s) will be required to minimize possible water quality impacts through implementation of BMPs, reflecting policies contained in 23 CFR 650B and the Department's Supplemental Specification on Erosion Control Measures (latest edition) and Supplemental Technical Specifications on Seeding (latest edition). Other measures including seeding, silt fences, sediment basins, etc. as appropriate will be implemented during construction to minimize impacts to water quality.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.6 | Responsibility: CONTRACTOR

Water Quality

Stormwater modeling will be completed for the final design of the project. Stormwater runoff would be mitigated by discharging stormwater into appropriately designed BMP's before being released into receiving waters. During construction, the contractor(s) will identify and avoid all point sources of fecal coliform as identified in Chapter 3, Section 3.6.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.6 | Responsibility: CONTRACTOR

Permits

A Section 401 State Water Quality Certification will be required for the overall project. The contractor(s) is responsible for obtaining the certification as part of the Joint 404/401 permit application process.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.6 | Responsibility: CONTRACTOR

Permits

The contractor(s) is responsible for development of a project specific SWPPP and for obtaining a Section 402 NPDES permit for the project prior to initiating land disturbing activities.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.7 | Responsibility: CONTRACTOR

Permits

A State Navigable Waters permit will be required for construction over any navigable waterways (i.e., the Saluda River). The contractor will be responsible for obtaining this permit.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Sec 3.7/3.18 | Responsibility: SCDOT

Individual Permit-Permits

Impacts to jurisdictional waters will be permitted under a Department of the Army Section 404 permit from the U.S. Army Corps of Engineers (USACE). Based on preliminary design, it is anticipated that the proposed project will be permitted under an Individual Army Corps of Engineers Permit (IP). SCDOT will provide the USACE with information regarding any proposed activities during the Section 404 permitting process. One permit would be obtained for the overall project. The required mitigation for the this project will be determined through consultation with the USACE and other resource agencies.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.8 | Responsibility: CONTRACTOR

Floodplains

Detailed hydraulic and hydrologic studies for each bridge crossing will be performed to determine the correct sizing of bridges and culverts. The project will be designed to be consistent with local floodplain development plans. Prior to construction activity in the area, coordination with Dominion Energy and Federal Energy Regulatory Commission (FERC) will be required for the two Saluda River floodway crossings due to its function as part of a hydroelectric facility.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.8 | Responsibility: CONTRACTOR

Floodplains

The project will be designed in an effort to meet "No-Rise" requirements. In the event a "No-Rise" condition cannot be achieved, coordination with FEMA will require the preparation of a CLOMR (Conditional Letter of Map Revision) / LOMR (Letter of Map Revision) package for the encroachment. Where regulatory floodplains are defined, hydraulic structures will be designed to accommodate a 100-year (1% annual chance) flood. Where no regulatory floodplains are defined, culverts and bridges will be designed to accommodate a 50-year or greater magnitude flood event. Ongoing design efforts to minimize floodplain impacts will be coordinated with resource and regulatory agencies during the final design process.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.8 | Responsibility: CONTRACTOR

Floodplains

Prior to construction, the selected contractor(s) will send a set of final plans and request for floodplain management compliance to the local County Floodplain Administrator.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.8 | Responsibility: CONTRACTOR

Floodplains

No substantial impacts to floodplain values are anticipated from the proposed project. If conditions change based on final design, additional measures will be evaluated to restore lost floodplain values.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.9 | Responsibility: Contractor/SCDOT

Natural Resources

To mitigate for natural upland forested habitats, lost as a result of the project, SCDOT will plant trees (native species), as defined by the final design plans, within the rights-of-way adjacent to new or improved interchanges and roadways outside of required clear safety zones.

Impacts to areas providing significant wildlife habitat, such as river floodplains and other large riparian buffers, will be minimized to the extent practicable through avoidance and minimization design measures such as the use of appropriate BMP's.

Construction activities will be conducted within the disturbed footprint of the existing roadway and utility right-of-way to the maximum extent practicable.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.11 | Responsibility: CONTRACTOR

Section 4(f)

To mitigate the temporary impacts to the Saluda Riverwalk Extension, SCDOT will notify the City of Columbia Parks and Recreation Department at least 48 hours in advance as to when the trail with be temporarily closed. SCDOT will also work closely with the Parks and Recreation Department to communicate the closing to trail users during construction. When construction is complete, the condition of the trail will be equal to existing conditions.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.12 | Responsibility: CONTRACTOR

Hazardous Materials

Prior to construction, the project contractor will perform Phase II ESAs on the properties identified within the footprint, including the subject properties, and/or on the adjoining properties or the ROW. Ultimately, the Phase II ESAs will include environmental sample collection (e.g. soil, soil gas, and groundwater), specifically, in areas where a potential for disturbance of soil and/or groundwater exists. Asbestos Containing Material and/or Lead Based Paint testing will be assessed separately. Materials containing asbestos and lead-based paints will be managed and disposed of properly at an appropriate permitted facility to minimize impacts during the construction and cleanup. Activities will be monitored by a professional that is certified in the removal, handling and disposal of lead-based paint and/or asbestos-containing materials.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.12 | Responsibility: CONTRACTOR

Hazardous Materials

A spill prevention, control, and countermeasures (SPCC) plan will be prepared in accordance with 40 CFR 112, for the handling of oils or oil-based products during construction to prevent a discharge of oil into navigable waters.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.12 | Responsibility: CONTRACTOR

Hazardous Materials

A hazardous waste management plan will be prepared for the handling of hazardous materials during construction, and an on-site health and safety plan will be developed for construction activities to protect human health (i.e. workers, residents, recreation and trespassers) and the environment within proximate to the site.

The hazardous waste management plan will also state that disposal of waste materials will be disposed of in approved landfills.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.12 | Responsibility: CONTRACTOR

Hazardous Materials

If avoidance of hazardous materials is not a viable alternative and soils that appear to be contaminated are encountered during construction, the South Carolina Department of Health and Environmental Control (SCDHEC) will be informed immediately. Hazardous materials will be tested and removed and/or treated in accordance with the United States Environmental Protection Agency and the SCDHEC requirements, if necessary. SCDHEC Hazardous Waste Treatment, Storage, and Disposal compliance staff can be contacted at 803-898-0290.

☐ Special Provision

Project ID : P027662	SCDOT NEPA ENVIRONMENTAL COMMITMENTS FORM	SCDOT ENVIRONMENTAL SERVICES

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.13 | Responsibility: CONTRACTOR

Cultural Resources

During the construction phase of the project, the contractor and subcontractors must notify their workers to watch for the presence of any prehistoric or historic remains, including but not limited to arrowheads, pottery, ceramics, flakes, bones, graves, gravestones, or brick concentrations. If any such remains are encountered, the Resident Construction Engineer (RCE) and SCDOT's Construction Manager would be immediately notified and all work in the vicinity of the discovered materials and site work shall cease until the SCDOT Chief Archaeologist directs otherwise. SCDOT Chief Archaeologist, Tracy Martin, can be contacted at 803-737-6371.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.13 | Responsibility: SCDOT

Cultural Resources

An archaeological professional will be present during any ground disturbing activities related to Site 38LX212 and 38RD59. Additionally, sites 38RD140, 38RD1175, and 38RD1176 will be protected from indirect effects, including borrow sites and equipment staging. Sites will be clearly marked in the field using orange construction fencing prior to beginning construction activities in the vicinity of the resources.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.13 | Responsibility: CONTRACTOR

Cultural Resources - Part 1

The Saluda Canal (Site 38RD59) would be clearly plotted on all construction plans. SCDOT has reduced ROW widths in the vicinity of the canal to avoid impacts to the canal during construction & any future maintenance activities along the ROW. A 25-foot buffer will be maintained around the canal for the majority of the resource. This zone would be clearly marked in the field using orange fencing during construction, and all ground disturbance and construction staging activities would be conducted outside of this buffer in order to avoid all possible impacts to the resource. SCDOT proposes to revise the commitment of a 25-foot buffer for a distance of approximately 700 feet along the proposed ramp to allow room for temporary construction access & equipment near I-26 Ramp C. To protect the boundary of the canal at this location, the following will be added to the contract as commitments: CONTINUED IN PART 2 & 3

☐ Special Provision

Date: 07/21/2020

NEPA ENVIRONMENTAL COMMITMENTS FORM

Project ID : P027662 County : Richland/Lexingt District : District 1 Doc Type: RE-Eval Total # of Commitments: 8

Project Name: I-20, I-26, I-126 Carolina Crossroads Corridor Improvements

The Environmental Commitment **Contractor Responsible** measures listed below **are to be included in the contract and must be implemented**. It is the responsibility of the Program Manager to make sure the Environmental Commitment **SCDOT Responsible** measures are adhered to. If there are questions regarding the commitments listed please contact:

CONTACT NAME: Brian Klauk, PE **PHONE #:** (803)-737-5051

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment NEPA Doc Ref: Chapter 3, Section 3.13 Responsibility: CONTRACTOR

Cultural Resources - Part 2

a. Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage.
b. Prior to construction activities silt fencing will be installed along the edge of SCDOT right of way to prevent runoff.
c. For areas along the identified Saluda Canal located along the I-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the right of way but grubbing will be limited to within a distance of 5-feet inside of the right of way. Grubbing activities within the 5-foot buffer will require approval from SCDOT prior to occurring.
d. During land clearing activities prior to construction, an archaeologist will be present at all times to ensure that these activities undertaken close to the fencing do not damage the canal.

☐ Special Provision

Non-Standard Commitment NEPA Doc Ref: Chapter 3, Section 3.13 Responsibility: CONTRACTOR

Cultural Resources - Part 3

e. During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO.

f. As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCDOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.

☐ Special Provision

Non-Standard Commitment NEPA Doc Ref: Chapter 3, Section 3.13 Responsibility: CONTRACTOR

Air Quality

The contractor(s) will ensure that all construction equipment is properly tuned and maintained.

Idling time will be minimized to save fuel and reduce emissions.

Water will be applied to control dust as needed to prevent dust impacts off site. There will be no open burning of removed vegetation. Vegetation will be chipped or delivered to waste energy facilities.

☐ Special Provision

ENVIRONMENTAL COMMITMENTS FOR THE PROJECT

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.13 | Responsibility: CONTRACTOR

Migratory Bird Treaty Act

The federal Migratory Bird Treaty Act, 16 USC § 703-711, states that it is unlawful to pursue, hunt, take, capture or kill; attempt to take, capture or kill; possess,offer to or sell, barter, purchase, deliver or cause to be shipped, exported, imported, transported, carried or received any migratory bird, part, nest, egg or product, manufactured or not. SCDOT will comply with the Migratory Bird Treaty Act of 1918 in regard to the avoidance of taking of individual migratory birds and the destruction of their active nests. The Contractor will notify the Resident Construction Engineer (RCE) at least four (4) weeks prior to construction/demolition/ maintenance of bridges and box culverts. The RCE will coordinate with Environmental Services Office ComplianceDivision, to determine if there are any active birds using the structure. SCDOT will be responsible for the removal/management of any active bird nests.

☐ Special Provision

Non-Standard Commitment | NEPA Doc Ref: Chapter 3, Section 3.13 | Responsibility: CONTRACTOR

Borrow Pits

Potential borrow areas to be used for fill dirt for the project will be field reviewed and assessed for the presence of any jurisdictional features, and BMPs will be applied prior to disturbance to avoid and/or minimize erosion and runoff of sediments.

☐ Special Provision

Introduction 2

Proposed Design Changes 2

Right of way changes based on Design Refinements 8

Revision to FEIS Environmental Commitments 19

APPENDIX A: Noise Analysis Update Memo 20

APPENDIX B: SHPO Coordination 25

Introduction

FHWA approved a Final Environmental Impact Statement (FEIS) and Record of Decisions (ROD) for the Carolina Crossroads Project on May 2, 2019. Since that time the project has progressed towards construction that will occur in five (5) phases. The phases of construction are proposed to overlap or be performed consecutively with little or no time between phases and the overall construction time of all phases of work is anticipated to be less than 10 years. The 5 proposed phases are shown in Figure 1.

Proposed Design Changes

During detailed design and constructability reviews, the development of right of way plans, and right of way acquisition for construction of Phases 1 and 2 of the Carolina Crossroads Project, several design changes have been proposed to the Refined Recommended Preferred Alternative (RPA) described in the FEIS/ROD. These changes are described below.

As a result of these changes, SCDOT has re-evaluated the social, environmental and economic impacts documented in the FEIS/ROD.

I-26 Westbound Ramp onto I-126 Eastbound and Colonial Life Blvd.

The proposed ramp alignment at the above location proposed in the RPA created a physical overlap between the ramp bridge and the existing I-26 Mainline Bridge over the Saluda River. Since the project is now being constructed in phases through multiple construction contracts and this ramp is constructed as part of the first phase, this physical conflict between the bridges must be resolved to allow the existing bridge to remain in service during construction and in the interim period between construction phases. To resolve this conflict, the ramp has been shifted away from the mainline approximately 20 feet. This change is just to the ramp geometry and does not change the operational function of the proposed exit from I-26 Westbound. The change occurs within the right of way proposed for the Refined RPA. See Figure 2.

As a result of this design change, the traffic noise analysis was updated to account for the ramp shifting closer to the Rivers Edge neighborhood by approximately 22 feet. The noise analysis concluded that the overall number of impacted receivers in the area did not change. The noise barrier analysis still found that a noise barrier at this location was not reasonable. See the Noise Analysis Update memo in Appendix A.

No other studies documented in the FEIS/ROD required updating as a result of this design change. No change of impacts presented in the FEIS/ROD are anticipated at this location.

FIGURE
FIGURE 2

I-126 WB Exits to Colonial Life Blvd. and I-26 EB

The Refined RPA included a five-lane approach along I-126 Westbound to the Colonial Life Blvd. exit with the exit to Colonial Life Blvd. being a tapered exit and all five through lanes extending through the exit. Beyond the Colonial Life Blvd. exit, the outside lane would become an "Exit Only" lane for the exit to I-26 Eastbound. During the design development, it was discovered that undesirable roadway design exceptions for lane and/or shoulder width would be required to allow for the five through lanes beyond the tapered exit to Colonial Life Blvd. The design was subsequently modified to retain the existing approach to the Colonial Life Blvd. parallel exit with four through lanes and immediately following the exit to Colonial Life Blvd., a deceleration lane for the exit to I-26 Eastbound is developed. This change was incorporated into the project traffic models and it was determined that this change will not adversely impact the I-126 westbound mainline operations during both the morning and afternoon peak hours. The change occurs within the originally proposed footprint of the roadway and within the right of way proposed for the Refined RPA. See Figure 3.

No environmental studies were updated based on this design change. No change of impacts documented in the FEIS/ROD are anticipated at this location.

Saluda River Access Road relocation

SCDOT is currently in the process of purchasing right of way for the project. During the negotiation process with Dominion Energy for the purchase of right-of-way along I-126 near the I-126/I-26 interchange, adjacent to the Saluda River, Dominion Energy identified an existing access/service road along the Saluda River that they currently used for maintenance of transmission lines and access for both the Saluda Riverwalk and Saluda River boat ramp. Emergency services also use the access road for emergency response to the trail and the boat ramp, which provides access for river rescues. The current design would require the elimination of the existing access road. SCDOT will be required to re-establish this access road within the proposed right of way acquired for the Carolina Crossroads project. The relocated roadway is expected to be reconstructed along the right of way line, adjacent to I-126 and the interchange ramps. The road was designed to avoid impacts to the Saluda Canal, which is an historic resource. See Figure 4. The proposed relocation of the access would increase impacts for Wetlands 25 and 26 by a total of 0.24 acres of fill and 0.19 acres of clearing and Tributaries 45 and 46 by a total of 53 linear feet. However, the overall wetland and stream impacts included in the USACE Individual Permit (IP) are lower than the impacts documented in the FEIS/ROD, as noted in Table 1.

Table 1: Wetland and Stream Impact Comparison

		FEIS	Permit	Reduction
Wetlands	Fill (acres)	6.88	Fill: 2.76	2.35
			Clearing: 1.77	
	Ponds (acres)	0.01	0.0	0.1
Streams	Linear feet	16,251	8,136	3,282
			Morphologic change: 2,538	
			Stream relocation: 2,295

FIGURE 4

Right of way changes based on Design Refinements

The changes to right-of-way are based on design refinements during development of right of way plans including, but not limited to:

- minor changes to roadway design/alignments
- allowance for adequate drainage ditches along the roadway
- allowance for detention basins
- allowance for outfall and inlet improvements/protection at pipe crossings

These design refinements caused additional right of way requirements in construction Phases 1 and 2 for the Refined RPA. See Figures 5.1 – 5.7.

These areas of additional right of way were reviewed to determine if they were within the previously surveyed project study area (PSA) for the FEIS/ROD. In three (3) locations encompassing five (5) parcels, the additional right of way extended beyond the PSA, on Parcels 404, 187/316 and 269/270, as shown in the above-referenced figures. These locations were field reviewed for jurisdiction features (streams, wetlands) and cultural resources.

Initial Archaeological and Wetlands Survey: Parcels 269, 404, 187, 270, and 316

On July 7, 2020, investigators conducted archaeological and wetland surveys of Parcels 269 and 404. Due to ongoing right of way negotiations, shovel testing and delineation was not conducted at this time on Parcels 187, 270, and 316; these parcels were visually inspected during the current investigations. Once SCDOT acquires the properties and/or provides property owner notification, additional surveys will be completed based on recommendations below. The locations of Parcels 269, 270, 404, 187, and 316 are presented in Figures 5.1-5.7. The investigations are summarized below.

Parcel 269 is located in a paved and partially wooded area between two abandoned nightclubs adjacent to Longcreek Drive, approximately 630 feet northeast of the intersection of Longcreek Drive and US 176. The portion of the parcel that is outside of the original archaeological study area is approximately 0.2 acres. The area is largely paved and the only wooded area is a heavily disturbed strip between the two parking lots of the nightclubs. No shovel tests were excavated at Parcel 269 and no further survey is recommended at this location. No wetlands were observed within this parcel.

View of Parcel 269, facing northwest.

CAROLINA CROSSROADS

Parcel 270 is located in a wooded area behind an abandoned nightclub adjacent to Longcreek Drive, approximately 630 feet northeast of the intersection of Longcreek Drive and US 176. The portion of the parcel that is outside of the original archaeological study area is approximately 0.43 acres. The area is wooded and is generally very low and wet. It appears to be an area where people dispose of used tires and other debris. Due to ongoing right of way negotiations, no shovel tests were excavated at Parcel 270. Due to heavy ground disturbance and the preponderance of wetlands, it is recommended that no archaeological investigations are necessary on this portion of Parcel 270.

The area has numerous depressional areas and braided channels that appear to accept runoff from the hotel parking lot on Garner Drive as well as from a channel that emanates from underneath a concrete block wall. The area is highly disturbed with numerous manmade features such as a concrete block wall, and buried pipes. It is recommended that a delineation be performed after acquisition. As currently proposed, the design would not impact wetlands on this parcel; however, if the design-build contractor proposed an alternate design that did impact wetlands at this location, those impacts would be documented in a re-evaluation and USACE Individual Permit (IP) modification.

View of Parcel 270, facing south.

View of Parcel 270, facing west

View of Parcel 270, facing north

Parcel 404 is located in a wooded area behind a residence on Arrowwood Road, approximately 860 feet northwest of the intersection of Arrowwood Road and Colonial Life Boulevard. The portion of the parcel that is outside of the original archaeological study area is approximately 0.06 acres. The area is covered in dense undergrowth. Investigators excavated two shovel tests spaced 30 meters (100 feet) apart to cover the area. The two shovel tests generally exposed a 10YR4/2 dark grayish brown sandy loam from 0-20 cm below surface (bs), over a 10YR5/6 yellowish brown loamy sand from 20-50 cm bs, underlain by a compact 10YR7/6 yellow sand subsoil at 50-70+ cm bs. The fill from these tests was sifted through ¼-inch mesh hardware cloth. We recovered no cultural materials from the investigations at Parcel 404. No further archaeological survey is recommended at this location. No wetlands were observed within this parcel.

View of Parcel 404, facing northwest.

Parcels 187 and 316 are adjacent to each other and are located in a wooded area in a residential neighborhood, to the west of the intersection of Chippewa Drive and Chicopee Drive. The portion of the parcels that is outside of the original archaeological study area is approximately 0.3 acres. Due to ongoing ROW negotiations, no shovel tests were excavated at Parcels 187 and 316. It is recommended that archaeological investigations be conducted in the uplands portions of Parcels 187 and 316. The area is heavily wooded and includes a stream and associated wetlands in the central portion, with uplands to the east and west. This system appears to be part of Wetland 15. It is recommended that a delineation be performed after acquisition.

As currently proposed, the design would not impact wetlands on this parcel; however, if the design-build contractor proposed an alternate design that did impact wetlands at this location, those impacts would be documented in a re-evaluation and USACE Individual Permit (IP) modification.

View of Parcels 187 and 316, facing west.

View of Parcels 187 and 316, facing north.

Revision to FEIS Environmental Commitments

The proposed I-26 Westbound Ramp onto I-126 Eastbound and Colonial Life Blvd. is located between and immediately adjacent to both CSX railroad right of way and the Saluda Canal Historic District. The Environmental Commitment in the FEIS/ROD proposed a 25-foot buffer along the canal during construction activities.

During detailed design and constructability reviews and right of way acquisition for construction Phase 1 of the Carolina Crossroads Project, issues were identified in the vicinity of the Saluda Canal Historic District. The proposed ramp is at the northern end of the Saluda Canal and will not overlap the mapped limits of the canal. However, the currently proposed 25-foot buffer extends underneath the proposed I-26 Ramp C and presents constructability issues for equipment access during the construction of the project. Generally, the condition of the canal is very poor in this area adjacent to the proposed ramp due to erosion and siltation from two drainages in this area.

SCDOT has reduced right of way widths in the vicinity of the canal at this location to avoid impacts to the canal during construction and any future maintenance activities along the right of way.

SCDOT proposes to revise the commitment of a 25-foot buffer for a distance of approximately 700 feet along the proposed ramp to allow room for temporary construction access and equipment. The following mitigation will be implemented instead:

- Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage.
- Prior to construction activities silt fencing will be installed along the edge of SCDOT right of way to prevent runoff.
- For areas along the identified Saluda Canal located along the I-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the right of way but grubbing will be limited to within a distance of 5-feet inside of the right of way. Grubbing activities within the 5-foot buffer will require approval from SCDOT prior to occurring.
- During land clearing activities prior to construction, an archaeologist will be present at all times to ensure that these activities undertaken close to the fencing do not damage the canal.
- During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO.
- As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCDOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.

See SHPO coordination memo, figure, SHPO concurrence letter and tribal notification in Appendix B.

APPENDIX A
Noise Analysis Update Memo

Memo

Date: Monday, June 08, 2020

Project: Carolina Crossroads

To: Chad Long, SCDOT
David Kelly, SCDOT
Shane Belcher, FHWA

From: Ben Copenhaver

Subject: Noise Analysis Updates due to bridge shift

Introduction

Updates to the design of the Recommended Preferred Alternative (RPA) involved shifting a bridge approximately 22' closer to residences in NSA X. The design updates also involved shifts to connecting collector/distributor ramps, as well as refinements of grading in the area. The grading refinements include adding a vertical wall where the proposed roadway grade is either above or below the existing ground elevation.

Build-case and barrier noise models for the area were updated, rerun, and reanalyzed.

Updated Impact Results

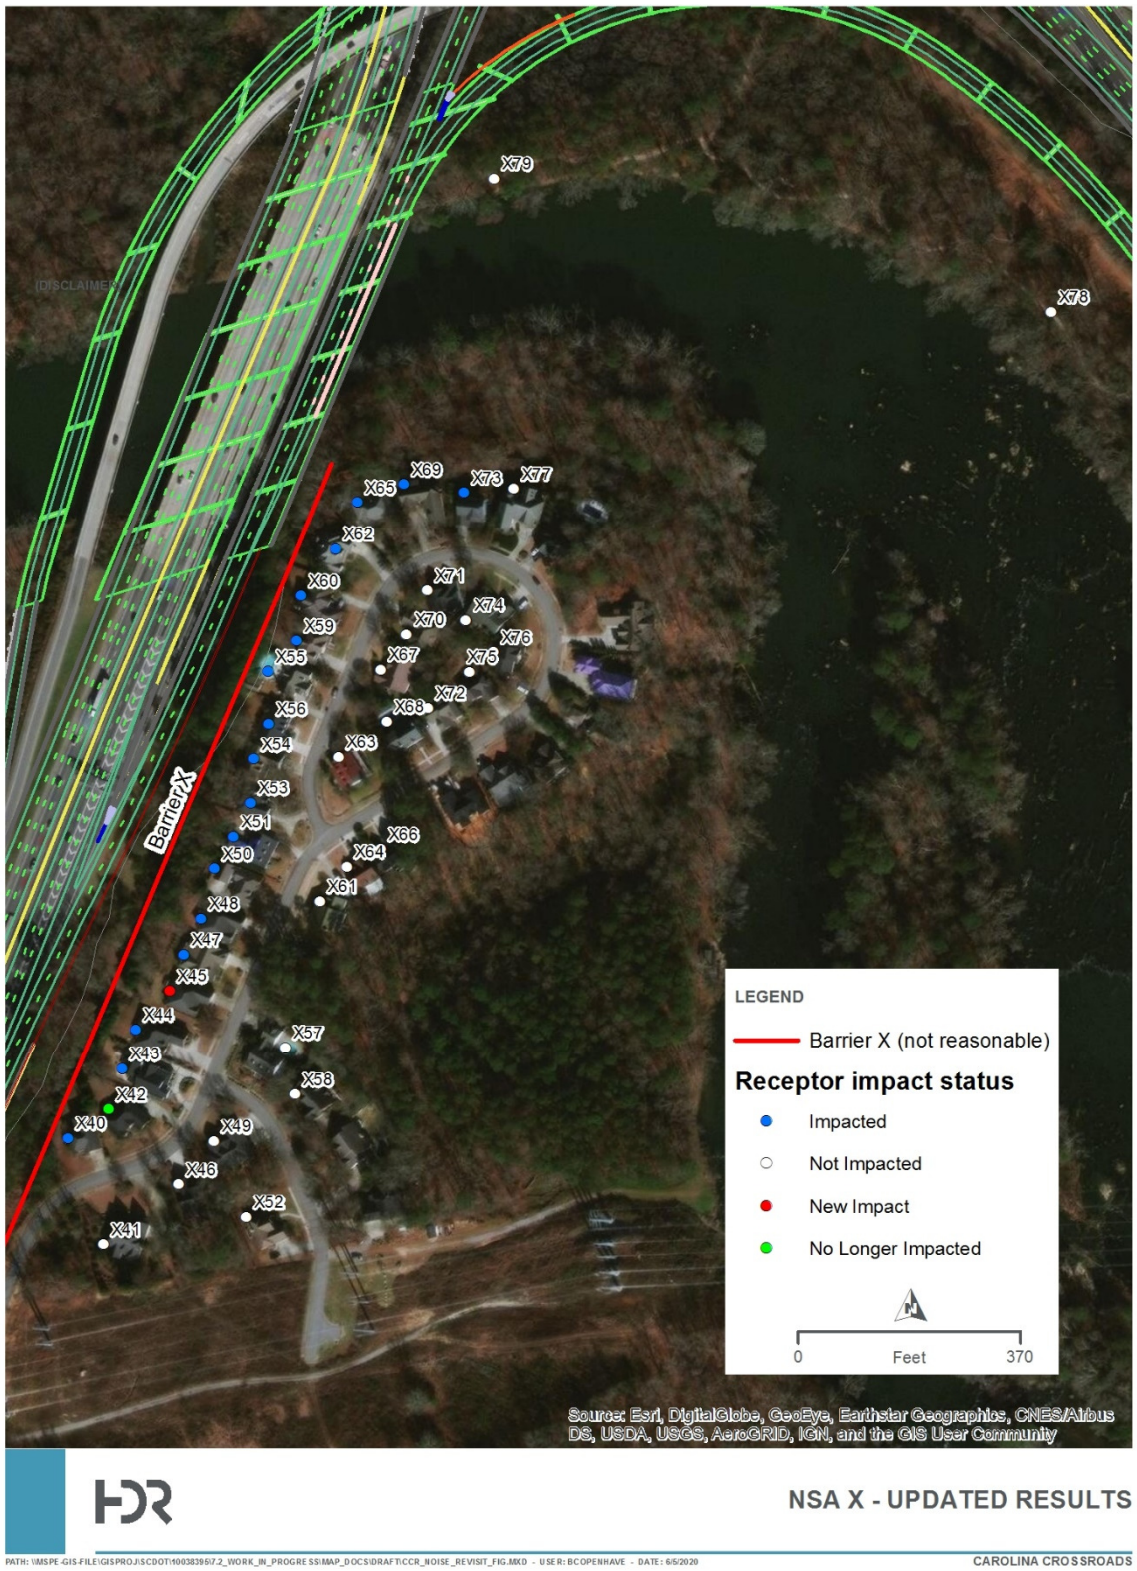
A comparison between build case results in the original and updated model is shown in the table below. Impacts are highlighted in red (levels in excess of the impact threshold of 66 dBA). Only receptors in the northern portion of NSA X (the area nearest the design updates) are included.

Receptor	Original Build Level (dBA)	Updated Build Level (dBA)	Change
X40	71.1	69.7	-1.4
X41	65.6	65.4	-0.2
X42	67.6	65.9	-1.7
X43	67.3	66.4	-0.9
X44	67.4	67.4	0
X45	65.8	66.6	0.8
X46	61.1	59.7	-1.4
X47	66.8	68.6	1.8
X48	67.5	69.3	1.8
X49	60.7	59.8	-0.9
X50	69.3	70.3	1.0
X51	69.6	70.1	0.5
X52	59.7	58.8	-0.9

Receptor	Original Build Level (dBA)	Updated Build Level (dBA)	Change
X53	69.2	69.7	0.5
X54	69.3	69.7	0.4
X55	73.6	74.1	0.5
X56	68.2	68.5	0.3
X57	60.0	59.4	-0.6
X58	60.6	59.5	-1.1
X59	69.2	69.6	0.4
X60	71.9	72.5	0.6
X61	60.0	60.1	0.1
X62	70.9	71.4	0.5
X63	60.9	60.7	-0.2
X64	59.9	59.9	0
X65	70.7	71.6	0.9
X66	59.4	59.3	-0.1
X67	62.2	62.3	0.1
X68	61.0	60.9	-0.1
X69	68.6	69.6	1.0
X70	62.8	62.8	0
X71	63.6	63.6	0
X72	58.6	58.5	-0.1
X73	66.5	66.9	0.4
X74	61.5	61.6	0.1
X75	60.5	60.5	0
X76	61.6	61.6	0
X77	65.0	65.3	0.3
X78	62.7	62.8	0.1
X79	63.7	63.7	0
X80	56.0	56.0	0

The largest increase in build noise levels was 1.8 dB, and the largest decrease was 1.7 dB. Two receptors changed impact status: X42 changed from impacted to non-impacted, and X45 changed from non-impacted to impacted. Therefore, the overall number of noise impacts in the project remains the same. The updated impact information is shown in Figure 1 below.

Figure 1. Updated Impacts in northern half of NSA X



Updated Barrier Analysis

Previously, the barrier investigated to shield impacted receptors in NSA X was found to be not reasonable, as it could not meet the SCDOT reasonableness criteria of providing at least 8 dB of noise reduction to at least 80% of benefited receptors. The barrier model was updated to account for the design changes in this area. Updated results of the barrier analysis are below.

Barrier X – Impacted Receivers X1, X8, X11-X12, X14, X17, X21, X23, X27-X28, X31-X32, X35, X39-X40, X43-X45, X47-X48, X50-X51, X53-X56, X59-X60, X62, X65, X69, X73[1]

Barrier X is a 5,697 foot long noise wall whose height is 25 feet.

Feasibility:

Acoustic Feasibility: SCDOT noise policy states that a noise reduction of at least 5 dBA must be achieved for 75 percent of the impacted receivers. This was achieved for 28 of the 33 impacted receivers (85%). This meets the SCDOT allowable percentage (75%) per impacted receiver. A total of 32 receivers (including impacted and non-impacted) achieved 5 dBA of noise reduction.

Engineering Feasibility: No known issues at this time.

Reasonableness:

Noise Reduction Design Goal: SCDOT noise policy states that a noise reduction of at least 8 dBA must be achieved for 80 percent of the benefited receivers in the first two building rows. Of the 32 benefited receivers in the first two rows, there were 16 that achieved the 8 dBA reduction (50%). This does not meet the SCDOT allowable percentage (80%) of the benefited receivers.

Cost Effectiveness: The cost effectiveness analysis is not applicable since the noise reduction design goal was not met.

Conclusion: Based on the above results of the detailed analysis, this abatement feature is feasible but not reasonable, and is not proposed as part of this project.

Conclusions

Due to design changes in the vicinity of NSA X, the noise analysis in that area was updated, including the build model and the barrier analysis. No change greater than 2 dB was observed. One receptor changed impact status from non-impacted to impacted, and one receptor changed impact status from impacted to non-impacted. The barrier status remains not reasonable.

[1] Receiver X1 represents a retirement home patio with 2 equivalent dwelling units.

MEMORANDUM

July 8, 2020

To: Elizabeth Johnson, SCDAH
Keely Lewis, SCDAH

From: Tracy Martin, SCDOT
Will McGoldrick, SCDOT
Josh Fletcher, HDR

Re: Carolina Crossroads Project: SAC 2015-01080
Justification for reduction of construction buffer at the northern end of the Saluda Canal
SCDOT PIN P027662

The South Carolina Department of Transportation (SCDOT) is currently in the process of purchasing right of way (ROW) parcels for the proposed Carolina Crossroads project. During a review of ROW and project design, it was identified that the proximity of the proposed ramp near the northern end of the Saluda Canal would create constructability issues for SCDOT's design/build contractor.

The proposed ramp is at the northern end of the Saluda Canal Historic District and will not overlap the mapped limits of the canal. While the ROW for the proposed ramp is approximately 60 feet wide (to the west of the proposed ramp), in areas where the proposed ramp is closer to the canal, the ROW has been reduced in order to not overlap the canal; at one location along eastern edge of the canal, the ROW is approximately 14 feet from the edge of the ramp.

In this northern end of the Saluda Canal, two drainages enter the canal from the east. These drainages are approximately 350 feet apart. Generally, the condition of the canal is very poor in the area between these two drainages. The banks of the canal are difficult to discern and were largely mapped using the georeferenced route from an historic map of the Saluda Canal, LiDAR imagery, and mid-20th century aerial photographs. In this area, the width of the canal ranges from approximately 40-50 feet with either no depth or only mild, uneven depressions of a couple of feet, whereas in more intact and deeply incised portions of the canal to the south of the southern drainage, the canal is a fairly uniform 30 feet wide with well-defined banks, with a depth of up to approximately six feet and three noted occurrences of intact stonework sections.

As noted in the cultural resources survey report, "No sign of the canal head or entrance from the Saluda River was discovered, nor was any trace of the dam described as being near the head of the canal found, and it is probable that these entities were the victim of floods and erosion, or, in the case of the dam, possible dismantlement." (Sipe et al. 2018: 54). In addition to periodic flooding of the Saluda River in this section of the canal that is closest to the river, it is believed that the two drainages that empty into the canal have caused a great deal of erosion and silting in of the canal. There is an approximately 45-foot long section of aligned stones on the western bank of the canal in the area between the two drainages. There are no intact features on the eastern bank of the canal in this area. An intact alignment of stones is present on the eastern bank of the canal just south of the southern drainage that cuts into the canal but this alignment will not be impacted by the proposed construction.

Prior to any construction activities, protective fencing will be installed along the edge of the previously proposed 25-foot buffer along the majority of the canal. It is requested that the buffer for the Saluda

Canal Historic District be reduced in the area between the two drainages, and for a length to the south of the southern drainage, to allow room for temporary construction access and equipment. In those areas, the protective fencing will be installed along the proposed ROW along the edge of the canal. During timbering/landclearing activities prior to construction, an archaeologist will be present to ensure that these activities undertaken close to the fencing do not damage the canal. During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO.

Columbia, SC 29223

RE: Carolina Crossroads Project: SAC 2015-01080 Justification for reduction of construction buffer at the northern end of the Saluda Canal, Lexington and Richland Counties, South Carolina.

Dear Ms. Johnson:

The South Carolina Department of Transportation (SCDOT) is currently in the process of purchasing right-of-way (ROW) parcels for the proposed Carolina Crossroads project. During a review of ROW and project design, it was identified that the proximity of the proposed I-26 Ramp C near the northern end of the Saluda Canal Historic District would create constructability issues for SCDOT's design/build contractor.

Proposed Ramp C is at the northern end of the Saluda Canal Historic District and will not overlap the mapped limits of the actual canal. However, the ROW will overlap the buffer created as the boundary for the Saluda Canal Historic District. The ROW for the proposed ramp is approximately 60 feet wide (to the west of the proposed ramp). In areas where the proposed ramp is closer to the canal, the ROW has been reduced in order to not overlap the canal. At one location along eastern edge of the canal, the ROW is approximately 14 feet from the edge of the ramp.

The northern end of the Saluda Canal has been impacted by two drainages that enter the canal from the east and are approximately 350 feet apart. In addition to periodic flooding of the Saluda River in this section of the canal that is closest to the river, it is also believed that the two drainages that empty into the canal have caused a great deal of erosion and silting in of the canal itself. This has left the banks of the canal in this area somewhat difficult to discern. This portion was largely mapped using the georeferenced route from an historic map of the Saluda Canal, LiDAR imagery, and mid-twentieth century aerial photographs. In this area, the width of the canal ranges from approximately 40- to 50-feet and features very little to no depth, whereas in more intact and deeply incised portions of the canal to the south of the southern drainage, the canal is a fairly uniform 30-feet wide with well-defined banks, with a depth of up to approximately 6-feet and three noted occurrences of intact stonework sections.

There is an approximately 45-foot long section of aligned stones on the western bank of the canal in the area between the two drainages. There are no intact features on the eastern bank of the canal in this area. An intact alignment of stones is present on the eastern bank of the canal just south of the southern drainage that cuts into the canal but this alignment will not be impacted by the proposed construction.

It is requested that the proposed ROW be allowed to cross over the buffer for the Saluda Canal Historic District for a distance of approximately 60-feet north of the northern drainage, the 350-feet between the northern and southern drainages, and approximately 260-feet south of the southern drainage.

In order to protect the boundary of the canal and the features associated with it, the following will be added to the contract as commitments:

a. Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage.

b. Prior to construction activities silt fencing will be installed along the edge of SCDOT ROW to prevent runoff.

c. For areas along the identified Saluda Canal located along the I-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the ROW but grubbing will be limited to within a distance of 5-feet inside of the ROW. Grubbing activities within the 5-foot buffer will require approval from SCDOT prior to occurring.

d. During land clearing activities prior to construction, an archaeologist will be present to ensure that these activities undertaken close to the fencing do not damage the canal.

e. During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO.

f. As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCDOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.

Based on the results of the background research and field investigations, SCDOT therefore recommends that the proposed project would have **no adverse effect** upon the Saluda Canal or the Saluda Canal Historic District.

Per the terms of the Section 106 Programmatic Agreement executed on October 6, 2017, the Department is providing this information on behalf of the Federal Highway Administration. It is requested that you review the enclosed material, and, if appropriate, indicate your concurrence in the Department's findings. Please respond within 30 days if you have any objections or if you have need of additional information.

Sincerely,

Tracy Martin
Chief Archaeologist

Subject: P027662 Carolina Crossroads Change Notification/update

All,

Per the original concurrence letters for the Carolina Crossroads I-20, I-26, and I-126 Corridor Improvements Project a stipulation was made for notification upon changes or updates to the project. Please see the attached letter for the proposed effects inside the Saluda Canal Historic District boundary. We've coordinated with SHPO on these revisions and received their concurrence. Please let me know if you have any questions.

Thanks,

Tracy Martin

Project Name/Description

FHWA and SCDOT propose to upgrade the I-20/26/126 corridor and reconstruct associated interchanges in Richland and Lexington Counties. The primary purpose of the proposed Carolina Crossroads project is to implement a transportation solution that would improve mobility and enhance traffic operations by reducing existing traffic congestion within the I-20/26/126 corridor while accommodating future traffic needs.

If "YES" what is the expiration date?

***If permits have expired, permits will need updated and attached to re-evaluation.**

9. NEED FOR PUBLIC INVOLVMENT:

☒ A public hearing/public information meeting was held for the project on: August 23, 2018

☒ There have been no changes in project design or environmental effects which would require a public hearing [or additional public hearing if one has already been held] or public information meeting.

☐ The change(s) in project design and/or effects require(s) an additional public hearing/public information meeting. The meeting is scheduled for:

10. FINDINGS/CONCLUSIONS:

☒ Based on the analysis contained in this re-evaluation, it has been determined that the change in project design and/or environmental effects would not significantly alter the conclusions reached in the approved environmental document and/or previous re-evaluation(s).

☐ There have been no changes in the design/ROW of this project nor have there been changes in project effects or the affected environment. Therefore, the conclusions reached in the approved environmental document and/or previous re-evaluation(s) remain valid.

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-01	SCDOT will work with the Central Midlands Rural Transit Authority / COMET (CMRTA/COMET) and the Central Midlands Council of Governments (CMCOG) to develop two park-and-ride lots to improve mobility during construction and mitigate congestion resulting from the project. SCDOT would construct the two sites and maintain them during construction of the project. Engineering feasibility, timing and continued maintenance of the sites would be determined in coordination with CMRTA and the CMCOG prior to the start of construction. In the event a permanent site cannot be developed, SCDOT would work with CMRTA and CMCOG to identify and provide funding for existing parking lots that could be leased for park-and-ride use during construction.	Programmatic	SCDOT has completed an evaluation to identify park and ride facilities. In coordination with FHWA a leasing option will move forward. SCDOT is in the process of obtaining leasing agreement information for the park and ride sites. One appraisal has been completed and discussions relative to process for negotiation is forthcoming.	N/A	N/A
EC-02	SCDOT will implement a congestion management tool/commuter services application to improve mobility during construction and mitigate congestion by informing commuters of available options such as carpooling, ridesharing, vanpools and other transit oriented options.	Programmatic	SCDOT has met with the CMCOG who is in the process of developing a mobile application. SCDOT to follow up and determine when the application will be available.	N/A	N/A
EC-03	SCDOT will assist COMET/CMRTA ongoing efforts through such measures as accommodating transit (bus) stops at interchange locations, which may include bus turnout. In addition, SCDOT will work with CMRTA to monitor bus operations and capacity during construction and in the event that capacity is reached, SCDOT will provide support in determining funding for enhanced bus service during construction based upon a framework to be agreed upon with CMRTA.	Programmatic	SCDOT has met with the CMCOG and discussions are ongoing.	N/A	N/A
EC-04	Prior to final design, SCDOT will coordinate with the City of Columbia and CMCOG to ensure that existing and planned bicycle and pedestrian facilities identified in the local and regional plans and existing and proposed connections to such facilities are accommodated where located within the limits of the Carolina Crossroads project at crossing routes and interchanges where feasible.	Design	Status update to be phase specific.	Phase 1 Final design plans are under review.	Phase 2 Final design plans are under review.
EC-05	During final construction, SCDOT will accommodate bicycle/pedestrian access. SCDOT will coordinate with the local municipalities and/ or trail groups to post information on temporary sidewalk or bicycle facility closures or detours. Sidewalk and/or bicycle lane/path closures will be communicated to the agency with jurisdiction at least 48 hours in advance and appropriate signage will be placed.	Construction	Status update to be phase specific.	Coordination occurred prior to the closing of the Saluda River greenway with the City of Columbia. The end portion of the trail has been temporarily closed.	SCDOT will comply.
EC-06	SCDOT will acquire all new right-of-way and process any relocations in compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. 4601 et seq.) and the SCDOT ROW Manual. The purpose of these regulations is to ensure that owners of real property to be acquired for federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owner, to minimize litigation and relieve congestion in the courts, and to promote public confidence in federal and federally-assisted land acquisition programs. Temporary construction easements may be needed for some properties. SCDOT will temporarily use these properties during construction and would provide compensation to the landowner for the temporary use. The property will be fully returned to the owner when the use of the property is no longer required, typically when construction is complete.	Programmatic	Phase 1 right-of-way acquisition is near completion and relocations are ongoing.	N/A	N/A

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-07	Changes in access for school bus routes will be discussed with the school system in advance of when they will actually take place, so that the school systems can adjust routes in a timely manner. Coordination with local school districts will also occur during construction. SCDOT and the CONTRACTOR will coordinate with the school system during development of the community outreach program.	Construction	Status update to be phase specific.	Contractor will coordinate with local school districts as necessary.	Contractor will coordinate with local school districts as necessary.
EC-08	Written translations of public involvement documents will be provided for Spanish language speaking populations, as well as other measures determined by SCDOT to ensure meaningful access to project information during construction. Efforts will be made to ensure meaningful opportunities for public participation during construction. Additional meetings will be held when warranted to address community concerns.	Construction	Status update to be phase specific.	SCDOT has implemented a translation tool on the project website for Spanish language speaking populations.	SCDOT has implemented a translation tool on the project website for Spanish language speaking populations.
EC-09	The CONTRACTOR(s), through a community outreach program, will let the community know what types of closures to expect (i.e. temporary, long-term), when to expect them and who to contact, if needed. SCDOT and the CONTRACTOR(s) will coordinate with emergency service providers such as police, fire protection and ambulance services before construction to ensure that access for emergency vehicles will be maintained.	Programmatic	Community and public relations support plan has been approved and is being implemented.	N/A	N/A
EC-10	Based on the studies thus far accomplished, SCDOT intends to install highway traffic noise abatement measures in the form of a barrier at Noise Sensitive Area (NSA) O, R and S. These barriers are located on the south side of I-20 from the Saluda River extending approximately 2,300 feet west (Barrier O); on the north side of I-20 from approximate station 224+90 to approximate 270+34.81 the Broad River Road to approximately 4,550 feet east towards the Broad River (Barrier R); and on the south side of I-20 from approximate station 223+85.23 to approximate station 267+64.89 the Broad River Road exit extending approximately 4,380 feet east towards the Broad River (Barrier S). These preliminary indications of likely abatement measures are based upon preliminary design for a barrier cost of $35.00 per square foot that will reduce the noise level by at least 5 dB(A) for residences. If it subsequently develops during final design that these conditions have substantially changed, the abatement measures might not be provided. A final decision of the installation of the abatement measure(s) will be made upon completion of the project's design. Since there are residences located on the opposite side of the interstate adjacent to Barriers O, R and S, sound absorption materials will be added to the barriers to minimize noise reflectivity of the barriers towards receptors on the other side of the interstate.	Design	Status update to be phase specific.	Barriers are not located within this phase.	Barriers R and S will be designed in this phase.
EC-11	In order to help local officials and developers consider highway traffic noise in the vicinity of a proposed Type I project, SCDOT will inform them of the predicted future noise levels and the required distance from the roadways needed to ensure that noise levels remain below the NAC for each type of land use per 23 CFR 772.J 7. The information will be provided within three months of the Record of Decision (ROD) publication.	Programmatic	SCDOT has complied.	N/A	N/A

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-12	During construction, powered construction equipment will not be operated during the traditional evening and/or sleeping hours within 150 feet of a noise-sensitive site, to be decided either by local ordinances and/or agreement with SCDOT.	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.
EC-13	The CONTRACTOR(s) will be required to minimize possible water quality impacts through implementation of BMPs, reflecting policies contained in 23 CFR 650B and SCDOT's Supplemental Specification on Erosion Control Measures (latest edition) and Supplemental Technical Specifications on Seeding (latest edition). Other measures including seeding, silt fences, sediment basins, etc. as appropriate will be implemented during construction to minimize impacts to water quality.	Construction	Status update to be phase specific.	Environmental compliance inspections are on-going. Phase 1 Final design plans are under review.	Contractor shall comply. Phase 2 Final design plans are under review.
EC-14	Stormwater modeling will be completed for the final design of the Project. Stormwater runoff would be mitigated by discharging stormwater into appropriately designed BMP's before being released into receiving waters. During construction, the CONTRACTOR(s) will identify and avoid all point sources of fecal coliform as identified in Chapter 3, Section 3.6 of the FEIS.	Construction	Status update to be phase specific.	Final design has been initiated and modeling efforts are ongoing.	Final design has been initiated and modeling efforts are ongoing.
EC-15	A Section 401 State Water Quality Certification will be required for the overall project. SCDOT is responsible for obtaining the certification as part of the Joint 404/401 permit application process.	Programmatic	Initial 401 water quality certification has been obtained.	N/A	N/A
EC-16	The CONTRACTOR(s) is responsible for development of a project specific SWPPP and for obtaining a Section 402 NPDES permit for the project prior to initiating land disturbing activities.	Construction	Status update to be phase specific.	Compliance inspection have been initiated and are ongoing.	Contractor shall comply.
EC-17	A State Navigable Waters permit will be required for construction over any navigable waterways (i.e., the Saluda River). The CONTRACTOR will be responsible for obtaining this permit.	Construction	Status update to be phase specific.	Permit has been obtained.	Permit has been obtained.
EC-18	Impacts to jurisdictional waters will be permitted under a Department of the Army Section 404 permit from the U.S. Army Corps of Engineers (USACE). Based on preliminary design, it is anticipated that the proposed project will be permitted under an Individual USACE Permit (IP). SCDOT will provide the USACE with information regarding any proposed activities during the Section 404 permitting process. One permit would be obtained for the overall project. The required mitigation for this project will be provided through a Permittee Responsible Mitigation (PRM) site, developed in consultation with the USACE and other resource agencies.	Construction	Status update to be phase specific.	Permit mod for Ph 1 under development. Construction activities for the PRM site has reach substantial completion. Some minor work remains in the contract.	Permit mod for Ph 2 under development. Construction activities for the PRM site has reach substantial completion. Some minor work remains in the contract.
EC-19	Detailed hydraulic and hydrologic studies for each bridge crossing will be performed to determine the correct sizing of bridges and culverts. The project will be designed to be consistent with local floodplain development plans. Prior to construction activity in the area, coordination with Dominion Energy and Federal Energy Regulatory Commission (FERC) will be required for the Lower Saluda River floodway crossings due to its function as part of a hydroelectric facility.	Design	Status update to be phase specific.	Phase 1 Final design plans are under review.	Phase 2 Final design plans are under review.
EC-20	The project will be designed in an effort to meet "No-Rise" requirements. In the event a "No-Rise" condition cannot be achieved, coordination with FEMA will require the preparation of a CLOMR (Conditional Letter of Map Revision) / LOMR (Letter of Map Revision) package for the encroachment. Where regulatory floodplains are defined, hydraulic structures will be designed to accommodate a 100-year (1% annual chance) flood. Where no regulatory floodplains are defined, culverts and bridges will be designed to accommodate a 50-year or greater magnitude flood event. Ongoing design efforts to minimize floodplain impacts will be coordinated with resource and regulatory agencies during the final design process.	Design	Status update to be phase specific.	Phase 1 Final design plans are under review.	Phase 2 Final design plans are under review.
EC-21	Prior to construction, the selected CONTRACTOR(s) will send a set of final plans and request for floodplain management compliance to the local County Floodplain Administrator.	Design	Status update to be phase specific.	Phase 1 Final design plans are under review.	Phase 2 Final design plans are under review.

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-22	No substantial impacts to floodplain values are anticipated from the proposed project. If conditions change based on final design, additional measures will be evaluated to restore lost floodplain values.	Design	Status update to be phase specific.	Phase 1 Final design plans are under review.	Phase 2 Final design plans are under review.
EC-23	To mitigate for natural upland forested habitats, lost as a result of the project, SCDOT will plant trees (native species), as defined by the final design plans, within the rights-of-way adjacent to new or improved interchanges and roadways outside of required clear safety zones. Impacts to areas providing significant wildlife habitat, such as river floodplains and other large riparian buffers, will be minimized to the extent practicable through avoidance and minimization design measures such as the use of appropriate BMP's. Construction activities will be conducted within the disturbed footprint of the existing roadway and utility right-of-way to the maximum extent practicable.	Programmatic	(blank)	N/A	N/A
EC-24	To mitigate the temporary impacts to the Saluda Riverwalk Extension, SCDOT will notify the City of Columbia Parks and Recreation Department at least 48 hours in advance as to when the trail will be temporarily closed. SCDOT will also work closely with the Parks and Recreation Department to communicate the closing to trail users during construction. When construction is complete, the condition of the trail will be equal to existing conditions.	Construction	Status update to be phase specific.	In May, cooridination occurred with the City of Columbia in which they accepted the electrical update to provide a permanent power source for lights on the upriver end of the Saluda Riverwalk.	N/A for Phase 2.
EC-25	Prior to construction, the project CONTRACTOR will perform Phase II ESAs on the properties identified within the footprint, including the subject properties, and/or on the adjoining properties or the ROW. Ultimately, the Phase II ESAs will include environmental sample collection (e.g. soil, soil gas, and groundwater), specifically, in areas where a potential for disturbance of soil and/or groundwater exists. Asbestos Containing Material (ACM) and/or Lead Based Paint (LBP) testing will be assessed separately. Materials containing asbestos and lead-based paints will be managed and disposed of properly at an appropriate permitted facility to minimize impacts during the construction and cleanup. Activities will be monitored by a professional that is certified in the removal, handling and disposal of lead-based paint and/or asbestos-containing materials.	Programmatic	SCDOT has completed some of the identified Phase II ESAs.	N/A	N/A
EC-26	A spill prevention, control, and countermeasures (SPCC) plan will be prepared in accordance with 40 CFR 112, for the handling of oils or oil-based products during construction to prevent a discharge of oil into navigable waters.	Design	Status update to be phase specific.	Contractor has submitted the SPCC and it will be monitored during construction.	Contractor has submitted the SPCC and it will be monitored during construction.
EC-27	A hazardous waste management plan will be prepared for the handling of hazardous materials during construction, and an on-site health and safety plan will be developed for construction activities to protect human health (i.e. workers, residents, recreation and trespassers) and the environment within/proximate to the site. The hazardous waste management plan will also state that disposal of waste materials will be disposed of in approved landfills.	Construction	Status update to be phase specific.	Contractor has submitted a project specific hazardous waste management plan which is currently in place.	Contractor has submitted a project specific hazardous waste management plan which is currently in place.

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-28	If avoidance of hazardous materials is not a viable alternative and soils that appear to be contaminated are encountered during construction, the South Carolina Department of Health and Environmental Control (SCDHEC) will be informed immediately. Hazardous materials will be tested and removed and/or treated in accordance with the United States Environmental Protection Agency and the SCDHEC requirements, if necessary. SCDHEC Hazardous Waste Treatment, Storage, and Disposal compliance staff can be contacted at 803-898-0290.	Construction	Status update to be phase specific.	Four buildings were previously demolished with asbestoes and the construction materials were properly disposed.	Should hazardous materials be encountered the will be properly disposed of according to the site specific hazardous waste management plan and this commitment.
EC-29	During the construction phase of the project, the CONTRACTOR and subCONTRACTORs must notify their workers to watch for the presence of any prehistoric or historic remains, including but not limited to arrowheads, pottery, ceramics, flakes, bones, graves, gravestones, or brick concentrations. If any such remains are encountered, the Construction Manager for Mega Projects would be immediately notified and all work in the vicinity of the discovered materials and site work shall cease until the SCDOT Chief Archaeologist directs otherwise. SCDOT Chief Archaeologist, Tracy Martin, can be contacted at 803-737-6371.	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly. Minor clearing has been conducted.	Contractor and subContractors shall comply.
EC-30	An archaeological professional will be present during any ground disturbing activities related to Site 38LX212 and 38RD59. Additionally, sites 38RD140, 38RD1175, and 38RD1176 will be protected from indirect effects, including borrow sites and equipment staging. Sites will be clearly marked in the field using orange construction fencing prior to beginning construction activities in the vicinity of the resources.	Construction	Status update to be phase specific.	Requested an archaeogolical professional for silt fence installation per plan near site 38RD59 (Saluda Canal)	N/A for Phase 2
EC-31	The Saluda Canal (Site 38RD59) would be clearly plotted on all construction plans. SCDOT has reduced ROW widths in the vicinity of the canal to avoid impacts to the canal during construction & any future maintenance activities along the ROW. A 25-foot buffer will be maintained around the canal for the majority of the resource. This zone would be clearly marked in the field using orange fencing during construction, and all ground disturbance and construction staging activities would be conducted outside of this buffer in order to avoid all possible impacts to the resource. SCDOT proposes to revise the commitment of a 25-foot buffer for a distance of approximately 700 feet along the proposed ramp to allow room for temporary construction access & equipment near I-26 Ramp C. To protect the boundary of the canal at this location, the following will be added to the contract as commitments: •Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage. •Prior to construction activities silt fencing will be installed along the edge of SCDOT right of way to prevent runoff. •For areas along the identified Saluda Canal located along the I-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the right of way but grubbing will be limited to within a distance of 5-feet inside of the right of way. Grubbing activities within the 5-foot buffer will require approval from SCDOT prior to occurring. •During land clearing activities prior to construction, an archaeologist will be present at all times to ensure that these activities undertaken close to the fencing do not damage the canal. •During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO. •As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCDOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.	Construction	Status update to be phase specific.	Canal plotted on plans and orange fencing has been installed.	N/A for Phase 2

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-32	The CONTRACTOR(s) will ensure that all construction equipment is properly tuned and maintained. Idling time will be minimized to save fuel and emissions.	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.
EC-33	Water will be applied to control dust as needed to prevent dust impacts off site. There will be no open burning of removed vegetation. Vegetation will be chipped or delivered to waste energy facilities.	Construction	Status update to be phase specific.	Dust producing activities are not ongoing.	Dust producing activities are not ongoing.
EC-34	The federal Migratory Bird Treaty Act, 16 USC § 703-711, states that it is unlawful to pursue, hunt, take, capture or kill; attempt to take, capture or kill; possess, offer to or sell, barter, purchase, deliver or cause to be shipped, exported, imported, transported, carried or received any migratory bird, part, nest, egg or product, manufactured or not. The South Carolina Department of Transportation (SCDOT) will comply with the Migratory Bird Treaty Act of 1918 in regard to the avoidance of taking of individual migratory birds and the destruction of their active nests. The CONTRACTOR will notify the Construction Manager for Mega Projects at least four (4)weeks prior to construction/demolition/maintenance of bridges and box culverts. The Construction Manager for Mega Projects will coordinate with SCDOT Environmental Services Office (ESO), Compliance Division, to determine if there are any active birds using the structure. SCDOT will be responsible for the removal/management of any active bird nests.	Construction	Status update to be phase specific.	Surveys conducted on Ramps C and D prior to maintenance/rehab activities. Meeting minutes will be provided for documentation.	No current or anticipated notification of construction/demolition/maintenanc e of bridges and box culverts.
EC-35	Potential borrow areas to be used for fill dirt for the project will be field reviewed and assessed for the presence of any jurisdictional features, and BMPs will be applied prior to disturbance to avoid and/or minimize erosion and runoff of sediments.	Construction	Status update to be phase specific.	Contractor shall comply.	Contractor shall comply.
EC-36	Construction operations will be scheduled for off-peak traffic hours when reasonable/feasible.	Construction	Status update to be phase specific.	Project specific traffic management plan has been submitted and is being monitored.	Project specific traffic management plan has been submitted.
EC-37	A traffic maintenance plan will be developed prior to construction initiation to minimize interference to traffic flow from construction equipment and activities.	Design	Status update to be phase specific.	Contractor has submitted a conceptual traffic maintenance plan for review.	Contractor has submitted a conceptual traffic maintenance plan for review.
EC-38	After SCDOT acquisition, wetland delineations will be performed on Parcels 270, 187 and 316; archaeological investigations will be conducted on Parcels 187 and 316.	Programmatic	SCDOT has complied.	N/A	N/A

APPENDIX B: Noise Analysis Addendum

Introduction

The Federal Highway Administration (FHWA) and South Carolina Department of Transportation (SCDOT) propose to implement various strategies that will improve the mobility and enhance traffic operations by reducing existing traffic congestion within the I 20/26/126 corridor in Richland and Lexington Counties, South Carolina. The proposed project, Carolina Crossroads (CCR), will ultimately increase capacity and improve operation along the corridor, including reconstructing/improving the following interchanges: the I-20 and I-26 system-to-system interchange, I-26 Exit 101 at Broad River Road, I-26 Exit 102 at Lake Murray Boulevard, I-26 Exit 103 at Harbison Boulevard, I-26 Exit 104 at Piney Grove Road, I-26 Exit 106 at St Andrews Road, I-26 Exit 108 at Bush River Road, the I-26/I-126 interchange, I-26 Exit 110 at US 378, I-126 at Colonial Life Boulevard, I-20 Exit 65 at Broad River Road, and I-20 Exit 63 at Bush River Road.

FHWA approved a final environmental impact statement (FEIS) and record of decision (ROD) for the project on May 2, 2019. The project has since progressed towards construction that will occur in five phases through the design-build process. Four reevaluations have been completed for the project since the FEIS/ROD: one for CCR Phase 1 design updates due to right-of-way changes (approved August 3, 2020), one for noise barrier wall updates (approved October 30, 2020), one for demolition updates (approved December 8, 2020), and one for changes to right-of-way and parcel acquisitions based on right-of-way negotiations for CCR Phases 2 and 3 and design revisions for CCR Phase 1 based on the design-build process (approved May 23, 2022). Project construction is anticipated to begin in fall 2022 with traffic control/maintenance activities and substantial project completion scheduled for March 2025.

Under CCR Phase 2, SCDOT proposes improvements to Interstate 20 (I-20) in Richland County, SC, including widening I-20, constructing new ramps and bridges, and replacing the I-20 at US 176 (Broad River Road) interchange with a new interchange design. The CCR Phase 2 project will extend from approximately 0.2 mile east of the Browning Road overpass to just west of the existing bridge over the Broad River.

SCDOT is administering the final design and construction of the project through a design-build contract. The design-build team has slightly modified various design elements of the previous Refined Recommended Preferred Alternative (RRPA), including an alternative design for the I-20 at US 176 (Broad River Road) interchange to provide the most efficient and economical solution to SCDOT (see **Figure 1** for design changes).

Proposed Design Changes

The CCR Phase 2 design-build team evaluated the previous RRPA for CCR Phase 2 to develop more efficient and economical solutions based on design and construction. This included a detailed evaluation of the I-20 at US 176 (Broad River Road) interchange (Exit 65). A single point urban interchange (SPUI) was proposed as the RRPA design to replace the existing tight diamond interchange. The CCR Phase 2 design-build team proposes an alternative design for the I-20 at US 176 (Broad River Road) interchange—an offset diverging diamond interchange (DDI) for I-20 at US 176. Following extensive analysis, the offset DDI was chosen as the preferred concept based on several factors, such as constructability, cost effectiveness, and traffic operations. The proposed design does not include addition or removal of ramp connections to I-20 and I-26, which are proposed as part of the RRPA (**Figure 1**).

The purpose of the project is to provide traffic access to and from I-20 and Broad River Road efficiently and safely by replacing the old over capacity interchange and adding additional capacity along I-20 within the study limits, while keeping in view the ultimate design of the I-20/I-26/I-126 interchange. CCR Phase 2 includes adding lanes to I-20 and replacing the existing I-20/US 176 (Broad River Road) tight diamond interchange (Exit 65) with an offset DDI. These improvements include constructing new parallel bridges along Broad River Road over I-20, all new entrance and exit ramps, and other improvements to surface streets and frontage roads. This design creates two new "crossover" intersections instead of a single point intersection. The crossover is where two of the four interchange ramps intersect at a single location.

In addition, CCR Phase 2 will include construction of an exit ramp from I-20 westbound (WB) to I-26 eastbound (EB) and WB. This ramp will connect to a collector-distributor (CD) road which will include traffic from Broad River Road. The CD Road, at its maximum, will have three WB lanes. Two will split off and connect to WB I-26 and one will connect to EB I-26 once the I-20/I-26/I-126 interchange is complete. In the interim, the new connection will tie into the existing I-26 WB ramps and not reach its full capacity until the ultimate interchange is complete. Traffic that is bound for I-26 EB will continue to use the existing loop ramp until the ultimate system-to-system interchange is complete. The project will also include the relocation of Garner Lane from the I-20 EB entrance ramp to connect with Longcreek Drive north of the Broad River Road/Longcreek Drive intersection.

The following design changes were also made as part of the new offset DDI:

1. The entrance ramp from northbound (NB) Broad River Road to I-20 WB has been modified. The change reduced the ramp from two lanes to one lane. The amount of traffic using the ramp in the peak hour only required one lane. It also allows the merging with the ramp from southbound (SB) Broad River to I-20 WB to occur more efficiently.
2. The two-lane portion of the EB I-20 on-ramp from Broad River Road has been extended to provide a total of 800 feet from the south crossover intersection to improve safety and operations.

3. The south leg of Broad River Road at Briargate Circle/Marley Drive has been widened to accommodate the bicycle lane in the SB direction. The NB left turn is channelized at this approach allowing the NB and SB left-turn lanes to align with each other. The channelization is provided using pavement markings to provide guidance to drivers without presenting an obstruction in the roadway.

Traffic

The offset DDI proposed at I-20 at US 176 (Broad River Road) would provide additional capacity and therefore, reduce the traffic delays when compared to the FEIS/ROD RRPA design (SPUI). Most notably, the delays (measured in seconds per vehicle) would improve in the year 2040 with the offset DDI design. The RRPA SPUI concept is made up of three intersections and the offset DDI concept is comprised of two intersections; therefore, delays at each interchange are compared/analyzed by combining the intersections for each concept. As noted in **Table 1**, the combined delay (seconds/vehicle) at the intersections improves from 61.9 in the a.m. and 66.3 in the p.m. under the RRPA concept to 28.5 in the a.m. and 24.1 in the p.m. under the final design concept. In addition, the level of service (LOS) for the combined signalized intersections is better or equal to the RRPA interchange concept. LOS is a measurement of traffic operations (defined in terms of a weighted average control delay for the signalized intersection), based on a range from LOS A (best/free-flowing conditions) to LOS F (worst/most congested conditions). The traffic operation/LOS at the signalized intersections as well as the freeway capacity, and ramp merge/diverge movements, and delays (in seconds) have been improved with the proposed alternative design while meeting the purpose and need of the project. The proposed offset DDI improves overall traffic operations and enhances the buildability of the interchange by providing an additional travelway for diversion of traffic when constructing the main overpass structure over I-20.

Table 1. RRPA design (SPUI) vs. final design (offset DDI) intersection capacity analysis (year 2040)

	RRPA design concept				Final design concept			
	a.m. peak		p.m. peak		a.m. peak		p.m. peak	
Intersection	**LOS[a]**	**Delay**	**LOS**	**Delay**	**LOS**	**Delay**	**LOS**	**Delay**

As a result of these design changes, the impacts to the human and natural environmental have been reevaluated for CCR Phase 2, as discussed below.

Environmental Effects Associated with the Final Project

Right-of-Way

The design revisions result in changes to the amount of right-of-way to be acquired beyond SCDOT right-of-way. Approximately 0.76 acre of additional right-of-way is needed for CCR Phase 2, compared to the previous RRPA design. Additional right-of-way will be acquired from 12 parcels, as shown in **Figure 2** (2.1-2.2). The additional right-of-way needed for CCR Phase 2 falls within the previously surveyed project study area (PSA) for the FEIS/ROD. Additionally, several areas of the PSA were expanded and evaluated to fully encompass the proposed footprint and incorporate additional right-of-way areas and parcels that have been incorporated into the project. The additional areas outside the existing PSA encompasses 24.6 acres and were evaluated for environmental resources.

Hazardous Materials

As a result of final design, and the additional right-of-way required, an additional limited Phase I environmental site assessment (ESA) was conducted in April 2022 along the new right-of-way areas to determine whether recognized environmental concerns (RECs) are present within or near the proposed corridor. All areas of additional new right-of-way are within the original FEIS/ROD PSA, which was previously screened for hazardous material sites. Based on the limited 2022 Phase I ESA, five tracts associated with new right-of-way were determined to have potential risks associated with hazardous substances. Three of the five areas were determined to contain the potential for moderate to high risk of environmental impact, one was determined to have a low to moderate risk of impact, and one was determined to have a low potential for environmental impact. The three areas of moderate to high risk were current or former gas stations. The low to moderate risk sites were abandoned monitoring wells likely associated with former gas stations, and the low-risk site was a former gas station. Two moderate to high risk sites (Tract 205—the Pon Di River Restaurant, and Tract 288—Affordable Dentures), both former service stations. The proposed project will result in minimal work on these sites; however, construction activities will be monitored and additional measures will be implemented as required. The location of these tracts can be found on **Figure 2** (2.1-2.2). A copy of the April 2022 Phase I ESA can be found in Appendix A.

Prior to the April 2022 limited Phase I ESA, a Phase I ESA was conducted in 2017, which identified several sites for Phase II ESA sampling. A Phase II ESA was conducted in April 2022 for four sites (Tracts 206, 207, 272, and 273) based on the 2017 Phase I ESA (enclosed in Appendix A). The results of the Phase II ESA identified two tracts (Tracts 272 and 273) along Broad River Road that had indications of contaminated soils that may warrant consideration during project construction activities depending on the depths of disturbance. For Tract 272 (vacant former Shephard's Texaco gas station), in areas where contamination may occur, it was recommended that a qualified environmental professional screen the soils for contamination and disposal. For Tract 273 (vacant former Racetrac gas station), no recommendations were made beyond standard practices. If soils are encountered which exhibit odor or other indications of contamination, work shall cease until the site is evaluated by an environmental professional (see environmental commitment number 25 from Chapter 3, Section 3.12).

Noise

An addendum to the noise analysis was conducted to evaluate and document the geometric alignment changes proposed by the design-build team (enclosed in Appendix B). Sound levels were evaluated for the noise receivers within four noise sensitive areas (NSAs)—Q, R, S, and T—as a result of the design revisions. An NSA is a group of receptors that are situated in a single geographic area and might be protected by a single noise barrier. The CCR project area was divided into NSAs to make the noise analysis process more organized. Four noise barriers were re-evaluated based on the revised design. Overall, there is an increase in the total number of impacts (impacted receivers) when compared to the May 2019 FEIS. The increase is likely due to changes to the traffic volumes, truck percentages, and roadway geometry in the alternative design. Overall, with the design revisions there is a reduction in the number of impacted receivers in NSA Q and an increase in impacted receivers in NSA S and NSA T with the alternative design when compared to the May 2019 FEIS and an increase in impacted receivers in NSA R when compared to the October 2020 noise addendum. A total of 41 more receivers would be impacted by noise from the alternative design. The feasibleness, reasonableness, and design of Noise Barriers Q, R, S, and T were re-evaluated as part of this addendum. This re-evaluation determined whether these four noise barriers would pass the feasible and reasonable criteria to construct each noise barrier. Based on the SCDOT Traffic Noise Abatement Policy (2019), Noise Barriers R and S meet SCDOT's noise policy and are feasible and reasonable to construct. Therefore, Noise Barriers R and S were recommended for construction; however, Noise Barriers Q and T were feasible but not reasonable to construct based on the design revisions and were not recommended for construction. A summary of the four noise walls evaluated is included in **Table 2,** including a comparison of the noise impacts (number of impacted receivers) for the FEIS, the October 2020 noise addendum, and the final design.

Table 2. Noise Barriers Q, R, S, and T

Barrier ID	Station range (along I-20)	Barrier length (feet)	Impacts in FEIS	Impacts in October 2020	Impacts for 2022 final design	Total difference	Feasible/ Reasonable?
Q	122+60–194+55	3,362	48	-	43	-5	Yes/No
R	216+73–258+67	4,200	78	77	84	+7	Yes/Yes
S	215+73–257+62	4,189	159	-	174	+15	Yes/Yes
T	161+95–198+06	3,660	20	-	24	+4	Yes/No

A parallel barrier analysis was also conducted. A parallel barrier analysis is recommended when noise barriers are proposed on opposing sides of the roadway where the ratio of the distance between the noise barriers and the height of the noise barrier panels is less than 10:1. Portions of Noise Barriers R and S meet this criterion; therefore, the analysis was conducted at ten receivers across the length of the proposed barriers. Sound levels for Noise Barrier R may increase due to the sound reflecting between the parallel

barriers; however, the increase is less than 3.0 dBA so no action is required for absorptive treatment for the noise barriers.

Waters of the U.S./Section 404 Permit Modification

The design modifications would result in a change in impacts to waters of the U.S. (WOUS), which have been permitted through a Department of Army, Corps of Engineers Permit pursuant to Section 404 of the Clean Water Act (SAC-2015-01080). This permit authorized a total of 12,969 linear feet of stream impacts and 4.42 acres of wetland impacts, which were mitigated through a permittee-responsible mitigation (PRM) plan.

The final design results in an expansion of the existing (approved permit) PSA to fully encompass the proposed footprint. The additional areas outside the existing PSA for the entire CCR project encompasses 24.6 acres. The additional PSA was evaluated for presence of wetlands or other WOUS. One wetland feature was identified within the additional PSA footprint in CCR Phase 2—new Wetland 50-1 totaling 0.15 acre. There are no proposed impacts to the newly identified Wetland 50-1. The additional PSA including new Wetland 50-1 is depicted in **Figure 3** and is documented in a permit modification for CCR Phases 1 and 2.

The total stream/tributary and wetland impacts associated with CCR Phase 2 are consistent with the approved permit, with an overall net reduction in impacts to WOUS as a result of final roadway and drainage design. Specifically, the proposed modifications will result in a net reduction of 0.40 acre of wetland impacts and 111 linear feet of stream impacts. The reduction in wetland impacts is primarily due to reduced impacts to Wetlands 50 and 18. For stream impacts, final drainage design will result in an increase in impacts to Tributary 36; however, impacts to Tributary 35 will decrease, resulting in a net reduction. Additionally, the approved permit contained a special condition (g) regarding Tributary 39, specifically that impacts to Tributary 39 cannot commence until USACE has provided written notice to proceed and written approval of a final compensatory mitigation plan for the stream relocation impacts to Tributary 39. The approved permit documented 170 linear feet of (pipe) impacts, and 2,295 linear feet of relocation impacts to Tributary 39. Due to final roadway and drainage design, the proposed pipe impacts to Tributary 39 have been eliminated and replaced with an open channel (relocation impacts). Therefore, the total impacts to Tributary 39 have been revised to 2,465 linear feet of relocation and no pipe impacts. The proposed activity will not result in a loss of function to Tributary 39 and no additional compensatory mitigation is proposed. These impacts are documented in the permit modification and accompanying Tributary 39 Mitigation Plan for SAC 2015-01080.

The proposed impacts have been mitigated through the previously approved PRM plan and no additional mitigation is required due to the reduction in impacts. The revised total WOUS impacts are 12,828 linear feet of streams and 4.02 acres of wetlands. A permit modification reflecting the final impact totals, including mitigation credits and the Tributary 39 mitigation plan, for individual permit SAC-2015-01080 was submitted to the U.S. Army Corps of Engineers in April 2022.

Public Involvement

Updates are provided regularly on the project website and social media pages (Facebook and Twitter), and with quarterly newsletters. A press release was issued on August 9, 2021, announcing the commencement of CCR Phase 2.

Environmental Commitments

SCDOT and FHWA previously identified various environmental commitments to avoid and minimize impacts to the surrounding human and natural environment (attached). These commitments are documented in the FEIS/ROD and the contract documents associated with the design-build procurement. No new commitments are proposed for these modifications. However, the following existing commitment (number 25 from Chapter 3, Section 3.12) must be followed for the newly identified tracts along Broad River Road that had indications of contaminated soils:

If avoidance of hazardous materials is not a viable alternative and soils that appear to be contaminated re encountered during construction, the South Carolina Department of Health and Environmental Control (SCDHEC) will be informed immediately. Hazardous materials will be tested and removed and/or treated in accordance with the United State Environmental Protection Agency and SCDHEC requirements, if necessary. SCDHEC Hazardous Waste Treatment, Storage, and Disposal compliance staff can be contacted at 803-898-0290.

Summary

The potential impacts associated with the continued negotiation and acquisition of right-of-way, as well as with the design changes to CCR Phase 2 have been evaluated to ensure consistency with the original decisions made in the FEIS/ROD. The RRPA for CCR Phase 2 has been modified to provide an alternate design for the I-20 at US 176 (Broad River Road) interchange (Exit 65). The proposed modified design was chosen as the preferred concept based on constructability, cost effectiveness, and traffic operations and includes all new entrance and exit ramps, and two new “crossover” intersections instead of a single point intersection. The proposed modified design will require a minor amount of additional right-of-way but will not result in any displacements. A limited Phase I was conducted of the new right-of-way areas, and two additional tracts were recommended for Phase II investigations. A Phase II was also conducted on previously identified sites, which recommended one of those tracts for further screening. Potential noise impacts associated with the proposed design was reevaluated for four noise barriers, with the no change from the determination in the FEIS/ROD. Two noise barriers (R and S) are still warranted, and two barriers (Q and T) are not proposed for construction. Finally, the proposed design will result in a net loss of impacts to wetlands and other WOUS, but will require modification of the Section 404, Department of Army Permit SAC-2015-01080. As such, the impacts associated with the proposed design of CCR Phase 2 are similar to the impacts of the RRPA, and consistent with the overall findings and decision documented in the FEIS/ROD.

Table 3. Summary of impact changes since FEIS/ROD

Environmental criteria	Impact change
Right-of-way	0.76 acre increase over 12 tracts
Hazardous materials	ROW from 5 potential RECs
Noise	21 additional noise impacts (net)
WOUS (wetlands)	Net reduction of 0.40 acre
WOUS (streams)	Net reduction of 111 linear feet

1.0 Summary

ARM Environmental Services, Inc. (ARM) has completed a Corridor / Phase I Environmental Site Assessment (ESA) of six potential new right of way areas along Broad River Road, near I-20, in Richland County, South Carolina. The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange. The study area locations have been designated by ARM as 1 through 6, going from northwest to southeast, as indicated on Figure 2 and Figure 3, included in Appendix 17.1. Due to the multi-property nature of this project, the scope of the assessment has been modified to be more general relative to the ASTM 1527-13 standard. The purpose of this assessment was to identify any Recognized Environmental Conditions (RECs) present on, or located in close proximity to, the study areas, so that these conditions can be considered during the roadway construction planning process.

Sites considered to represent current, historic, and/or controlled RECs were identified within the scope of this assessment. Based on the findings of this assessment and the available information, the following sites are considered to represent a **moderate to high potential** for adverse impact to one or more of the study areas:

- Proposed new ROW area #3 is located adjacent to the southwest of the Pon Di River restaurant, at 2344 Broad River Road. The Pon Di River restaurant property is the former location of a gas station and is further discussed in Section 5.1. Based on the available information, the property at 2344 Broad River Road is considered to represent a moderate to high potential for adverse impact to Proposed new ROW area #3.
- A Gulf Service station was formerly located at 2123 Broad River Road. This is the current location of an Affordable Dentures and Implants business, which is located adjacent to the south of Area #5. Abandoned monitoring wells were observed here in close proximity to the proposed new ROW area #5. This site is further discussed in Section 5.1 and is considered to represent a moderate to high potential for adverse impact to the proposed new ROW area #5.

Based on the findings of this assessment and the available information, the following sites are considered to represent a **low to moderate** potential for adverse impact to one or more of the study areas:

- Abandoned monitoring wells were observed at the motel property, at 1029 Briargate Circle, located adjacent to the southwest of potential new ROW area #4. These monitoring wells are further discussed in Section 5.1. No data was available for these wells. While these monitoring wells may be related to past assessment of the 2224 Broad River Road site, the presence of these wells in close proximity to the proposed new ROW Area #4 is considered to represent a low to moderate potential for adverse impact to the proposed new ROW Area #4.

Upon completion of preliminary engineering plans, it may be warranted to conduct FOIA file reviews and/or detailed investigations of those suspect sites potentially impacted by the roadway improvements, or any portion of the study area that has the potential to have been adversely impacted by any of the referenced environmental sites. The determination of areas that may warrant Phase II Assessment services should be site specific, based on hydrogeologic conditions, distance from specific environmental concerns, and other relative factors. Specific Phase II Assessment recommendations can be formulated upon review of preliminary engineering and right of way plans and may include soil / groundwater sampling and/or additional regulatory file review under the FOIA process.

2.0 Introduction

Pursuant to authorization from Infrastructure Consulting and Engineering (ICE), ARM has completed a Corridor / Phase I Environmental Site Assessment (ESA) of six potential new right of way areas along Broad River Road, near I-20, in Richland County, South Carolina. The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange.

Due to the multi-property nature of this project, the scope of the assessment has been modified to be more general relative to the ASTM 1527-13 standard. Specific processes that are typically not conducted as part of a Corridor / Phase I ESA include detailed reviews of chain of title data and interviews with all property owners.

2.1 Purpose

The purpose of this assessment was to identify any RECs or liabilities present within, or located in close proximity to, the study area. The term *recognized environmental conditions* means the presence, or likely presence, of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment (ASTM E 1527-13).

2.2 Detailed Scope of Services

This assessment was conducted in general accordance with ASTM Standard E 1527-13 for Phase I ESAs. Per this standard, the ESA is composed of four parts. They are (1) Records Review, (2) Site Reconnaissance, (3) Interviews, and (4) Report.

2.3 Significant Assumptions

The purpose of this study is to define and report RECs. This study does not address or relate to “de minimis” conditions that do not present a material threat to health or the environment and generally would not be the subject of an enforcement action by a governmental agency. It is assumed that the user of this ESA expects this study to constitute all appropriate inquiry in order to satisfy one of the requirements to qualify for one or more of the landowner liability protections (LLPs) to CERCLA liability.

This environmental assessment was accomplished based on customary practices and the type of property involved. The following are some issues or conditions which are outside the scope of work for a Phase I ESA as defined by ASTM E 1527: Asbestos Containing Materials, Radon, Lead-Based Paint, Lead in Drinking Water, Wetlands, Regulatory Compliance, Cultural and Historic Resources, Industrial Hygiene, Health and

Safety, Ecological Resources, Endangered Species, Flood Plains/Flood Ways, Indoor Air Quality, and High Voltage Power Lines.

The accuracy of this environmental assessment partially depends on information provided by others. ARM cannot be responsible for the accuracy of information provided by other entities or persons. However, we have no reason to suspect that any of the information provided is inaccurate. With regard to the interviews, it is assumed that those interviewed responded in good faith and honestly.

ARM assumes no liability for changes in the fair market value of the property as a result of the performance of the environmental assessment activities, or disclosures of environmental conditions relating to the property.

2.4 Limitations and Exceptions of Assessment

This study was accomplished using the ASTM E 1527-13 guidelines for all appropriate inquiry and the environmental professional's best judgment. The environmental site assessment cannot wholly eliminate uncertainty regarding the potential for environmental conditions to exist on the subject site or adjoining properties. Performance of the study under the referenced ASTM guidelines is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Study area. ASTM recognizes reasonable limits with regard to time and cost.

Due to the multi-property nature of this project, the scope of the assessment has been modified to be more general relative to the ASTM 1527-13 standard. Specific processes that are typically not conducted as part of a Corridor / Phase I ESA include detailed reviews of chain of title data and interviews with all property owners. Vapor intrusion was not considered as part of this assessment as it is understood that the project involves roadway construction and not evaluation, renovation, or the construction of buildings or other structures that would potentially collect vapors. However, any sites that have been identified as potential sources of soil and/or groundwater contamination to the study area, would also represent the potential to impact the study area through vapor encroachment. It is recommended that vapor issues be evaluated on a site specific basis, for any part of the roadway improvement project with potential or documented soil or groundwater contamination.

2.5 Special Terms and Conditions

This scope of work has been conducted for Infrastructure Consulting and Engineering (ICE), of Columbia, SC.

2.6 User Reliance

This scope of work has been conducted solely for the user(s) identified on the cover sheet of this report. ARM has no present or contemplated future interest in the inspected property. User reliance may be amended by letter to include other parties,

such as involved lenders, as deemed appropriate by ARM ***and*** pursuant to permission granted to ARM from the originally identified user.

3.0 Site Description

A general site description, site location, uses of adjacent properties, and general background information for the study area is summarized in the following sections. Photographic documentation of the study area is included in Appendix 17.3.

3.1 Location and Description

The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange. The study area locations have been designated by ARM as 1 through 6, going from northwest to southeast, as indicated on Figure 2 and Figure 3, included in Appendix 17.1.

3.2 Site and Vicinity General Characteristics

The study areas are described in Section 3.1 and 3.4. The general vicinity of the study areas consists primarily of commercial properties.

3.3 Current Use of the Property

The study areas are primarily grassed road frontage or paved parking areas of commercial properties.

3.4 Descriptions of Structures, Roads, and Improvements on Site

The study areas are primarily grassed road frontage or paved parking areas of commercial properties. Portions of the various commercial properties fall within the study area boundaries.

3.5 Current Uses of Adjoining Properties

Adjoining properties consist of primarily commercial development.

4.0 User Provided Information

4.1 Title Records

As this Phase I ESA has been modified to fit a corridor type project, the review of chain of title information for multiple properties was not conducted as part of this assessment.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

No information regarding environmental liens or AULs was provided. As this Phase I ESA has been modified to fit a corridor type project, the review of this type of information for multiple properties was not included in the scope of this assessment.

4.3 Specialized Knowledge

No specialized knowledge or other information relevant to environmental conditions in the study area was provided.

4.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information relevant to environmental conditions in the study area was provided.

4.5 Valuation Reduction for Environmental Issues

Property valuation information was not provided. The intent of this Phase I ESA is to act as a corridor study of potential new ROW areas.

4.6 Owner, Property Manager, and Occupant Information

As this Phase I ESA has been modified to fit a corridor type project, the collection and review of this type of information for these multiple properties of ownership data was not included in the scope of this assessment.

4.7 Reason for Performing Phase I

The Phase I ESA has been requested to document the environmental conditions in the study areas so that alternatives for roadway construction within the study areas can be considered.

4.8 Other

The User provided previous Phase I ESA reports, dated June 2017, for four nearby properties, prepared by F&ME Consultants. These reports are referenced in Section 13.0.

5.0 Records Review

5.1 Standard Environmental Record Sources

Federal and State regulatory databases were reviewed to further identify any known sources of contamination located within a one mile or one-half mile radius of the Study area. The Federal records searched during this assessment included sites which handle or dispose of hazardous wastes or hazardous materials, and sites which otherwise have been identified to have air, soil, or groundwater contamination. The State records reviewed included hazardous waste sites, landfills, and sites with registered or leaking underground storage tanks. The environmental record search information is provided by Environmental Data Resources, Inc. (EDR). The EDR database report is provided in Appendix 17.5.

The regulatory databases and target radius for each database are as follows:

Federal Databases

NPL	National Priorities List (1.0 mile radius, 0.5 if delisted)
CERCLIS	EPA Comprehensive Environmental Response, Cleanup and Liability Information System (0.5 mile radius)
CERCLIS NFRAP	CERCLIS No Further Remedial Action Planned (property and adjoining property)
RCRA CORRACTS	Resource Conservation and Recovery Act Facilities that have been notified by the EPA to undertake corrective action under RCRA (1.0 mile radius)
RCRA TSD	RCRA Non-CORRACTS Treatment/Storage/Disposal Facilities (0.5 mile radius)
RCRA Generators	RCRA generators of hazardous waste (property and adjoining property)
AULs	Activity and use limitations – legal or physical restrictions or limitations on use (property)
ERNS	Emergency Response Notification System (property)

State Databases

SHWS	
Equivalent NPL	(1.0 mile radius)
Equivalent CERCLIS	(0.5 mile radius)
SWF/LF	Landfill/Solid Waste (0.5 mile radius)
LUST	Leaking Underground Storage Tank sites (0.5 mile radius)

RUST	Registered Underground Storage Tank sites (property and adjoining property)
AULs	(property)
Voluntary Cleanup Sites	(0.5 mile radius)
Brownfield Sites	(0.5 mile radius)

Regulated Facilities

The following regulated sites were identified within the research distances from the study area as defined above. Details gathered during the investigative process, including site visits, for sites deemed to represent greater than a low potential for adverse impact to the study area are also provided following the list. Additional regulatory database descriptions are included in Section 17.5.

- Metts Oil Company
  2340 Broad River Road, located adjacent to the northeast of Area #3
  EDR Historical Auto Stations (Metts Oil Co., 1977-1979)

- Gulf Service Station
  2123 Broad River Road, located adjacent to Area #5
  LUST site, DHEC ID #07342; EDR Historical Auto Stations (Robertsons Gulf Service, 1970-1989)

- Racetrac 978
  2114 Broad River Road, located adjacent to Area #6 and approximately 170 feet east of Area #5
  LUST site, DHEC ID #07910

- Carolina Industrial, Inc.
  2428 Broad River Road, located approximately 80 feet northeast of Area #1 and 160 feet northwest of Area #2
  RCRA VSQG site, EPA ID #SCR000003491

- McQuiks Oil Lube
  2121 Broad River Road, located approximately 80 feet west of Area #6 and approximately 150 feet southeast of Area #5
  LUST site, DHEC ID #10130; EDR Historical Auto Stations (Mobil Oil Corp, 1973-1982)

- Shepperds Texaco
  2116 Broad River Road, located approximately 100 feet northeast of Area #5
  LUST site, DHEC ID #07605

- Texaco Service
  Broad River Road at I-20, located approximately 100 feet northeast of Area #5
  LUST site, DHEC ID #07628

- Exxon Location 4 5015
  2220 Broad River Road, located approximately 100 feet northeast of Area #4
  RCRA VSQG, EPA ID #SCD987578234

- R A S 45015
  2220 Broad River Road, located approximately 100 feet northeast of Area #4
  UST site, DHEC ID #11892

- Circle K 2703105
  2220 Broad River Road, located approximately 100 feet northeast of Area #4
  LUST site, DHEC ID #07648; EDR Historical Auto Stations (Shealy Miller Esso, Broad River Exxon, Garvin Oil Company, 1969-2014)

- Port Unit 288
  2224 Broad River Road, located approximately 100 feet northeast of Area #4
  LUST site, DHEC ID #07758; EDR Historical Auto Stations (Fox Shell Service Station, 1974-1976)

- Yokahama Tire
  2341 Broad River Road, located approximately 130 feet west of Area #4
  LUST site, DHEC ID #18544

- Columbia Fire Department St. Andrews
  1225 Briargate Circle, located approximately 275 feet southwest of Area #2
  LUST site, DHEC ID #07326

- Constan, Inc.
  2505 Broad River Road, located approximately 350 feet northwest of Area #1
  LUST site, DHEC ID #07925

- Circle K 2705138
  2624 Broad River Road, located approximately 550 feet northwest of Area #1
  LUST site, DHEC ID #11013

- Former USA Service Station
  Dutch Square Mall, located approximately 900 feet south of Area #6
  LUST site, DHEC ID #16612

- Pep Boys 134
  1804 Broad River Road, located approximately 1,015 feet southeast of Area #6
  LUST site, DHEC ID #18230

- Frasier Tire Service
  828 Dutch Square Blvd, located approximately 1,300 feet southwest of Area #6
  LUST site, DHEC ID #14101

- Palmetto Fine Cleaners
  1718 Broad River Road, located approximately 1,530 feet southeast of Area #4
  SHWS site, DHEC ID #SCDRY0053089, SC Drycleaners site, DHEC ID #53089

- Speedway 2842
  1714 Broad River Road, located approximately 1,600 feet southeast of Area #6
  LUST site, DHEC ID #18230

- Suburban Lodge
  1633 Broad River Road, located approximately 1,900 feet south-southeast of Area #6
  SHWS site, DHEC ID #SCS123457099

- Former Ed Robinson Laundry and Drycleaning
  Dutch Square Mall, located approximately 1,900 feet south-southeast of Area #6
  SHWS site, DHEC ID #SCDRY0056170

- Former Brite Cleaners
  422 Bush River Road, located approximately 2,900 feet south of Area #6
  SHWS site, DHEC ID #SCS123457021; Voluntary Cleanup Program site, DHEC File #57278

- Deluxe Cleaners
  3007 Broad River Road, located approximately 3,080 feet northwest of Area #1
  SHWS site, DHEC ID #SCDRY0056072; SC Drycleaners site, DHEC ID #56072

- Tripps Fine Cleaners
  1339 Broad River Road, located approximately 3,500 feet south-southeast of Area #6
  SHWS site, DHEC ID #SCDRY0051271; SC Drycleaners site, DHEC ID #51271

- Arnolds Professional Garment Care
  3104 Broad River Road, located approximately 3,750 feet northwest of Area #1
  SHWS site, DHEC ID #SCDRY0051118; SC Drycleaners site, DHEC ID #51118

The Metts Oil Company site, listed at 2340 Broad River Road in the EDR Historical Auto Stations database, appears to be a former service station. The current 2340 Broad River Road address is that of a large office building that is the former location of a Home Quarters (HQ) Warehouse home improvement store. However, historical aerial photographs do not clearly show a service station at the location of the former HQ store. Based on the 1971 aerial photograph, the current location of the Pon Di River restaurant, at 2344 Broad River Road, is the likely location for the former service station. ARM

obtained the most recent assessment report for the Speedway Super America site at 2224 Broad River Road, dated February 26, 2021 from DHEC. The report shows two separate plumes of contamination, one of which appears to originate from a presumed source area on the Pon Di River property (former Applebees). According to the report for 2224 Broad River Road, the former Applebees site is DHEC ID #18726. However, the online UST database does not pull this site up for this ID number. The report includes a plume map that shows the groundwater contamination at the former Applebees site, including free product, to be encroaching close to the proposed new ROW Area #3. Additionally, it is unknown if USTs at the former Applebees property were ever removed. A source area for the groundwater contamination, either remaining tanks or contaminated soil, is likely present here in close proximity to the proposed new ROW Area #3. Therefore, based on the available information, the former Metts Oil site (on the Pon Di River / former Applebees property) is considered to represent a moderate to high potential for adverse impact to the proposed new ROW Area #3.

The above referenced report for Speedway Super America also indicates the presence of three abandoned monitoring wells on the hotel property located adjacent to the southwest of proposed new ROW Area #4. No data was available for these wells. While these monitoring wells may be related to past assessment of the 2224 Broad River Road site, the presence of these wells in close proximity to the proposed new ROW Area #4 is considered to represent a low to moderate potential for adverse impact to the proposed new ROW Area #4.

The above referenced report for Speedway Super America also indicates that Performance Auto at 2341 Broad River Road, located approximately 50 feet northwest of proposed new ROW Area #4, also historically utilized USTs. However, monitoring wells located on or near 2341 Broad River Road, do not show current impact. Therefore, the property at 2341 Broad River Road is considered to represent a low potential for adverse impact to the proposed new ROW Area #4.

A Gulf Service station was formerly located at 2123 Broad River Road. This is the current location of an Affordable Dentures and Implants business, which is located adjacent to the south of Area #5. Stephanie Briney, Manager of the Corrective Action and Field Support Section of the DHEC UST Management Division, provided the latest Groundwater Monitoring Report, dated July 13, 2017, for the former Gulf Service Station #24132. The referenced report indicated the presence of petroleum based groundwater contamination in the vicinity of the proposed new right of way #5 near Broad River Road. Therefore, this former Gulf Service station is considered to represent a moderate to high potential for adverse impact to the study area.

The former McQuicks Oil Lube facility, at 2121 Broad River Road, is located adjacent to the southeast of the above referenced former Gulf Service station and approximately 80 feet west of Area #6 / 150 feet southeast of Area #5. Based on the 1978 city directory, the site is also the former location of a Mobil Oil gas station. Previous (June 2017) Phase I ESA assessment information prepared for the Carolina Cross Roads project by F&ME Consultants, included a Groundwater Monitoring Report, dated October 9, 2013,

for the former McQuicks Oil Lube facility. The report indicates groundwater to be flowing to the northwest and does not show petroleum based contamination to be encroaching toward either Area #5 or Area #6. Based on the available information, the former McQuicks Oil Lube facility is considered to represent a low potential for adverse impact to the study area.

Several other regulated sites were identified within the research distances of the study areas. Based on the available information and the locations of the other listed sites relative to the study areas, the other listed sites are considered to represent a low potential for adverse impact to the study areas.

5.2 Additional Environmental Record Sources

Additional environmental record sources (ASTM non-standard), as listed in the search of environmental databases provided by EDR, were reviewed as they were encountered in the EDR report and as considered appropriate.

5.3 Physical Setting Sources

ARM reviewed the following sources regarding the physical setting of the study area and surrounding area:

- USGS Topographic Map, 7.5 minute series – Columbia North, (SC) Quadrangle, dated 2020

According to the contour lines on the USGS topographic maps reviewed for this assessment, the study areas are located approximately 330 feet above mean sea level. Topography in the area is of moderate relief. The section of Broad River Road that is adjacent to the study areas is generally located along a topographic ridge, with topography on the northeast side of the road generally sloping away to the northeast and topography on the southwest side of the road generally sloping away to the southwest. Shallow groundwater flow direction is expected to generally mirror surface topography.

The study areas are located within the Piedmont Physiographic Province of South Carolina (Maybin and Nystrom, 1997). The site is located in the Mylonotic Rocks of the Modoc Fault Zone, with major lithological constituents being tectonite and mylonite (Horton and Dicken, 2001).

5.4 Historical Use Information on the Property

Aerial Photographs

Aerial photographs, dated 1938, 1943, 1951, 1955, 1964, 1966, 1971, 1983, 1989, 1994, 2006, 2009, 2013, and 2017 were obtained from EDR. General conditions in the aerial photographs appeared as follows and further details discerned from the aerial

photographs or other historical sources regarding localized areas or individual properties may be located throughout this report.:

The general vicinity of the study areas appears rural, agricultural, and lightly residential through the 1955 photograph. By 1964, the area is becoming slightly more developed, with a mix of residential properties and commercial properties. The 1964 photograph also shows the Broad River Road / I-20 interchange under construction. The 1971 photograph shows greater commercial development in the area, including several of the gasoline stations discussed in previous sections. By the 1983 photograph, the area along Broad River Road appears predominantly commercial.

Historical Topographic Maps

Historical topographic maps from the years 1904, 1947, 1948, 1972, 1983, 1990, 1997, 2014, 2017, and 2020 were provided by EDR.

The general vicinity of the study areas is shown to be predominantly rural and only lightly developed through the 1948 map. The 1972 map shows the area becoming more developed with a mix of residential and commercial properties. The Broad River Road / I-20 interchange is also depicted on the 1972 map. Successive maps appear to show more and more commercial development; however, significant industrial development is not apparent in the general area of this portion of Broad River Road.

Historical City Directories

City directories contained in the previous 2017 F&ME Phase I Assessments were reviewed. The directories included the address range of the currently proposed new ROW areas and included the years 1970, 1973, 1978, 1983, 1988, 1992, 1995, 1999, 2003, 2008, and 2013. The reviewed city directories were in substantial agreement with other historical sources reviewed. However, a listing for the Metts Oil Company site, listed at 2340 Broad River Road in the EDR Historical Auto Stations database, was not evident in the city directories.

Summary

The available historical information indicates that the vicinity of the study areas has transitioned from rural / agricultural / light residential to predominantly commercial beginning in the 1970s. Although commercial development and the development of several gas stations has occurred near the study areas, no significant industrial development was apparent in the review of available historical sources.

6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

ARM conducted the site walkover/ reconnaissance on April 13, 2022, in order to obtain any information regarding current conditions. Representative photographs of the study area were taken and are included in Appendix 17.3.

6.2 General Site Setting

The study area location is indicated on Figure 1 included in Appendix 17.1. Site plans showing the general study area layout are included as Figures 2 and 3 in Appendix 17.2. Sections 3.1, 3.2 and 3.4 of this report detail the general setting of the study areas. The adjoining properties have been described in Section 3.5 of this report. The pertinent information collected during the site inspection is summarized in the following sections. The study areas are primarily grassed road frontage or paved parking areas of commercial properties.

6.3 Observations

The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange. The study area locations have been designated by ARM as 1 through 6, going from northwest to southeast, as indicated on Figure 2 and Figure 3, included in Appendix 17.1. The general vicinity of the study areas consists primarily of commercial properties. Details regarding sites identified in the regulatory review process are provided in Section 5.0.

Based on the site reconnaissance and available information, there is a low potential for adverse impact to proposed new ROW area #1

Proposed new ROW #2 is adjacent to the southeast of a former car wash (2416 Broad River Road) and a tire shop (2420 Broad River Road). There was no evidence in the historical review or site observations that would indicate these properties were gas station related. Therefore, these properties are considered to represent a low potential for adverse impact to proposed new ROW #2.

Proposed new ROW area #3 is located adjacent to the southwest of the Pon Di River restaurant, at 2344 Broad River Road. The Pon Di River restaurant property is the former location of a gas station and is further discussed in Section 5.1. Based on the available information, the property at 2344 Broad River Road is considered to represent a moderate to high potential for adverse impact to Proposed new ROW area #3.

Abandoned monitoring wells were observed at the motel property, at 1029 Briargate Circle, located adjacent to the southwest of potential new ROW area #4. These monitoring wells are further discussed in Section 5.1. No data was available for these wells. While these monitoring wells may be related to past assessment of the 2224 Broad River Road site, the presence of these wells in close proximity to the proposed new ROW Area #4 is considered to represent a low to moderate potential for adverse impact to the proposed new ROW Area #4.

A Gulf Service station was formerly located at 2123 Broad River Road. This is the current location of an Affordable Dentures and Implants business, which is located adjacent to the south of Area #5. Abandoned monitoring wells were observed here in close proximity to the proposed new ROW area #5. This site is further discussed in Section 5.1 and is considered to represent a moderate to high potential for adverse impact to the proposed new ROW area #5.

Proposed new ROW area #6 is located adjacent to the Kentucky Fried Chicken, at 2104 Broad River Road, along the road. Although the former Racetrac gas station is located adjacent to the northwest, based on the available assessment information for the Racetrac site, the nearby Racetrac site is considered to represent a low potential for adverse impact to proposed new ROW area #6. No other sites with a greater than low potential to adversely impact proposed new ROW area #6 were identified.

7.0 Interviews

Interviews were conducted as part of the Phase I ESA investigative process and are summarized below. Additional information related to the interviews may be contained in other sections of this report, as appropriate, and interview documentation is provided in Section 17.6. Due to the multi-property nature of this assessment the Phase I ESA has been modified to be more general in scope and to provide an overall assessment of a large area. Therefore, interviews with individual property owners / managers were not generally conducted, as it would have been prohibitively time consuming to locate ownership / manager information for these multiple parcels.

7.1 Interviews with Local Government Officials

Debra Thoma and Stephanie Briney of the DHEC UST Management Division provided recent assessment reports for several of the UST sites in the area. ARM also conducted file reviews for several sites through the DHEC freedom of information process. Pertinent information obtained is summarized in Section 5.1.

7.2 Interviews with Others

No other interviews were conducted.

8.0 Findings

The following summary of findings is provided:

- The study areas consist of six potential new right of way areas along Broad River Road, near I-20, in Richland County, South Carolina. The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange. The study areas are primarily grassed road frontage or paved parking areas of commercial properties. Portions of the various commercial properties fall within the study area boundaries. The study area locations have been designated by ARM as 1 through 6, going from northwest to southeast, as indicated on Figure 2 and Figure 3, included in Appendix 17.1.

- Several environmentally regulated facilities have been identified within or near the study area. These sites have been further described in Section 5.1. Based on the available information and locations of the sites, each site has been categorized as a Low (de minimis), Low to Moderate, or Moderate to High potential for adverse impact to the study area. Those sites with greater than a Low potential for adverse impact are considered to be RECs with respect to the study area. A summarized list of these sites considered to be RECs is included in the conclusions below.

- Sites of potential concern that were not identified on available database information were also noted during the investigative process. These sites have also been categorized by potential for adverse impact to the study area. A summarized list of these sites considered to be RECs is included in the conclusions below.

9.0 Opinion

Based on the site inspection, historical research, regulatory data review and interviews, it is the opinion of the environmental professional that RECs exist with respect to one or more of the study areas.

10.0 Conclusions

We have performed a Corridor / Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-13 of six potential new right of way areas along Broad River Road, near I-20, in Richland County, South Carolina. The study areas include six small areas of potential new right of way on the northeast and southwest sides of Broad River Road. Four of the areas are northwest of the I-20 / Broad River Road interchange and two are southeast of the I-20 / Broad River Road interchange. The study areas are primarily grassed road frontage or paved parking areas of commercial properties. Portions of the various commercial properties fall within the

study area boundaries. Any exceptions to, or deletions from, this practice are described in Sections 2.4 and 11.0. This assessment has revealed no evidence of RECs in connection with the study areas, except for the following:

Based on the findings of this assessment and the available information, the following sites are considered to represent a **moderate to high** potential for adverse impact to one or more of the study areas:

- Proposed new ROW area #3 is located adjacent to the southwest of the Pon Di River restaurant, at 2344 Broad River Road. The Pon Di River restaurant property is the former location of a gas station and is further discussed in Section 5.1. Based on the available information, the property at 2344 Broad River Road is considered to represent a moderate to high potential for adverse impact to Proposed new ROW area #3.
- A Gulf Service station was formerly located at 2123 Broad River Road. This is the current location of an Affordable Dentures and Implants business, which is located adjacent to the south of Area #5. Abandoned monitoring wells were observed here in close proximity to the proposed new ROW area #5. This site is further discussed in Section 5.1 and is considered to represent a moderate to high potential for adverse impact to the proposed new ROW area #5.

Based on the findings of this assessment and the available information, the following sites are considered to represent a **low to moderate** potential for adverse impact to one or more of the study areas:

- Abandoned monitoring wells were observed at the motel property, at 1029 Briargate Circle, located adjacent to the southwest of potential new ROW area #4. These monitoring wells are further discussed in Section 5.1. No data was available for these wells. While these monitoring wells may be related to past assessment of the 2224 Broad River Road site, the presence of these wells in close proximity to the proposed new ROW Area #4 is considered to represent a low to moderate potential for adverse impact to the proposed new ROW Area #4.

Upon completion of preliminary engineering plans, it may be warranted to conduct FOIA file reviews and/or detailed investigations of those suspect sites potentially impacted by the roadway improvements, or any portion of the study area that has the potential to have been adversely impacted by any of the referenced environmental sites. The determination of areas that may warrant Phase II Assessment services should be site specific, based on hydrogeologic conditions, distance from specific environmental concerns, and other relative factors. Specific Phase II Assessment recommendations can be formulated upon review of preliminary engineering and right of way plans and may include soil / groundwater sampling and/or additional regulatory file review under the FOIA process.

11.0 Deviations

This Phase I ESA was conducted in general accordance with ASTM Standard E 1527-13 for Phase I Environmental Site Assessments. However, due to the multi-property nature of this assessment the Phase I ESA has been modified to be more general in scope and to provide an overall assessment of a large area.

12.0 Additional Services

An Asbestos and Lead Based Paint Survey of the US 1 Bridge over the SCL RR No. 3 was also conducted. The results of the survey are provided under separate cover.

15.0 Qualifications of Environmental Professional(s)

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on the education, training, and experience to assess a property of the nature, history, and setting of the Study area. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Resumes summarizing the qualifications of the Environmental Professionals that conducted this assessment are included in Appendix 17.8.

16.0 Warranty

Services provided by ARM in this environmental assessment have been conducted in accordance with generally accepted environmental practices. This report has been generated solely for the use of the client. The information presented in this report is based only upon our site observations at the time of the site reconnaissance and data generated during our site reconnaissance. We cannot be responsible for the accuracy of information provided by others; however, we have no reason to suspect that any of the information provided is inaccurate. We accept no responsibility of damages or claims resulting from past or future environmental impact to the site caused by on or off-site activities or contamination, nor do we accept responsibility for subsequent remediation. This study is intended to be a non-biased assessment of on-site environmental conditions. No other warranties, either expressed or implied, are made.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ARM Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

SHWS: State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

A review of the SHWS list, as provided by EDR, and dated 09/10/2021 has revealed that there are 10 SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health & Environmental Control's Leaking UST list.

A review of the LUST list, as provided by EDR, and dated 06/11/2021 has revealed that there are 14

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Health & Environmental Control's list: Comprehensive Underground Storage Tanks.

A review of the UST list, as provided by EDR, and dated 02/28/2021 has revealed that there are 17 UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

RCR: The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

A review of the RCR list, as provided by EDR, and dated 09/09/2021 has revealed that there are 8 RCR sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Solid Waste Permit #: 07648

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

SHERWIN WILLIAMS CO (Continued) **1000370858**

Environmental Interest/Information System:
SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021
Date Data Arrived at EDR: 11/05/2021
Date Made Active in Reports: 11/29/2021
Number of Days to Update: 24

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021
Date Data Arrived at EDR: 11/05/2021
Date Made Active in Reports: 11/29/2021

Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/20/2021

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

RCR: Registry of Conditional Remedies

The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

ALLSITES: Site Assessment & Remediation Public Record Database

The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021
Date Data Arrived at EDR: 11/12/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

CAROLINA CROSS ROADS
BROAD RIVER RD
COLUMBIA, SC 29210

TARGET PROPERTY COORDINATES

Latitude (North):	34.040273 - 34ˆ 2’ 24.98’’
Longitude (West):	81.094887 - 81ˆ 5’ 41.59’’
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	491241.3
UTM Y (Meters):	3766430.8
Elevation:	318 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	15786838 COLUMBIA NORTH, SC
Version Date:	2020

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

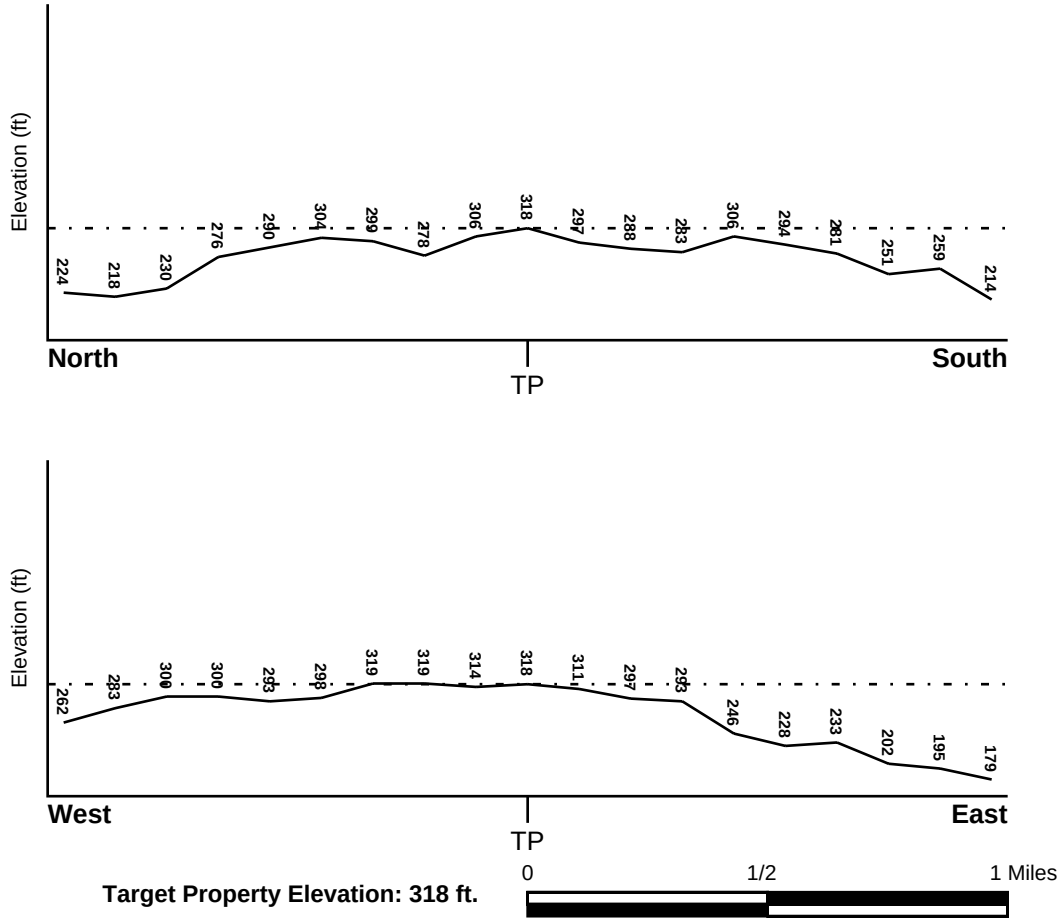
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 318 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
45063C0161G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
45079C0237K	FEMA FIRM Flood data

45063C0163G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
COLUMBIA NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Orangeburg

Soil Surface Texture: loamy sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	loamy sand	Not reported	Not reported	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	5 inches	11 inches	loamy sand	Not reported	Not reported	Max: 14 Min: 4	Max: 5.5 Min: 4.5
3	11 inches	18 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 5.5 Min: 4.5
4	18 inches	89 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 5.5 Min: 4.5

Soil Map ID: 2

Soil Component Name: Herndon

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

17.7 Special Contractual Conditions Between User and Environmental Professional

17.8 Qualifications of the Environmental Professional(s)

RICHARD CICCOLELLA
PROJECT MANAGER

Mr. Ciccolella is a Biologist with experience in the environmental field since 1993. He has extensive experience in a variety of environmental areas including wetland delineation, biological assessments, Phase I and Phase II Environmental Site Assessments, NEPA Environmental Assessments, and soil and ground water assessments with respect to leaking underground storage tanks and/or other sources of potential subsurface contamination.

EDUCATION
B.S., Biology - Auburn University (1993)

CERTIFICATIONS
Niton XRF Lead Analyzer Manufacturer's Training Course
Lead Awareness Training Certificate
Wetland Delineation – Richard Chinn Environmental Training, Inc.

SPECIALIZED TRAINING
Environmental Site Assessments, Phase I and Phase II
Wetland Delination
Biology / Ecology
Ecological Modeling
Environmental Assessment

PROFESSIONAL EXPERIENCE
1993 to Present: ARM Environmental Services, Inc. - Columbia, South Carolina

Mr. Ciccolella joined ARM in 1993 as a staff scientist. His responsibilities include Phase I and Phase II Environmental Site Assessments, highway corridor assessments for hazardous materials or waste sites, soil and ground water assessments, preparation of environmental assessment documentation pursuant to the National Environmental Policy Act (NEPA), wetland delineation, and biological assessments.

PROJECT EXPERIENCE

Environmental Site Assessments

Mr. Ciccolella has been the principal investigator for numerous Phase I Environmental Site Assessments (ESAs). Assessments have been conducted on a wide range of sites including vacant property, industrial facilities, potential SCDOT rights-of-way, and retail service station properties. Typical clientele has included highway design firms, lending institutions, law firms, real estate brokers, and individual clients.

Subsurface Assessments

Mr. Ciccolella has been involved with the assessment of numerous sites where the subsurface soils and/or ground water have been impacted from leaking underground storage tanks or other sources. His responsibilities on these projects have included the completion of numerous ground water quality assessments designed to characterize the subsurface contamination, determine the primary direction of ground water flow and aquifer characteristics, identify and evaluate potential exposure pathways, and model the fate and transport of the contaminated ground water plumes. His project experience includes numerous assessments conducted pursuant to South Carolina Department of Health and Environmental Control (DHEC) guidelines for assessment of petroleum underground storage tank (UST) releases. Other subsurface assessment work has included the completion of numerous Phase II Soil and/or Ground Water Quality Assessments for commercial real estate transactions and SCDOT right of way acquisitions.

Highway Corridor Assessments

Mr. Ciccolella has also been involved in numerous Highway Corridor Assessments. These Corridor Assessments have been conducted to evaluate the presence, or likely, presence, of hazardous waste or materials that may pose a threat of contamination to the potential highway corridor. Corridor Assessments typically include a site reconnaissance of the corridor area, a review of available regulatory information for sites that potentially are a source of contamination to the corridor, discussions with regulatory personnel regarding specific sites of concern, and the generation of a report summarizing the findings and providing specific recommendations. Typical clientele has included highway design firms involved in the preparation of environmental impact studies conducted pursuant to NEPA.

Environmental Assessment

Mr. Ciccolella was the principal author of the NEPA Environmental Assessment (EA) conducted for the proposed construction of a Ready Building for the 43rd Weapons of Mass Destruction – Civil Support Team of the South Carolina Army National Guard. The EA included an alternatives analysis of a variety of potential environmental impacts including natural resource impacts, cultural resource impacts and community impacts.

Biological Assessments

Mr. Ciccolella has performed numerous wetland delineations throughout South Carolina and has been the principal field technician on a number of wetland assessments, delineation, and wetland mitigation projects. His duties have included wetland delineation and monitoring of environmental conditions at wetland mitigation sites.

ANDREW M. WILSON, P.G.
SENIOR GEOLOGIST / PRINCIPAL

Mr. Wilson is a Professional Geologist with approximately twenty years of professional experience in the environmental field. He has experience in all aspects of environmental assessment and remediation. Mr. Wilson has been the principal investigator on hundreds of environmental investigations, involving RCRA, CERCLA, DNAPL assessment, LNAPL assessment and remediation and dry cleaning contaminant evaluation. Mr. Wilson has also been involved as the principal investigator in numerous projects involving contaminant source apportionment, and contaminant fate and transport analysis.

EDUCATION
B.S., Geology - University of South Carolina, 1980
M.S., Geology - University of Mississippi, 1983

CERTIFICATIONS
Registered Professional Geologist, South Carolina, North Carolina, Tennessee, and Florida
South Carolina Certified Well Driller
OSHA Hazardous Waste Operations and Emergency Response with Updates

SPECIALIZED TRAINING
Geology, Hydrogeology, Remedial Technologies, Coastal Geological Processes, South Carolina Stratigraphy, Geoprobe (multilevel groundwater sampling, conductivity probe, membrane interface probe, injection techniques)

PROFESSIONAL EXPERIENCE
1993 to Present: ARM Environmental Services, Inc. - Columbia, South Carolina

Mr. Wilson joined ARM in 1993 as Principal and Senior Geologist / Hydrogeologist. His responsibilities include business development, technical oversight, and project leader in ground water quality assessments and remediation. Project experience includes assessment and remediation of metals contamination site in the Congaree Vista, assessment of lead contamination in soils, surface water, and groundwater at firing ranges #2 and #4 at Fort Jackson, South Carolina, and assessment of soil and ground water at four South Carolina turbine powered gas compression stations across South Carolina.

1985 to 1993: ViroGroup - ETE Division - Lexington, South Carolina

Mr. Wilson was employed as a Staff/Senior level Hydrogeologist and later as Manager of Hydrogeological Services. His responsibilities included assimilation, evaluation and reporting of geologic and environmental data, large scale project management, business development, and management of a staff of technicians, geologists and hydrogeologists. Mr. Wilson was also team leader for all Corporate ground water remedial activities.

1983-1985 S.C. Dept. of Health and Environmental Control, Ground Water Protection Division, Staff Geologist - Columbia, South Carolina

While at DHEC, Mr. Wilson worked on a variety of projects including ground water contamination and remediation from manufacturing facilities, landfills, and waste disposal sites.

PROJECT EXPERIENCE

Environmental Assessments

Mr. Wilson has been the principal investigator on hundreds of Phase I, II, and III environmental site assessments (ESA's). These ESA's have been completed on a wide variety of industrial, agricultural, commercial, and waste disposal facilities and have been completed for lending institutions, law firms, real estate brokers, and industrial clients. Mr. Wilson has also conducted seminars regarding "due diligence" and environmental site assessments.

Ground Water Quality / Subsurface Geological Assessments and Remediation

Mr. Wilson has been involved with the field investigation and suitability evaluation of numerous potential solid/chemical waste and waste water disposal sites. Characterization of the site geology and hydrogeology is of primary importance when property is being evaluated for mining or as utilization for treatment, storage and/or disposal facility for waste. In the area of contaminant hydrogeology, Mr. Wilson has been project manager on numerous projects involving ground water assessment and remediation from creosote, semi-volatile and volatile organic chemicals, and heavy metals.

A partial list of remedial projects and responsibilities include: field hydrogeologist for the hydrogeological evaluation and remedial activities of the shallow aquifer at the Laidlaw Environmental Services, Inc., Pinewood, S.C., hazardous waste landfill; Project Manager for the hydrogeological assessment Balchem Inc.'s, Green Pond, S.C. facility, Assessment and Remedial Manager for Carolina Plating and Stamping's Greenville, S.C., facilities; Project Manager for preparing the ground water monitoring plan portion of closure and post closure plans for a confidential New Jersey client; Project Manager responsible for development of a Ground Water Quality Assessment Program for Carolina Plating and Stamping Division's Greenville, S.C., facility; Project Manager for evaluation of three sites polluted with wood preserving chemicals for a South Carolina client, and principal investigator for State (DHEC) funded assessment and corrective action at numerous leaking UST sites. Corrective action activities have included soil removal, forced air injection and injection of bacteria and oxygen enriched compounds.

Mr. Wilson also served as the manager of technical field activities for the plantiff in the Martin v. Diamant Boart case and also as the principal inspector in the Phase II environmental assessment activities at the Sunny Slope Farms site in Gaffney, South Carolina.

1.0 Introduction

Pursuant to authorization from Integrated Consulting & Engineering (ICE), ARM has completed Phase 2 Limited Subsurface Assessments (LSA) of 4 sites along Broad River Road, near the I-20 interchange, in Columbia, SC. The sites were selected based on previous Phase I Environmental Site Assessments (ESA), prepared by F&ME Consultants, dated June 14, 2017. Phase 2 efforts were concentrated in potential new right of way (ROW) areas for two sites, and across the sites for two sites.

Phase 2 LSAs were conducted at the following 4 sites:

- Former Port Unit 288 (North American Title Loans), 2224 Broad River Road (Tract 206)
- Circle K 2703105, 2220 Broad River Road (Tract 207)
- Former Shepperds Texaco, 2116 Broad River Road (Tract 272)
- Former Racetrac 978, 2114 Broad River Road (Tract 273)

1.1 Purpose

The referenced sites are included on the SCDHEC Leaking Underground Storage Tank (LUST) database and are known to have subsurface petroleum-based soil and / or groundwater contamination. The purpose of the LSAs was to identify significant concentrations of chemicals of concern (COC) in the subsurface soil in areas of potential new right of way / approximate construction limits that would potentially be encountered during road related work at the referenced sites. Borings outside new road construction areas were installed to shallower depths as it is understood that work will primarily include building demolition, pavement removal and site grading (shallow disturbances). Borings in proposed new ROW areas were typically installed to deeper depths as deeper soil disturbance may be necessary here.

1.2 Scope of Services

- ARM obtained current SCDHEC information for each site as it pertains to known soil / groundwater contamination.
- ARM notified SC 811 in order to have subsurface utilities identified.
- ARM contracted with Reed Tech, a private utility locator, to conduct an electromagnetic / ground penetrating radar (EM/GPR) survey at Tracts 272 and 273 in an attempt to determine if USTs remain onsite.
- On March 21 and 22, a Geoprobe was used to install 32 soil borings in representative areas of the potential area of new ROW / area of new road construction activity and / or the overall site, depending on the location. The soil borings were installed to depths of approximately 5 to 15 feet below ground surface (bgs). Areas of planned new road construction areas included deeper borings.

Borings outside new road construction areas were shallower as it is understood that work will primarily include building demolition, pavement removal and site grading (shallow disturbances). The soil borings were field screened at 2 to 5 foot depth intervals with an Organic Vapor Analyzer (OVA) for evidence of organic vapors.

- Based on the field screening, one soil sample from each boring was collected and submitted to a South Carolina certified laboratory for analysis. As the concern appears to be from gas station sites, the laboratory analyses consisted of benzene, toluene, ethylbenzene, xylenes (BTEX), naphthalene and methyl tert butyl ether (MTBE) by EPA Method 8260, and Polynuclear Aromatic Hydrocarbons (PAHs) by EPA Method 8270. These compounds are typically associated with petroleum fuel-based contamination.
- A Summary Report has been compiled (this document), to include field data, lab data and interpretation.

2.0 Results

A general site description, site location, general background information, and soil sampling results for the referenced sites are summarized in the following sections.

2.1 Former Port Unit 288, 2224 Broad River Road (Tract 206)

The site is a former gas station and is the current location of a North American Title Loans business. A potential area of new ROW / area of new road construction activity has been identified encroaching onto the site from Broad River Road.

Subsurface soils at the site were primarily sandy clays, silty sandy clays, and silty clays. Several of the borings included small quartz cobbles at deeper depths. Four borings were completed to depths of 12 feet. The soil borings were field screened with an OVA at 2 to 5 foot intervals. The OVA data is summarized in Table 1 below. The soil boring / soil sample locations are indicated on Figure 1 in Attachment A.

Table 1 – Soil Screening (OVA) Results –
Former Port Unit 288 (North American Title Loans), 2224 Broad River Rd

Soil Boring ID	Soil OVA Results (PPM)			
Depth Interval	2 ft	5 ft	10 ft	12 ft
SB-1	1.0	0.9	1.3	1.7*
SB-2	0.9	1.4	0.8	0.9*
SB-3	0.9	0.9	1.0	1.0*
SB-4	0.4	0.3	0.8	0.8*

* Sample collected for laboratory analysis

The OVA field screening results did not indicate the significant presence of volatile organic compounds (VOCs) in any of the soil borings. One sample from each boring was submitted to a South Carolina certified laboratory for analysis of BTEX, naphthalene, MTBE and PAHs. The positive laboratory analytical results for the soil samples are summarized in Table 2 below. DHEC Risk Based Screening Levels (RBSLs) for clayey soils are provided as a primary regulatory comparison standard, if available and applicable. EPA Regional Screening Levels (industrial) and the EPA Maximum Contaminant Level (MCL) based Site Screening Level (SSL) are also provided. The MCL based SSL is an indicator of a contaminants potential to leach to groundwater at concentrations greater than the groundwater MCL. The complete laboratory analytical data is included in Attachment B.

Table 2 – Laboratory Analytical Data Positive Results
Former Port Unit 288 (North American Title Loans), 2224 Broad River Rd

Sample ID	Analyte	Sample Result (ug/kg)	DHEC RBSL*	Industrial Soil RSL** (ug/kg)	MCL Based SSL*** (ug/kg)
SB-4	Benzo(b)fluoranthene	21	N/A	21,000	N/A
	Fluoranthene	18	N/A	3,000,000	N/A
	Pyrene	16	N/A	2,300,000	N/A

*DHEC Risk Based Screening Level (Protection of Groundwater)
**RSL = EPA Regional Screening Level
***SSL = Protection of Groundwater Soil Screening Level

Very low concentrations of 3 PAHs were detected in sample SB-4. DHEC RBSLs are not available for these 3 PAHs. The concentrations of these PAHs were found to be significantly less than the EPA Industrial Soil RSL. There were no detections of the target COCs in any of the other soil samples collected. Therefore, based on the laboratory analytical results and the OVA soil screening results, it is not expected that petroleum fuel-based soil contamination would be encountered in the area of potential new ROW / areas of new road construction adjacent to the 2224 Broad River Road site.

2.2 Circle K 2703105, 2220 Broad River Road (Tract 207)

The site is an active Circle K gas station. A potential area of new ROW / area of new road construction activity has been identified encroaching onto the site from Broad River Road.

Subsurface soils at the site were primarily sandy clays, silty sandy clays, and silty clays. Several of the borings included small quartz cobbles at deeper depths. Three borings were completed to depths of 12 to 15 feet. The soil borings were field screened with an OVA at 2 to 5 foot intervals. The OVA data is summarized in Table 3 below. The soil boring / soil sample locations are indicated on Figure 2 in Attachment A.

Table 3 – Soil Screening (OVA) Results
Circle K 2703105, 2220 Broad River Road (Tract 207)

Soil Boring ID	Soil OVA Results (PPM)				
Depth Interval	2 ft	5 ft	10 ft	12 ft	15
SB-1	1.2	0.4	1.2	Not Screened	1.4*
SB-2	0.1	0.8	1.1	1.3*	Not Screened
SB-3	1.1	0.8	0.9	1.2*	Not Screened

* Sample collected for laboratory analysis

The OVA field screening results did not indicate the significant presence of volatile organic compounds (VOCs) in any of the soil borings. The deepest sample from each boring was submitted to a South Carolina certified laboratory for analysis of BTEX, naphthalene, MTBE and PAHs.

None of the target COCs were detected in the samples collected for analysis. Therefore, based on the laboratory analytical results and the OVA soil screening results, it is not expected that petroleum fuel-based soil contamination would be encountered in the area of potential new ROW / areas of new road construction adjacent to the 2220 Broad River Road site. The complete laboratory analytical data is included in Attachment B.

2.3 Former Shepperds Texaco, 2116 Broad River Road (Tract 272)

The former Shepperds Texaco site, at 2116 Broad River Road, is a former gasoline service station. The online DHEC UST registry database indicates that four USTs have been removed from the site; however, a date of removal is unknown. DHEC file information, obtained through the FOI process, indicates the approximate location of the former UST basin to have been adjacent to the southeastern property line. ARM contracted with Reed Tech, a private utility locator, to conduct an EM/GPR survey at the site in an attempt to determine if USTs remain onsite. No indications of remaining USTs were discovered onsite through this process. Documentation from Reed Tech is included in Attachment C.

The Tier 1 report for the site, dated September 21, 2009, shows naphthalene in soil concentrations in excess of DHEC Risk Based Screening Levels (RBSLs) in the vicinity of the dispenser islands at depths ranging from 4 to 8 feet below ground surface. The three monitoring wells installed for the Tier 1 only exhibited concentrations of MTBE that were greater than groundwater RBSLs.

The Tier 2 report for the site, dated June 29, 2012, indicates shallow groundwater depths of approximately 20 to 40 feet. The Tier 2 report also indicates that MTBE appeared to be the constituent of concern in groundwater and that it was likely a result of migration from the adjacent RaceTrac site. The most recent groundwater monitoring report for the site, dated December 20, 2019, indicated that in onsite monitoring wells, only MTBE was detected on the northeastern portion of the subject property at a concentration exceeding the groundwater RBSL, and also concluded that the MTBE was from the adjacent RaceTrac site.

In summary, the available DHEC file information does not indicate widespread shallow soil contamination, with naphthalene found near the dispenser islands at depths of 4 to 8 feet. Groundwater at the site does not appear to be significantly impacted, except with MTBE on the northeastern portion. A letter of No Further Action (NFA) was issued for the site, dated January 13, 2014, indicating that based on the available information, DHEC will not require further assessment or remediation of the site, as far as conditions pertain to the documented UST release.

For this current assessment, subsurface soils at the site were found to be primarily silty sandy clay to tight silty clay. Three borings were completed in the potential new ROW / area of new roadway construction to depths of 10 feet and nine borings were completed across the site to depths of 8 feet. The soil borings were field screened with an OVA at 2 to 5 foot intervals. The OVA data is summarized in Table 4 below. The soil boring / soil sample locations are indicated on Figure 3 in Attachment A.

Table 4 – Soil Screening (OVA) Results
Former Shepperds Texaco, 2116 Broad River Road (Tract 272)

Soil Boring ID	Soil OVA Results (PPM)					
Depth Interval	2 ft	4 ft	5 ft	6 ft	8 ft	10 ft

SB-2	0.2	Not Screened	0.5	Not Screened	Not Screened	0.3*
SB-3	0.5	Not Screened	0.3	Not Screened	Not Screened	0.2*
SB-4	1.9	21.8	Not Screened	25.2	33.2*	Not Screened
SB-5	34.5	316	Not Screened	900	1053*	Not Screened
SB-6	253.1	290.4*	Not Screened	85.7	103.3	Not Screened
SB-7	6.8	22.7	Not Screened	43.2*	9.3	Not Screened
SB-8	293.5	50.1	Not Screened	194	952*	Not Screened
SB-9	1.7	1.0	Not Screened	0.8	1.0*	Not Screened
SB-10	0.7	0.7	Not Screened	0.4	0.8*	Not Screened
SB-11	0.3	0.3	Not Screened	0.3	0.6*	Not Screened
SB-12	0.1	0.3	Not Screened	0.2	0.1*	Not Screened

* Sample collected for laboratory analysis

The OVA field screening results indicated significant VOC based vapors in several of the site borings, but not in the borings located in the potential new ROW / area of new roadway construction. The OVA based evidence of contamination was primarily in the vicinity of the former dispensers, which is in substantial agreement with past DHEC directed assessments. Based on the field screening one soil sample from each boring was submitted to a South Carolina certified laboratory for analysis of BTEX, naphthalene, MTBE, and PAHs. The positive laboratory analytical results for the soil samples are summarized in Table 5 below. DHEC RBSLs for clayey soils, at 10 to 15 feet above the water table, are provided as the primary regulatory comparison standard, if available and applicable. EPA Regional Screening Levels (industrial) and the EPA MCL based SSL are also provided. The MCL based SSL is an indicator of a contaminants potential to leach to groundwater at concentrations greater than the groundwater MCL. The complete laboratory analytical data is included in Attachment B.

*DHEC Risk Based Screening Level (for clay rich soil with separation distance of 10-15 feet)
**RSL = EPA Regional Screening Level
***SSL = Protection of Groundwater Soil Screening Level

Significant petroleum based soil contamination was detected in samples SB-5, SB-6, SB-7, SB-8, and SB 10. Based on the OVA field screening results and the laboratory analytical results, soil contamination in the dispenser area appears to be within the 2 to 6 foot depth range. Therefore, shallow excavation in the former dispenser area may encounter petroleum contaminated soil. Based on the OVA screening and the laboratory analytical results, soil contamination is present in the vicinity of the former UST basin.

However, contamination here appears to be deeper, in the 8 foot range, and therefore, shallow excavation in this area would be much less likely to encounter petroleum based soil contamination. Based on the OVA field screening and laboratory results, there is a low potential for encountering petroleum based soil contamination in the area of potential new ROW / areas of new road construction adjacent to the 2116 Broad River Road site. Additionally, there is no known current or historic source of petroleum based soil contamination within the area of potential new ROW / areas of new road construction adjacent to the 2116 Broad River Road site. Groundwater at the site has been documented to be approximately 20 to 40 feet below ground surface and only appears to be impacted by MTBE on the northeastern portion of the site. Based on the available information, and the depth to groundwater, it is not expected that contaminated groundwater would be encountered during work at the site.

2.4 Former Racetrac 978, 2114 Broad River Road (Tract 273)

The former RaceTrac 978 site, at 2114 Broad River Road, is a former gasoline service station. The online DHEC UST registry database indicates that three USTs were removed from the site and that one was abandoned in place by filling with an inert material. However, DHEC file information, obtained through the FOI process, does indicate that the fourth tank has since been removed. The file information also indicates the approximate location of the former UST basin to have been adjacent to the southeastern property line. ARM contracted with Reed Tech, a private utility locator, to conduct an EM/GPR survey at the site in an attempt to determine if USTs remain onsite. No indications of remaining USTs were discovered onsite through this process. Documentation from Reed Tech is included in Attachment C.

An Investigation of Potential Soil Contamination report, dated, December 9, 1991, shows significant petroleum-based soil contamination adjacent to the UST basin at a depth of 13 feet. OVA results also show that organic vapor measurements increase with depth, becoming most significant at the depth of the soil sample collected.

A Product Line Closure report, dated March 31, 2010, documented the closure of a fuel product line that ran from the southeastern-most dispenser island toward the UST basin. A sample collected adjacent to the dispenser island, at a depth of 3 feet below ground surface, exhibited significant petroleum-based soil contamination. Subsequent to this report DHEC considered a second release to have occurred.

The site has undergone many rounds of Advanced Fluid Vapor Recovery (AFVR) events in an effort to remediate groundwater contamination. The most recent Groundwater Monitoring report for the site, dated June 11, 2020, indicates that significant groundwater contamination remains on site, in the area adjacent to the northeast of the former UST basin. Although contamination above RBSLs remains, DHEC has issued a risk-based Conditional NFA for the site, dated May 7, 2021. The most recent groundwater data indicates that groundwater is located approximately 35 feet below ground surface at the site.

For this current assessment, subsurface soils at the site were found to be primarily silty sandy clay to tight silty clay. Three borings were completed in the potential new ROW / area of new roadway construction to depths of 12 feet and ten borings were completed across the site to depths of 8 feet. The soil borings were field screened with an OVA at 2 to 5 foot intervals. The OVA data is summarized in Table 6 below. The soil boring / soil sample locations are indicated on Figure 4 in Attachment A.

Table 6 – Soil Screening (OVA) Results
Former Racetrac 978, 2114 Broad River Road (Tract 273)

SB-13	0.4	0.6	Not Screened	0.2	1,702*	Not Screened	Not Screened

* Sample collected for laboratory analysis

The OVA field screening results indicated the significant presence of volatile organic compounds (VOCs) primarily at the deeper depth near the UST basin; however, SB-5 also exhibited significant organic vapors at a depth of 8 feet. Based on the field screening one soil sample from each boring was submitted to a South Carolina certified laboratory for analysis of BTEX, naphthalene, MTBE, and PAHs. The positive laboratory analytical results for the soil samples are summarized in Table 7 below. DHEC RBSLs for clayey

soils, at 10 to 15 feet above the water table, are provided as the primary regulatory comparison standard, if available and applicable. EPA Regional Screening Levels (industrial) and the EPA MCL based SSL are also provided. The MCL based SSL is an indicator of a contaminants potential to leach to groundwater at concentrations greater than the groundwater MCL. The complete laboratory analytical data is included in Attachment B.

*DHEC Risk Based Screening Level (for clay rich soil with separation distance of 10-15 feet)
**RSL = EPA Regional Screening Level
***SSL = Protection of Groundwater Soil Screening Level

Significant petroleum-based soil contamination was detected in samples SB-6, SB-8, SB-11, and SB 13. Although lab results do not show significant contamination for SB-5, the OVA screening results did indicate significant organic vapors in this boring at the 2 foot and 8 foot depths. Based on the OVA field screening results and the laboratory analytical results, soil contamination in the dispenser areas appears to be within the 2 to 8 foot depth range. Additionally, the previously referenced Product Line Closure report, dated March

31, 2010, documented the closure of a fuel product line that ran from the southeastern-most dispenser island toward the UST basin. A sample collected adjacent to the dispenser island, at a depth of 3 feet below ground surface, exhibited significant petroleum-based soil contamination. Therefore, shallow excavation in the former dispenser areas may encounter petroleum contaminated soil. Based on the OVA screening and the laboratory analytical results, soil contamination is present in the vicinity of the former UST basin. However, contamination here appears to be deeper, in the 8 foot range, and therefore, shallow excavation in this area would be much less likely to encounter petroleum based soil contamination. Based on the OVA field screening and laboratory results, there is a low potential for encountering petroleum-based soil contamination in the area of potential new ROW / areas of new road construction adjacent to the 2116 Broad River Road site. Additionally, there is no known current or historic source of petroleum-based soil contamination within the area of potential new ROW / areas of new road construction adjacent to the 2114 Broad River Road site. Groundwater at the site has been documented to be approximately 35 feet below ground surface. Based on the available information, and the depth to groundwater, it is not expected that contaminated groundwater would be encountered during work at the site.

3.0 Conclusions

Detailed results for the LSA conducted at each site are provided above. The following sites exhibited evidence of subsurface contamination that may warrant consideration during project construction activities, depending on depths of disturbance:

- Former Shepperds Texaco, 2116 Broad River Road (Tract 272)
- Former Racetrac 978, 2114 Broad River Road (Tract 273)

At each of the above listed sites, shallow petroleum-based soil contamination appears to be confined to the dispenser island areas and would range from approximately 2 feet to 8 feet in depth. It is understood that only shallow disturbances will occur in these areas, and therefore, the potential for encountering contaminated soil would be reduced the shallower the disturbance. Contamination is likely to be located beneath the former dispenser islands and dispenser piping. Soil contamination originating from the UST basins is deeper in depth, closer to 8 feet, and would likely not be encountered during shallow disturbances. Contamination at each of these sites appears to be petroleum fuel based, originating from registered UST systems.

It should also be noted that, based on the results of these assessments, in areas of potential new ROW / areas of new road construction that have been defined adjacent to all four of the sites considered in this report, there is a low potential for encountering contaminated soil during road construction activities. These areas do not have known sources of shallow soil contamination (UST components) and none of the deeper soil borings in these areas exhibited evidence of contamination.

These sites have been assessed by DHEC under the State Underground Petroleum Environmental Response Bank (SUPERB) regulations. The DHEC directed assessments are covered by SUPERB funding and the responsibility for the UST related contamination typically remains with the responsible party of record. However, the LSAs in this document are an effort to identify contamination that would potentially be encountered during road or utility construction activities. Subsurface contamination that is encountered and/or excavated should be handled / disposed of properly and all appropriate worker protection measures should be undertaken. SUPERB funding will not cover disposal costs for the contaminated soil and or groundwater encountered during construction activities. No activities that will exacerbate existing contamination, or cause increased contaminant migration, should be conducted.

Case Narrative
ARM Environmental Services, Inc.
Lot Number: XC24073

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report. Where sampling is conducted by the client, results relate to the accuracy of the information provided, and as the samples are received.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

Pace is a TNI accredited laboratory; however, the following analyses are currently not listed on our TNI scope of accreditation: Drinking Water: VOC (excluding BTEX, MTBE, Naphthalene, & 1,2-dichloroethane) EPA 524.2, E. coli and Total coliforms SM 9223 B-2004, Solid Chemical Material: TOC Walkley-Black, Biological Tissue: All, Non-Potable Water: SGT-HEM EPA 1664B, Silica EPA 200.7, Boron, Calcium, Silicon, Strontium EPA 200.8, Bicarbonate, Carbonate, and Hydroxide Alkalinity SM 2320 B-2011, SM 9221 C E-2006 & SM 9222D-2006, Strontium SW-846 6010D, VOC SM 6200 B-2011, Fecal Coliform Colilert-18.

Where applicable, all soil sample results (including LOQ and DL if requested) are corrected for dry weight unless flagged with a "W" qualifier.

If you have any questions regarding this report, please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS
Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 36429. An LCS/LCSD was run in lieu of an MS/MSD.

Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 37057. An LCS/LCSD was run in lieu of an MS/MSD.

Sample Receipt Checklist (SRC)

Client: ARM Cooler Inspected by/date: KDRW / 03/24/2022 Lot #: XC24073

Means of receipt: ☑ Pace ☐ Client: ☐ UPS ☐ FedEx ☐ Other:

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: 22-3

2.0 / 2.0 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☐ No	☑ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L. (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Report of Analysis

ARM Environmental Services, Inc.
1210 1st Street S. Ext.
Columbia, SC 29209
Attention: Richard Ciccolella

Project Name: 2220 Broad River Rd.

Project Number: 08-300-22

Lot Number:**XC24068**

Date Completed:04/01/2022

04/01/2022 3:57 PM
Approved and released by:
Project Manager II: **Lucas Odom**

The electronic signature above is the equivalent of a handwritten signature.
This report shall not be reproduced, except in its entirety, without the written approval of Pace Analytical Services, LLC.

Pace Analytical Services, LLC (*formerly Shealy Environmental Services, Inc.*)

Case Narrative
ARM Environmental Services, Inc.
Lot Number: XC24068

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report. Where sampling is conducted by the client, results relate to the accuracy of the information provided, and as the samples are received.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

Pace is a TNI accredited laboratory; however, the following analyses are currently not listed on our TNI scope of accreditation: Drinking Water: VOC (excluding BTEX, MTBE, Naphthalene, & 1,2-dichloroethane) EPA 524.2, E. coli and Total coliforms SM 9223 B-2004, Solid Chemical Material: TOC Walkley-Black, Biological Tissue: All, Non-Potable Water: SGT-HEM EPA 1664B, Silica EPA 200.7, Boron, Calcium, Silicon, Strontium EPA 200.8, Bicarbonate, Carbonate, and Hydroxide Alkalinity SM 2320 B-2011, SM 9221 C E-2006 & SM 9222D-2006, Strontium SW-846 6010D, VOC SM 6200 B-2011, Fecal Coliform Colilert-18.

Where applicable, all soil sample results (including LOQ and DL if requested) are corrected for dry weight unless flagged with a "W" qualifier.

If you have any questions regarding this report, please contact the Pace Project Manager listed on the cover page.

Samples Receipt Checklist (SRC) (MF0018C-15)
Issuing Authority: Pace ENV - WCOL

Revised:9/29/2020
Page 1 of 1

Sample Receipt Checklist (SRC)

Client: ARM
Cooler Inspected by/date: KDRW / 03/24/2022
Lot #: XC24068

Means of receipt: ☑ Pace ☐ Client: ☐ UPS ☐ FedEx ☐ Other:

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: 22-3

2.0 / 2.0 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☐ No	☑ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA. Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Case Narrative
ARM Environmental Services, Inc.
Lot Number: XC24072

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report. Where sampling is conducted by the client, results relate to the accuracy of the information provided, and as the samples are received.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

Pace is a TNI accredited laboratory; however, the following analyses are currently not listed on our TNI scope of accreditation: Drinking Water: VOC (excluding BTEX, MTBE, Naphthalene, & 1,2-dichloroethane) EPA 524.2, E. coli and Total coliforms SM 9223 B-2004, Solid Chemical Material: TOC Walkley-Black, Biological Tissue: All, Non-Potable Water: SGT-HEM EPA 1664B, Silica EPA 200.7, Boron, Calcium, Silicon, Strontium EPA 200.8, Bicarbonate, Carbonate, and Hydroxide Alkalinity SM 2320 B-2011, SM 9221 C E-2006 & SM 9222D-2006, Strontium SW-846 6010D, VOC SM 6200 B-2011, Fecal Coliform Colilert-18.

Where applicable, all soil sample results (including LOQ and DL if requested) are corrected for dry weight unless flagged with a "W" qualifier.

If you have any questions regarding this report, please contact the Pace Project Manager listed on the cover page.

SVOCs by GC/MS
The following sample was diluted due to appearance or color: XC24072-003. The LOQ has been elevated to reflect the dilution.

VOCs by GC/MS
Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 36292. An LCS/LCSD was run in lieu of an MS/MSD.

Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 36429. An LCS/LCSD was run in lieu of an MS/MSD.

Samples Receipt Checklist (SRC) (ME0018C-15)
Issuing Authority: Pace ENV - WCOL

Revised:9/29/2020
Page 1 of 1

Sample Receipt Checklist (SRC)

Client: ARM Cooler Inspected by/date: KDRW / 03/24/2022 Lot #: XC24072

Means of receipt: ☑ Pace ☐ Client ☐ UPS ☐ FedEx ☐ Other: ____

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt: %Solid Snap-Cup ID: 22-3

2.6 / 2.6 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☐ No	☑ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA. Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Case Narrative
ARM Environmental Services, Inc.
Lot Number: XC24070

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report. Where sampling is conducted by the client, results relate to the accuracy of the information provided, and as the samples are received.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

Pace is a TNI accredited laboratory; however, the following analyses are currently not listed on our TNI scope of accreditation: Drinking Water: VOC (excluding BTEX, MTBE, Naphthalene, & 1,2-dichloroethane) EPA 524.2, E. coli and Total coliforms SM 9223 B-2004, Solid Chemical Material: TOC Walkley-Black, Biological Tissue: All, Non-Potable Water: SGT-HEM EPA 1664B, Silica EPA 200.7, Boron, Calcium, Silicon, Strontium EPA 200.8, Bicarbonate, Carbonate, and Hydroxide Alkalinity SM 2320 B-2011, SM 9221 C E-2006 & SM 9222D-2006, Strontium SW-846 6010D, VOC SM 6200 B-2011, Fecal Coliform Colilert-18.

Where applicable, all soil sample results (including LOQ and DL if requested) are corrected for dry weight unless flagged with a "W" qualifier.

If you have any questions regarding this report, please contact the Pace Project Manager listed on the cover page.

SVOCs by GC/MS
The following sample was diluted due to the nature of the sample matrix: XC24070-009. The LOQ has been elevated to reflect the dilution.

VOCs by GC/MS
Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 36292. An LCS/LCSD was run in lieu of an MS/MSD.

Surrogate recovery for the following sample was outside of acceptance limits: XC24070-013. This sample was analyzed at a high dilution; therefore, re-extraction and/or re-analysis was not performed.

Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) for analytical batch 37057. An LCS/LCSD was run in lieu of an MS/MSD.

Xylenes (total) was reported as an estimated value in sample: XC24070-004 as the result was above the upper calibration level. The sample was re-analyzed from the medium level (methanol) vial, but was not reported due to the result being below the LOQ therefore only the low level was reported.

Sample Receipt Checklist (SRC)

Client: ARM Cooler Inspected by/date: KDRW / 03/24/2022 Lot #: XC24070

Means of receipt: ☑ Pace ☐ Client ☐ UPS ☐ FedEx ☐ Other: ____

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: 22-3

2.4 / 2.4 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☐ No	☑ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Re: Geophysical Evaluation – 2114 Broad River Rd. Columbia, SC

Mr. Ciccolella,

ARM Environmental Services contracted Reed Tech Utility and Geophysical locating to conduct a geophysical evaluation of the 2114 Broad River Rd. Columbia, SC property to identify any potential underground storage tanks (USTs). On March 8th, 2022, Reed Tech conducted a two phased geophysical evaluation using multi-frequency electromagnetic profiling and ground penetrating radar. No evidence of a UST was detected on the property.

Please do not hesitate to call if you have any questions concerning this summary of findings. We appreciate the opportunity to have worked with you on this project.

Sincerely,

Duke Brantley, PhD, PG

Re: Geophysical Evaluation – 2116 Broad River Rd. Columbia, SC

Mr. Ciccolella,

ARM Environmental Services contracted Reed Tech Utility and Geophysical locating to conduct a geophysical evaluation of the 2116 Broad River Rd. Columbia, SC property to identify any potential underground storage tanks (USTs). On March 8th, 2022, Reed Tech conducted a two-phased geophysical evaluation using multi-frequency electromagnetic profiling and ground penetrating radar. No evidence of a UST was detected on the property.

Please do not hesitate to call if you have any questions concerning this summary of findings. We appreciate the opportunity to have worked with you on this project.

Sincerely,

Duke Brantley, PhD, PG
President
Reed Tech

Richland and Lexington Counties, South Carolina
June 16, 2022

Project Description: This proposed *Carolina Crossroads* (CCR) project will increase capacity, improve operation, and reconstruct/improve 12 interchanges along the I-20/20/126 corridor in Richland and Lexington Counties, South Carolina. The Federal Highway Administration (FHWA) approved a final environmental impact statement (FEIS) and record of decision (ROD) on May 2, 2019, and three reevaluations have been approved since the FEIS.

The project will be constructed in five phases through the design-build (DB) process. This noise addendum covers work proposed in Phase 2. CCR Phase 2 includes improvements to the I-20 and Broad River Road interchange widening I-20 east of the Broad River Road interchange.

Project Changes: The DB Team identified an alternate design for the I-20 and Broad River Road interchange which changes the preferred configuration from a full access tight urban diamond interchange to a partial diverging diamond interchange [DDI]).

This addendum documents the geometric alignment changes proposed by the DB Team. Additionally, this addendum documents the analysis and resulting changes to the design of noise sensitive areas (NSA) Q, R, S and T as a result of the final roadway design information.

NOISE ADDENDUM
CAROLINA CROSSROADS PHASE 2 – I-20 AT BROAD RIVER ROAD INTERCHANGE
RICHLAND AND LEXINGTON COUNTIES, SOUTH CAROLINA
JUNE 16, 2022

1. INTRODUCTION

In compliance with 23 USC Section 109(h) and (i), the Federal Highway Administration (FHWA) established a standard for the assessment of highway traffic-generated noise. The standard, published as Part 772 of Title 23 of the Code of Federal Regulations (23 C.F.R. § 772), provides procedures to be followed in conducting noise analyses that will protect the public health, welfare, and livability. In accordance with the Noise Control Act of 1972, coordination of this regulation with the Environmental Protection Agency (EPA) has been completed. The following assessment has been prepared in accordance with 23 C.F.R. § 772 and SCDOT Traffic Noise Abatement Policy (2019).

This noise addendum serves as an update to the noise analysis included in the final environmental impact statement (FEIS) and record of decision (ROD) approved on May 2, 2019 (hereafter referred to as the May 2019 FEIS). SCDOT is administering the final design and construction of the project through a Design-Build (DB) contract. This addendum documents the geometric alignment changes proposed by the DB Team since design has been finalized for the I-20 at Broad River Road Interchange (the DB Team [2022] Final Design). Additionally, this addendum documents the analysis and resulting changes to the design of Noise Barriers Q, R, S and T as a result of the DB Team (2022) Final Design.

1.1 What is The Proposed Project?

FHWA and the South Carolina Department of Transportation (SCDOT) propose to implement various strategies that will improve the mobility and enhance traffic operations by reducing existing traffic congestion within the I-20/26/126 corridor in Richland and Lexington Counties, South Carolina. The proposed project, Carolina Crossroads (CCR), will ultimately increase capacity and improve operations along the corridor, including reconstructing/improving the following interchanges: the I-20 and I-26 system-to-system interchange, I-26 Exit 101 at Broad River Road, I-26 Exit 102 at Lake Murray Boulevard, I-26 Exit 103 at Harbison Boulevard, I-26 Exit 104 at Piney Grove Road, I-26 Exit 106 at St Andrews Road, I-26 Exit 108 at Bush River Road, the I-26/I-126 interchange, I-26 Exit 110 at US 378, I-126 at Colonial Life Boulevard, I-20 Exit 65 at Broad River Road, and I-20 Exit 63 at Bush River Road.

FHWA approved a FEIS and record of decision (ROD) for the project on May 2, 2019. Three reevaluations have been completed for the project since the FEIS/ROD: one for CCR Phase 1 design updates due to right-of-way (ROW) changes (approved August 3, 2020), one for Noise Barrier R updates (approved October 30, 2020), and one for demolition updates (approved December 8, 2020). The project has since progressed towards construction that will occur in five phases through the DB process. Project construction is anticipated to begin in fall 2022 with traffic control/maintenance activities and substantial project completion scheduled for March 2025.

Under CCR Phase 2, SCDOT proposes improvements to Interstate 20 (I-20) in Richland County, SC, including widening I-20, constructing new ramps and bridges, and replacing the I-20 at US 176 (Broad River Road) interchange with a new interchange design. The project will extend from approximately 0.2 mile east of the Browning Road overpass to just west of the existing bridge over the Broad River.

SCDOT is administering the final design and construction of the project through a DB contract. The DB team has slightly modified various design elements of the previous Refined Recommended Preferred Alternative (RRPA), including an alternative design for the I-20 at US 176 (Broad River Road) interchange to provide the most efficient and economical solution to SCDOT. As a result of these changes, the environmental noise impacts have been reevaluated, as discussed below.

1.2 Project Changes

The CCR Phase 2 DB Team evaluated the previous RRPA for CCR Phase 2 to develop more efficient and economical solutions based on design and construction. This included a detailed evaluation of the I-20 at US 176 (Broad River Road) interchange (Exit 65). A single point urban interchange (SPUI) was proposed as the RRPA design to replace the existing tight diamond interchange. The CCR Phase 2 DB Team proposes an alternative design for the I-20 at US 176 (Broad River Road) interchange—an offset diverging diamond interchange (DDI)—for I-20 at US 176. Following extensive analysis, the offset DDI was chosen as the most preferred concept based on several factors, such as constructability, cost effectiveness, and traffic operations. The proposed design does not include addition or removal of ramp connections to I-20 and I-26, which are proposed as part of the RRPA.

The purpose of the project is to provide traffic access to and from I-20 and Broad River Road efficiently and safely by replacing the old over capacity interchange and adding additional capacity along I-20 within the study limits, while keeping in view the ultimate design of the I-20/I-26/I-126 interchange. CCR Phase 2 includes adding lanes to I-20 and replacing the existing I-20/US 176 (Broad River Road) tight diamond interchange (Exit 65) with an offset DDI. These improvements include constructing new parallel bridges along Broad River Road over I-20, all new entrance and exit ramps, and other improvements to surface streets and frontage roads. This design creates two new "crossover" intersections instead of a single point intersection. The crossover is where three of the four interchange ramps intersect at a single location.

In addition, CCR Phase 2 will include construction of an exit ramp from I-20 westbound (WB) to I-26 eastbound (EB) and WB. This ramp will connect to a collector-distributor (CD) road which will include traffic from Broad River Road. The CD Road, at its maximum, will have three WB lanes. Two will split off and connect to WB I-26 and one will connect to EB I-26 once the I-20/I-26/I-126 interchange is complete. In the interim, the new connection will tie into the existing I-26 WB ramps and not reach its full capacity until the ultimate interchange is complete. Traffic that is bound for I-26 EB will continue to use the existing loop ramp until the ultimate system-to-system interchange is complete. The project will also include the relocation of Garner Lane from the I-20 EB entrance ramp to connect with Longcreek Drive north of the Broad River Road/Longcreek Drive intersection.

The following design changes were also made as part of the new offset DDI:

1. The entrance ramp from northbound (NB) Broad River Road to I-20 WB has been modified. The change reduced the ramp from two lanes to one lane. The amount of traffic using the ramp in the peak hour only required one lane. It also allows the merging with the ramp from southbound (SB) Broad River to I-20 WB to occur more efficiently.
2. The two-lane portion of the EB I-20 on-ramp from Broad River Road has been extended to provide a total of 800 feet from the south crossover intersection to improve safety and operations.
3. The south leg of Broad River Road at Briargate Circle/Marley Drive has been widened to accommodate the bicycle lane in the SB direction. The NB left turn is channelized at this approach allowing the NB and SB left-turn lanes to align with each other. The channelization is provided using pavement markings to provide guidance to drivers without presenting an obstruction in the roadway.

2. RE-EVALUATION OF BUILD CONDITIONS SOUND LEVELS

The DB Team (2022) Final Design modified the RRPA at the I-20 at US 176 (Broad River Road) interchange to an offset DDI which has the potential to influence sound levels at noise sensitive areas (NSAs) Q, R, S, T. The Build condition was reanalyzed assuming the full buildout conditions, after all phases of the CCR are completed. The Traffic Noise Model 2.5 (TNM) was updated to include the final design changes as a result of the DB Team changes and modifications to the proposed noise barrier alignment (Barriers R and S). The TNM predicted results are summarized in **Table 1**.

Table 1: NSA Sound Level Changes

NSA	# of Receivers	May 2019 FEIS	October 2020 Barrier R Re-Eval	DB Team (2022) Final Design	Change in Impacts from May 2019 FEIS to DB Team (2022) Final Design
		No. of Impacted Receivers	No. of Impacted Receivers	No. of Impacted Receivers	
Q	184	48	-	43	-5
R	93	78	77	84	+7
S	520	134	-	169	+35
T	61	20	-	24	+4
Total Impacts		**280**		**320**	**+41**

Table 1 summarizes the total number of receivers, the number of impacted receivers, and the change in impacts from either the May 2019 FEIS (for NSA Q, S, and T) or from the October 2020 Reevaluation (NSA R) and this addendum. The table shows that when the May 2019 FEIS sound levels are compared to the DB Team (2022) Final Design sound levels there is a reduction in impacted receivers in NSA Q and an increase in impacted receivers in NSA S and NSA T. The table also shows that when the October 2020 Reevaluation sound levels are compared to the DB Team (2022) Final Design sound levels there is an increase in impacted receivers in NSA R. Overall, there is an increase in the total number of impacts with the DB Team (2022) Final Design when compared to the May 2019 FEIS. The increase is likely caused by changes to the traffic volumes, truck percentages used in the TNM, and roadway geometry (horizontal and vertical design changes) in the DB Team (2022) Final Design.

Table 1, in Attachment A, provides a summary of the sound level results from the May 2019 FEIS and the results from this noise addendum. These results are shown graphically in Figure 1 in Attachment B. A comparison of the proposed concept included in the May 2019 FEIS to the DB Team (2022) Final Design is shown in Figure 2 in Attachment B. The TNM 2.5 files are in Attachment C. The TNM 2.5 sound level outputs are included in Attachment D.

3. RE-EVALUATION OF NOISE BARRIERS

The final location of the noise barriers was determined based on noise impacts provided in the May 2019 FEIS and as a result of DB Team (2022) Final Design noise impacts. The feasibleness, reasonableness, and design of Noise Barriers Q, R, S and T were re-evaluated as part of this addendum. This re-evaluation determined whether these four noise barriers would pass the feasible and reasonable criteria to construct each noise barrier. Details regarding the feasible and reasonableness criteria are listed below.

According to the SCDOT Traffic Noise Abatement Policy (October 10, 2019), a 5 dB(A) reduction must be achieved for 75 percent of the impacted receivers for the noise barrier to be acoustically feasible to construct. Additionally, the barrier shall pass the engineering feasibility criteria which includes a review of the following:

1. Topography – Determine if the abatement measure could be constructed given the topography of the location
2. Safety – Maintaining a clear recovery zone, sight distance and accommodation of disabled vehicles
3. Drainage – Issues created by directing water along, under, or away from an abatement measure
4. Utilities – Large overhead power lines, underground water, sewer, gas, oil, etc., can have a significant impact on costs and design options
5. Maintenance – Potential issues from location of abatement measure and construction materials
6. Access – Refers to the ingress and egress to properties that would be affected by the noise abatement measure
7. The exposed height of the noise abatement measure cannot exceed 25 feet based on constructability constraints

According to the SCDOT Noise Policy, three mandatory reasonable factors must be met for a noise barrier to be considered reasonable: viewpoint of the property owners and residents of benefited receptors, cost effectiveness, and noise reduction design goal.

This addendum discusses the results of the re-evaluation for Noise Barriers Q, R, S and T based on the revised DB Team (2022) Final Design. Overall, the roadway design and subsequent noise barrier design has been finalized using more refined and defined design elements.

3.1 Noise Barrier Q Re-Evaluation

The location of Noise Barrier Q was determined based on noise impacts provided in the May 2019 Detailed Noise Analysis Technical Report, and as a result of the DB Team (2022) Final Design noise impacts. Noise Barrier Q was analyzed to begin at station 161+26 and end at station 194+55 along the centerline of I-20. It would be located approximately 135 feet to 274 feet north of the centerline of I-20 and would be approximately 3,362 feet in length. The feasibleness and reasonableness of constructing Noise Barrier Q was re-evaluated as part of this noise addendum.

Noise Barrier Q was analyzed for feasibleness which resulted in 100 percent of the impacted receivers behind the barrier experiencing a reduction in sound levels of 5 dB(A) or greater. An engineering feasibility analysis was also completed reviewing the following areas:

1. Topography – The noise barrier can be constructed without significant issues with existing or proposed grades
2. Safety – The noise barrier can be placed outside the clear zone where possible or protected by using guardrail or concrete side barrier
3. Drainage – Drainage along the barrier would need be designed to allow for positive drainage and the noise barrier placement would need to avoid ditches, pipes, and culverts.
4. Utilities – There are large overhead utilities in the vicinity of the noise barrier, crossing perpendicular to I-26. Notches in the noise barrier heights, to avoid radial intrusions, would need to be considered in the final, reasonable design
5. Maintenance – The location of the noise barrier would be inside existing SCDOT ROW.
6. Access – Access to the noise barrier would need to be from I-26, not via private residences adjacent to the interstate
7. The exposed height of the noise abatement did not exceed 25 feet based on constructability constraints for this feasibility analysis

Therefore, according to the SCDOT Noise Policy, Noise Barrier Q is feasible to construct.

The reasonableness analysis for Noise Barrier Q included noise barrier panels that were 25 feet tall to achieve the largest number of benefited receptors and maximize the benefit at each receptor. The

reasonableness analysis resulted in 63 percent of the benefited first and second row receivers achieving an 8 dB(A) reduction, which is below SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier Q does not meet SCDOT's policy and is not reasonable to construct.

The associated design changes for Noise Barrier Q are listed in **Table 2**.

Table 2: Noise Barrier Q Design Changes

Report	Length (Ft.)	Wall Height Range (Min Ft. - Max Ft.)	No. of Impacted Receptors	No. of Benefited Receptors	% Impacted Receptors Achieving 5 dBA Reduction	% Impacted Receptors Achieving 8 dBA Reduction	Estimated Cost per Benefited Receptor ($)	Estimated Constr-uction Cost ($)
May 2019 FEIS	3,360	25	48	159	100	61	N/A	N/A
DB Team (2022) Final Design	3,362	25	43	128	100	63	N/A	N/A

Table 2 in Attachment A summarizes the results of the Noise Barrier Q evaluation. Figure 1 in Attachment B illustrates the results of the Noise Barrier Q evaluation. The TNM 2.5 files are in Attachment C. The TNM 2.5 sound level outputs are included in Attachment D. The barrier height data is summarized in Attachment E. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier Q is in Attachment F.

3.2 Noise Barrier R Re-Evaluation

The location of Noise Barrier R was determined based on noise impacts provided in the May 2019 Detailed Noise Analysis Technical Report and as a result of the DB Team (2022) Final Design noise impacts. Noise Barrier R was analyzed to begin at station 216+73 and end at station 258+67 along the centerline of I-20. It would be located approximately 79 feet to 204 feet north of the centerline of I-20 and would be approximately 4,550 feet in length. The feasibleness and reasonableness of constructing Noise Barrier R was re-evaluated as part of this noise addendum.

Noise Barrier R was analyzed for feasibleness which resulted in 100 percent of the impacted receivers behind the barrier experiencing a reduction in sound levels of 5 dB(A) or greater. An engineering feasibility analysis was also completed by reviewing the following areas:

1. Topography – The noise barrier can be constructed without significant issues with existing or proposed grades
2. Safety – The noise barrier can be placed outside the clear zone where possible or protected by using guardrail or concrete side barrier
3. Drainage – Drainage along the barrier would need be designed to allow for positive drainage and the noise barrier placement would need to avoid ditches, pipes, and culverts
4. Utilities – There are large overhead utilities in the vicinity of the noise barrier, crossing perpendicular to I-26. Notches in the noise barrier heights, to avoid radial intrusions, would need to be considered in the final, reasonable design.
5. Maintenance – The location of the noise barrier would be inside existing SCDOT ROW
6. Access – Access to the noise barrier would need to be from I-26, not via private residences adjacent to the interstate
7. The exposed height of the noise abatement did not exceed 25 feet based on constructability constraints for this feasibility analysis

Therefore, according to the SCDOT Noise Policy, Noise Barrier R is feasible to construct.

The reasonableness analysis for Noise Barrier R included noise barrier panels that were 8 to 21 feet tall to achieve the largest number of benefited receptors and maximize the benefit at each receptor. The reasonableness analysis resulted in 81 percent of the benefited first and second row receivers achieving an 8 dB(A) reduction, which is above the SCDOT policy of 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. The estimated construction cost for Noise Barrier R is $2,693,180 and the benefit achieved by constructing Noise Barrier R is $29,924 per benefited receiver, which is below SCDOT policy of $30,000 per benefited receiver. Therefore, Noise Barrier R meets SCDOT's policy and is reasonable to construct.

The associated design changes for Noise Barrier R are listed in **Table 3**.

Table 3: Noise Barrier R Design Changes

Report	Length (Ft.)	Wall Height Range (Min Ft. - Max Ft.)	No. of Impacted Receptors	No. of Benefited Receptors	% Impacted Receptors Achieving 5 dBA Reduction	% Impacted Receptors Achieving 8 dBA Reduction	Estimated Cost per Benefited Receptor ($)	Estimated Constr-uction Cost ($)
May 2019 FEIS	4,320	11-22	78	87	**95**	**80**	32,680	2,843,120
October 2020 Barrier R Re-Eval	4,550	11-15	77	91	**75**	**81**	25,710	2,339,645
DB Team (2022) Final Design	4,200	8-21	84	90	**98**	**81**	29,924	2,693,180

Table 3 in Attachment A summarizes the results of the Noise Barrier R evaluation. Figure 1 in Attachment B illustrates the results of the Noise Barrier R evaluation. The TNM 2.5 files are in Attachment C. The TNM 2.5 sound level outputs are included in Attachment D. The barrier height data is summarized in Attachment E. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier R is in Attachment F. A summary of the SCDOT completed public outreach/noise balloting is included in Attachment G.

3.3 Noise Barrier S Re-Evaluation

The location of Noise Barrier S was determined based on noise impacts provided in the May 2019 Detailed Noise Analysis Technical Report and as a result of the DB Team (2022) Final Design noise impacts. Noise Barrier S was analyzed to begin at station 215+73 and end at station 257+62 along the centerline of I-20. It would be located approximately 77 feet to 124 feet south of the centerline of I-20 and would be approximately 4,189 feet in length. The feasibleness and reasonableness of constructing Noise Barrier S was re-evaluated as part of this noise addendum.

Noise Barrier S was analyzed for feasibleness which resulted in 97 percent of the impacted receivers behind the barrier experiencing a reduction in sound levels of 5 dB(A) or greater. An engineering feasibility analysis was also completed by reviewing the following areas:

1. Topography – The noise barrier can be constructed without significant issues with existing or proposed grades
2. Safety – The noise barrier can be placed outside the clear zone where possible or protected by using guardrail or concrete side barrier
3. Drainage – Drainage along the barrier would need be designed to allow for positive drainage and the noise barrier placement would need to avoid ditches, pipes, and culverts

4. Utilities – There are large overhead utilities in the vicinity of the noise barrier, crossing perpendicular to I-26. Notches in the noise barrier heights, to avoid radial intrusions, would need to be considered in the final, reasonable design.
5. Maintenance – The location of the noise barrier would be inside existing SCDOT ROW
6. Access – Access to the noise barrier would need to be from I-26, not via private residences adjacent to the interstate
7. The exposed height of the noise abatement did not exceed 25 feet based on constructability constraints for this feasibility analysis

Therefore, according to the SCDOT Noise Policy, Noise Barrier S is feasible to construct.

The reasonableness analysis for Noise Barrier S included noise barrier panels that were 18 to 25 feet tall to achieve the largest number of benefited receptors and maximize the benefit at each receptor. The reasonableness analysis resulted in 88 percent of the benefited first and second row receivers achieving an 8 dB(A) reduction, which is above SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. The estimated construction cost for Noise Barrier S is $3,494,470 and the benefit achieved by constructing Noise Barrier S is $10,954 per benefited receiver, which is below SCDOT policy of $30,000 per benefited receiver. Therefore, Noise Barrier S meets SCDOT's policy and is reasonable to construct.

The associated design changes for Noise Barrier S are listed in **Table 4**.

Table 4: Noise Barrier S Design Changes

Report	Length (Ft.)	Wall Height Range (Min Ft. - Max Ft.)	No. of Impacted Receptors	No. of Benefited Receptors	% Impacted Receptors Achieving 5 dBA Reduction	% Impacted Receptors Achieving 8 dBA Reduction	Estimated Cost per Benefited Receptor ($)	Estimated Constr-uction Cost ($)
May 2019 FEIS	4,380	25	159	344	96	88	11,141	3,832,430
DB Team (2022) Final Design	4,189	18-25	174	319	97	88	10,954	3,494,470

Table 4 in Attachment A summarizes the results of the Noise Barrier S evaluation. Figure 1 in Attachment B illustrates the results of the Noise Barrier S evaluation. The TNM 2.5 files are located in Attachment C. The TNM 2.5 sound level outputs are included in Attachment D. The barrier height data is summarized in Attachment E. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier S is in Attachment F. A summary of the SCDOT completed public outreach/noise balloting is included in Attachment G.

3.4 Noise Barrier T Re-Evaluation

The location of Noise Barrier T was determined based on noise impacts provided in the May 2019 Detailed Noise Analysis Technical Report and as a result of the DB Team (2022) Final Design noise impacts. Noise Barrier T was analyzed to begin at station 161+95 and end at station 198+06 along the centerline of I-20. It would be located approximately 150 feet to 370 feet south of the centerline of I-20 and would be approximately 3,660 feet in length. The feasibleness and reasonableness of constructing Noise Barrier T was re-evaluated as part of this noise addendum.

Noise Barrier T was analyzed for feasibleness which resulted in 96 percent of the impacted receivers behind the barrier experiencing a reduction in sound levels of 5 dB(A) or greater. An engineering feasibility analysis was also completed by reviewing the following areas:

1. Topography – The noise barrier can be constructed without significant issues with existing or proposed grades
2. Safety – The noise barrier can be placed outside the clear zone where possible or protected by using guardrail or concrete side barrier
3. Drainage – Drainage along the barrier would need be designed to allow for positive drainage and the noise barrier placement would need to avoid ditches, pipes, and culverts
4. Utilities – There are large overhead utilities in the vicinity of the noise barrier, crossing perpendicular to I-26. Notches in the noise barrier heights, to avoid radial intrusions, would need to be considered in the final, reasonable design.
5. Maintenance – The location of the noise barrier would be inside existing SCDOT ROW
6. Access – Access to the noise barrier would need to be from I-26, not via private residences adjacent to the interstate
7. The exposed height of the noise abatement did not exceed 25 feet based on constructability constraints for this feasibility analysis

Therefore, according to the SCDOT Noise Policy, Noise Barrier T is feasible to construct.

The reasonableness analysis for Noise Barrier T included noise barrier panels that were 25 feet tall to achieve the largest number of benefited receptors and maximize the benefit at each receptor. The reasonableness analysis resulted in 46 percent of the benefited first and second row receivers achieving an 8 dB(A) reduction, which is below SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier T does not meet SCDOT's policy and is not reasonable to construct.

The associated design changes for Noise Barrier T are listed in **Table 5**.

Table 5: Noise Barrier T Design Changes

Report	Length (Ft.)	Wall Height Range (Min Ft. - Max Ft.)	No. of Impacted Receptors	No. of Benefited Receptors	% Impacted Receptors Achieving 5 dBA Reduction	% Impacted Receptors Achieving 8 dBA Reduction	Estimated Cost per Benefited Receptor ($)	Estimated Constr-uction Cost ($)
May 2019 FEIS	3,660	25	20	39	100	46	N/A	N/A
DB Team (2022) Final Design	3,660	25	24	38	96	46	N/A	N/A

Table 5 in Attachment A summarizes the results of the Noise Barrier T evaluation. Figure 1 in Attachment B illustrates the results of the Noise Barrier T evaluation. The TNM 2.5 files are in Attachment C. The TNM 2.5 sound level outputs are included in Attachment D. The barrier height data is summarized in Attachment E. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier T is in Attachment F.

3.5 Parallel Barrier Analysis

A parallel barrier analysis is recommended for all instances in which noise barriers are proposed on opposing sides of the roadway where the ratio of the distance between the noise barriers and the height of noise barrier panels is less than 10:1. Portions of proposed Noise Barrier R and S meet this criterion. The parallel barrier analysis was completed at 10 receivers across the entire length of the proposed noise barriers. The individual estimated increase behind each barrier is shown in Table 6.

Table 6: Parallel Barrier Analysis Locations

Barrier ID	Receiver Analysis	
	Receiver #	Projected Sound Level Increase dB(A)
R	R37	0.0
	R74	2.0
	R73	1.9
	R89	0.0
	R56	0.0
S	S219	0.0
	S427	0.7
	S437	0.3
	S511	1.4
	S326	0.0

The parallel barrier analysis indicates that sound levels behind Barrier R may increase due to the sound reflecting between the parallel noise barrier panels. The increase in sound levels could be up to 2.0 dBA above the sound levels with the proposed barriers in place. Because the increase is less than 3.0 dBA this degradation is barely perceptible to the human ear[1], therefore no action is to be considered regarding absorptive treatment for either of these noise barriers. The TNM exports for this analysis are included in Attachment D.

4. WHAT ARE THE CONCLUSIONS?

This addendum documents the geometric alignment changes proposed by the DB Team as design has been finalized for the I-20 at US 176 (Broad River Road) interchange. Additionally, this addendum documents the analysis and resulting changes to the design of Noise Barriers Q, R, S, and T as a result of the DB Team (2022) Final Design.

The DB Team identified an alternate interchange configuration for the I-20 at US 176 (Broad River Road) interchange. Specifically, the proposed project would construct an offset DDI which has the potential to influence sound levels at NSAs Q, R, S and T. Therefore, Noise Barriers Q, R, S and T have been re-evaluated based on the DB Team (2022) Final Design. The feasibleness and reasonableness of constructing each noise barrier was evaluated in this noise addendum.

Noise Barrier Q – Not Recommended for Construction

The feasibleness analysis for Noise Barrier Q indicates that 100 percent of the impacted receivers behind the barrier will experience a reduction in sound levels of 5 dB(A) or greater and that no topology, safety, drainage, utility, maintenance, access, or height issues will make constructing the barrier not feasible. Therefore, according to SCDOT policy, Noise Barrier Q is feasible to construct. The reasonable analysis for Noise Barrier Q included 25-foot-tall noise barrier panels and resulted in 63 percent of the benefited front row receivers achieving an 8 dB(A) reduction, which is below SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier Q does not meet SCDOT's policy and is not reasonable to construct. An updated SCDOT Feasibility and

[1] FHWA Highway Noise Barrier Design Handbook, Table 5, page 32.

Reasonableness Worksheet for Noise Barrier Q is in Attachment F. This noise addendum does not affect the outcome of the viewpoint summary that was completed in the FEIS/ROD.

Noise Barrier R – Recommended for Construction

The feasibleness analysis for Noise Barrier R indicates that 100 percent of the impacted receivers behind the barrier will experience a reduction in sound levels of 5 dB(A) or greater. and that no topology, safety, drainage, utility, maintenance, access, or height issues will make constructing the barrier not feasible. Therefore, according to SCDOT policy, Noise Barrier R is feasible to construct. The reasonable analysis for Noise Barrier R included 8 to 21-foot-tall noise barrier panels and resulted in 81 percent of the benefited front row receivers achieving an 8 dB(A) reduction, which is above SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier R meets SCDOT's policy and is reasonable to construct. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier R is in Attachment F. This noise addendum does not affect the outcome of the viewpoint summary that was completed in the FONSI.

Noise Barrier S – Recommended for Construction

The feasibleness analysis for Noise Barrier S indicates that 97 percent of the impacted receivers behind the barrier will experience a reduction in sound levels of 5 dB(A) or greater and that no topology, safety, drainage, utility, maintenance, access, or height issues will make constructing the barrier not feasible. Therefore, according to SCDOT policy, Noise Barrier S is feasible to construct. The reasonable analysis for Noise Barrier S included 18 to 25-foot-tall noise barrier panels and resulted in 88 percent of the benefited front row receivers achieving an 8 dB(A) reduction, which is above SCDOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier S meets SCDOT's policy and is reasonable to construct. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier S is in Attachment F. This noise addendum does not affect the outcome of the viewpoint summary that was completed in the FONSI.

Noise Barrier T – Not Recommended for Construction

The feasibleness analysis for Noise Barrier T indicates 96 percent of the impacted receivers behind the barrier will experience a reduction in sound levels of 5 dB(A) or greater and that no topology, safety, drainage, utility, maintenance, access, or height issues will make constructing the barrier not feasible. Therefore, according to SCDOT policy, Noise Barrier T is feasible to construct. The reasonable analysis for Noise Barrier T included 25-foot-tall noise barrier panels and resulted in 46 percent of the benefited front row receivers achieving an 8 dB(A) reduction, which is below SCOT policy of more than 80 percent of the benefited front row receivers achieving an 8 dB(A) reduction. For this reason, Noise Barrier T does not meet SCDOT's policy and is not reasonable to construct. An updated SCDOT Feasibility and Reasonableness Worksheet for Noise Barrier T is in Attachment F. This noise addendum does not affect the outcome of the viewpoint summary that was completed in the FEIS/ROD.

CAROLINA CROSSROADS

Environmental Re-evaluation #6

U.S. Department of Transportation
Federal Highway Administration

South Carolina

1835 Assembly Street, Suite 1270
Columbia, South Carolina 29201
803-765-5411

October 15, 2024

Mr. Chad Long
Director Environmental Services Office
South Carolina Department of Transportation (SCDOT)
955 Park Street, P.O. Box 191
Columbia, South Carolina 29202

Dear Mr. Long:

The Federal Highway Administration (FHWA) has received your request for approval of reevaluation six for the I-26/126/20 (Carolina Crossroads) Environmental Impact Statement (Federal Project ID P0P027662). Project modifications analyzed within the reevaluation include,

1. Rephasing of construction phases to reduce risks related to utility relocations and geotechnical considerations.
2. Design changes to be incorporated into the project: Berryhill Road at Woodland Hill Road realignment, I-126 WB to I-26 EB semi-directional ramp, Willow Creek flood mitigation area, I-20/Bush River Road interchange.
3. Right of way updates, where acquired parcels extend beyond the previous project study area (PSA).

Based on the information provided within the reevaluation, FHWA finds that the proposed modifications to the project will not introduce any new significant impacts, therefore, a Supplemental EIS is not required. We also find the Alternative Technical Concept (ATC) revisions to the I-20/Bush River Road Interchange and the ATC revision to the I-126 WB to I-26 EB movement adequate and approved. The modifications will provide for improved constructability and provide for reduced impacts for businesses in the area. The level of service (LOS) for operational movements remains the same or improves from the original design concepts and there would be no increased impacts at these locations.

Please ensure that the project commitments made during the NEPA process remain included in the project construction contract and ultimately carried out. Please address any questions to Mr. J. Shane Belcher at jeffrey.belcher@dot.gov/803-253-3187 or Mr. Tad Kitowicz at thaddeus.kitowicz@dot.gov/803-253-3882.

Sincerely,

Emily O Lawton

Emily O. Lawton

ENVIRONMENTAL RE-EVALUATION FORM

FHWA South Carolina

State File #		Fed Project #	P027662	Project ID	P027662	Route	I-20/I-26/I-126	County	Lexington and Richla

Project Name/Description

The FHWA and SCDOT propose to upgrade the I-20/26/126 corridor and reconstruct associated interchanges in Richland and Lexington Counties, South Carolina. The primary purpose of the proposed Carolina Crossroads project is to implement a transportation solution(s) that would improve mobility and enhance traffic operations by reducing existing traffic congestion within the I-20/26/126 corridor while accommodating future traffic needs.

1. DOCUMENT TYPE: ☒ EIS ☐ EA ☐ CE (non Programmatic) ☐ PCE (No FHWA Approval Required)

A. Other Actions Associated with the Project:

- ☐ Section 4(f) Evaluation
- ☒ Section 106 Compliance
- ☒ Wetland Finding/Section 404 Compliance
- ☒ T & E Species Biological Assessment
- ☐ None

2. DOCUMENT APPROVAL DATE: May 2, 2019

3. DATE(S) OF PRIOR RE-EVALUATIONS: 8/22; 10/20; 12/20; 5/23/22; 9/14/22

4. PROJECT DEVELOPMENT STAGE:

- ☐ Final Design
- ☒ ROW
- ☒ Construction
- ☐ Other, Specify

5. HAS DESIGN OR ROW CHANGED SINCE THE LAST APPROVAL?:
(if "NO" then Go To Item 7)

☒ YES ☐ NO

6. DESCRIPTION OF CURRENT PROJECT/DESIGN CHANGES:

Project changes include: 1. the rephasing of construction phases to reduce risks related to utility relocations and geotechnical considerations; 2. Design changes to be incorporated into the project: Berryhill Road at Woodland Hill Road realignment, I-126 WB to I-26 EB semi-directional ramp, Willow Creek flood mitigation area, I-20/Bush River Road interchange; 3. Right of way updates, where acquired parcels extend beyond the previous project study area (PSA).

7. HAVE THERE BEEN SIGNIFICANT CHANGES IN THE AFFECTED ENVIRONMENT OR HAVE THE ENVIRONMENTAL STUDIES BEEN UPDATED SINCE THE LAST PROJECT APPROVAL?: (If "NO" to both Items 5 and 7, Go To Item 10) ☒ YES ☐ NO

8. APPROVED DOCUMENT(S) RE-EVALUATION:

A. REVIEW OF EFFECTS: (Complete this section if "YES" to either Item 5 or Item 7)

SOCIAL ENVIRONMENT	CHANGE		REMARKS
1. Land Use	☐ YES	☒ NO	
2. Community	☐ YES	☒ NO	
3. Relocations	☐ YES	☒ NO	See attached documentation
4. Churches/Institutions	☐ YES	☒ NO	
5. Title VI/E.O. 12898	☐ YES	☒ NO	
6. Economic	☐ YES	☒ NO	
7. Controversy	☐ YES	☒ NO	
8. Other; Specify	☐ YES	☒ NO	

NATURAL ENVIRONMENT	CHANGE		REMARKS
1. Wetlands	☒ YES	☐ NO	See attached documentation
2. Water Quality	☐ YES	☒ NO	
3. Wild/Scenic Rivers	☐ YES	☒ NO	
4. Farmland	☐ YES	☒ NO	
5. T & E Species	☐ YES	☒ NO	See attached documentation
6. Floodplains	☐ YES	☒ NO	
7. Other; Specify	☐ YES	☒ NO	

PHYSICAL ENVIRONMENT	CHANGE		REMARKS
1. Noise	☒ YES	☐ NO	See attached documentation
2. Air Quality	☐ YES	☒ NO	
3. Energy/Mineral Resources	☐ YES	☒ NO	
4. Construction/Utilities	☐ YES	☒ NO	
5. UST's	☐ YES	☒ NO	
6. Hazardous Waste Sites	☐ YES	☒ NO	
7. Other; Specify	☐ YES	☒ NO	

CULTURAL ENVIRONMENT	CHANGE		REMARKS
1. Historic Sites	☐ YES	☒ NO	
2. Archaeological Resources	☐ YES	☒ NO	See attached documentation
7. Other; Specify	☐ YES	☒ NO	

PERMITS	CHANGE		REMARKS
1. U.S. Coast Guard	☐ YES	☒ NO	
2. Forest Service/USACE/USFWS Land	☐ YES	☒ NO	
3. Section 404	☐ YES	☒ NO	
4. Other; Specify	☐ YES	☒ NO	

Have the required permits been obtained? ☒ YES ☐ NO

If "YES" what is the expiration date? September 30, 2035

***If permits have expired, permits will need updated and attached to re-evaluation.**

9. NEED FOR PUBLIC INVOLVMENT:

☒ A public hearing/public information meeting was held for the project on: August 23, 2018

☒ There have been no changes in project design or environmental effects which would require a public hearing [or additional public hearing if one has already been held] or public information meeting.

☐ The change(s) in project design and/or effects require(s) an additional public hearing/public information meeting. The meeting is scheduled for:

10. FINDINGS/CONCLUSIONS:

☒ Based on the analysis contained in this re-evaluation, it has been determined that the change in project design and/or environmental effects would not significantly alter the conclusions reached in the approved environmental document and/or previous re-evaluation(s).

☐ There have been no changes in the design/ROW of this project nor have there been changes in project effects or the affected environment. Therefore, the conclusions reached in the approved environmental document and/or previous re-evaluation(s) remain valid.

Prepared By: Will McGoldrick Digitally signed by Will McGoldrick Date: 2024.10.03 08:25:03 -04'00' Date

Concurred (FHWA): EMILY OLDHAM LAWTON Digitally signed by EMILY OLDHAM LAWTON Date: 2024.10.15 13:32:09 -04'00' Date

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-01	SCDOT will work with the Central Midlands Rural Transit Authority / COMET (CMRTA/COMET) and the Central Midlands Council of Governments (CMCOG) to develop two park-and-ride lots to improve mobility during construction and mitigate congestion resulting from the project. SCDOT would construct the two sites and maintain them during construction of the project. Engineering feasibility, timing and continued maintenance of the sites would be determined in coordination with CMRTA and the CMCOG prior to the start of construction. In the event a permanent site cannot be developed, SCDOT would work with CMRTA and CMCOG to identify and provide funding for existing parking lots that could be leased for park-and-ride use during construction.	Programmatic	SCDOT has completed an evaluation to identify park and ride facilities. In coordination with FHWA a leasing option has been identified as the path forward. SCDOT is in the process of discussing the potential of leasing property from two state agencies. SCDOT met with Lexington County on Thursday, July 13 to discuss a potential leasing opportunity. Lexington County was receptive to the opportunity and requested	N/A	N/A
EC-02	SCDOT will implement a congestion management tool/commuter services application to improve mobility during construction and mitigate congestion by informing commuters of available options such as carpooling, ridesharing, vanpools and other transit oriented options.	Programmatic	SCDOT has met with the CMCOG who is in the process of developing a mobile application. SCDOT to follow up and determine when the application will be available.	N/A	N/A
EC-03	SCDOT will assist COMET/CMRTA ongoing efforts through such measures as accommodating transit (bus) stops at interchange locations, which may include bus turnout. In addition, SCDOT will work with CMRTA to monitor bus operations and capacity during construction and in the event that capacity is reached, SCDOT will provide support in determining funding for enhanced bus service during construction based upon a framework to be agreed upon with CMRTA.	Programmatic	SCDOT has met with the CMCOG and discussions are ongoing.	N/A	N/A
EC-04	Prior to final design, SCDOT will coordinate with the City of Columbia and CMCOG to ensure that existing and planned bicycle and pedestrian facilities identified in the local and regional plans and existing and proposed connections to such facilities are accommodated where located within the limits of the Carolina Crossroads project at crossing routes and interchanges where feasible.	Design	Status update to be phase specific.	Phase 1 Final design complete.	Phase 2 Final design plans are Released for Construction.
EC-05	During final construction, SCDOT will accommodate bicycle/pedestrian access. SCDOT will coordinate with the local municipalities and/ or trail groups to post information on temporary sidewalk or bicycle facility closures or detours. Sidewalk and/or bicycle lane/path closures will be communicated to the agency with jurisdiction at least 48 hours in advance and appropriate signage will be placed.	Construction	Status update to be phase specific.	Cooridnation is on-going.	Cooridnation is on-going.
EC-06	SCDOT will acquire all new right-of-way and process any relocations in compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. 4601 et seq.) and the SCDOT ROW Manual. The purpose of these regulations is to ensure that owners of real property to be acquired for federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owner, to minimize litigation and relieve congestion in the courts, and to promote public confidence in federal and federally-assisted land acquisition programs. Temporary construction easements may be needed for some properties. SCDOT will temporarily use these properties during construction and would provide compensation to the landowner for the temporary use. The property will be fully returned to the owner when the use of the property is no longer required, typically when construction is complete.	Programmatic	Phases 1 & 2 right-of-way acquisition is essentially complete with a few outstanding tracts to be acquired and Phase 3 is underway.	N/A	N/A

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-07	Changes in access for school bus routes will be discussed with the school system in advance of when they will actually take place, so that the school systems can adjust routes in a timely manner. Coordination with local school districts will also occur during construction. SCDOT and the CONTRACTOR will coordinate with the school system during development of the community outreach program.	Construction	Status update to be phase specific.	Contractor will coordinate with local school districts as necessary.	Contractor will coordinate with local school districts as necessary.
EC-08	Written translations of public involvement documents will be provided for Spanish language speaking populations, as well as other measures determined by SCDOT to ensure meaningful access to project information during construction. Efforts will be made to ensure meaningful opportunities for public participation during construction. Additional meetings will be held when warranted to address community concerns.	Construction	Status update to be phase specific.	SCDOT has implemented a translation tool on the project website for Spanish language speaking populations.	SCDOT has implemented a translation tool on the project website for Spanish language speaking populations.
EC-09	The CONTRACTOR(s), through a community outreach program, will let the community know what types of closures to expect (i.e. temporary, long-term), when to expect them and who to contact, if needed. SCDOT and the CONTRACTOR(s) will coordinate with emergency service providers such as police, fire protection and ambulance services before construction to ensure that access for emergency vehicles will be maintained.	Programmatic	Community and public relations support plan has been approved and is being implemented.	N/A	N/A
EC-10	Based on the studies thus far accomplished, SCDOT intends to install highway traffic noise abatement measures in the form of a barrier at Noise Sensitive Area (NSA) O, R and S. These preliminary indications of likely abatement measures are based upon preliminary design for a barrier cost of $35.00 per square foot that will reduce the noise level by at least 5 dB(A) for residences. A final decision of the installation of the abatement measure(s) will be made upon completion of the project's design. Since there are residences located on the opposite side of the interstate adjacent to Barriers O, the use of sound absorption materials will be assessed during final design to minimize noise reflectivity of the barriers towards receptors on the other side of the interstate. If changes are proposed to the noise wall configuration during design, the CONTRACTOR shall be responsible for revising the environmental documents (re-evaluation), updating traffic noise analysis, public involvement and construction of noise wall(s).	Design	Status update to be phase specific.	Barriers are not located within this phase.	Barriers R and S are finalized in RFC Plans.
EC-11	In order to help local officials and developers consider highway traffic noise in the vicinity of a proposed Type I project, SCDOT will inform them of the predicted future noise levels and the required distance from the roadways needed to ensure that noise levels remain below the NAC for each type of land use per 23 CFR 772.J 7. The information will be provided within three months of the Record of Decision (ROD) publication.	Programmatic	SCDOT has complied.	N/A	N/A

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-12	During construction, powered construction equipment will not be operated during the traditional evening and/or sleeping hours within 150 feet of a noise-sensitive site, to be decided either by local ordinances and/or agreement with SCDOT.	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.
EC-13	The CONTRACTOR(s) will be required to minimize possible water quality impacts through implementation of BMPs, reflecting policies contained in 23 CFR 650B and SCDOT's Supplemental Specification on Erosion Control Measures (latest edition) and Supplemental Technical Specifications on Seeding (latest edition). Other measures including seeding, silt fences, sediment basins, etc. as appropriate will be implemented during construction to minimize impacts to water quality.	Construction	Status update to be phase specific.	Environmental compliance inspections are on-going. Phase 1 Final design plans have been completed.	Environmental compliance inspections are on-going. Phase 2 Final design plans have been completed.
EC-14	Stormwater modeling will be completed for the final design of the Project. Stormwater runoff would be mitigated by discharging stormwater into appropriately designed BMP's before being released into receiving waters. During construction, the CONTRACTOR(s) will identify and avoid all point sources of fecal coliform as identified in Chapter 3, Section 3.6 of the FEIS.	Construction	Status update to be phase specific.	NOI approved by DHEC	NOI approved by DHEC.
EC-15	A Section 401 State Water Quality Certification will be required for the overall project. SCDOT is responsible for obtaining the certification as part of the Joint 404/401 permit application process.	Programmatic	Initial 401 water quality certification has been obtained.	N/A	N/A
EC-16	The CONTRACTOR(s) is responsible for development of a project specific SWPPP and for obtaining a Section 402 NPDES permit for the project prior to initiating land disturbing activities.	Construction	Status update to be phase specific.	Compliance inspection have been initiated and are ongoing. NOI nearing DHEC approval.	Contractor shall comply. NOI approved by DHEC.
EC-17	A State Navigable Waters permit will be required for construction over any navigable waterways (i.e., the Saluda River). The CONTRACTOR will be responsible for obtaining this permit.	Construction	Status update to be phase specific.	Permit has been obtained.	Permit has been obtained.
EC-18	Impacts to jurisdictional waters will be permitted under a Department of the Army Section 404 permit from the U.S. Army Corps of Engineers (USACE). Based on preliminary design, it is anticipated that the proposed project will be permitted under an Individual USACE Permit (IP). SCDOT will provide the USACE with information regarding any proposed activities during the Section 404 permitting process. One permit would be obtained for the overall project. The required mitigation for this project will be provided through a Permittee Responsible Mitigation (PRM) site, developed in consultation with the USACE and other resource agencies.	Construction	Status update to be phase specific.	Permit mods for Ph 1 approved.	Permit mod for Ph 2 approved.
EC-19	Detailed hydraulic and hydrologic studies for each bridge crossing will be performed to determine the correct sizing of bridges and culverts. The project will be designed to be consistent with local floodplain development plans. Prior to construction activity in the area, coordination with Dominion Energy and Federal Energy Regulatory Commission (FERC) will be required for the Lower Saluda River floodway crossings due to its function as part of a hydroelectric facility.	Design	Status update to be phase specific.	Phase 1 Final design complete.	Phase 2 Final design plans are Released for Construction.
EC-20	The project will be designed in an effort to meet "No-Rise" requirements. In the event a "No-Rise" condition cannot be achieved, coordination with FEMA will require the preparation of a CLOMR (Conditional Letter of Map Revision) / LOMR (Letter of Map Revision) package for the encroachment. Where regulatory floodplains are defined, hydraulic structures will be designed to accommodate a 100 year (1% annual chance) flood. Where no regulatory floodplains are defined, culverts and bridges will be designed to accommodate a 50-year or greater magnitude flood event. Ongoing design efforts to minimize floodplain impacts will be coordinated with resource and regulatory agencies during the final design process.	Design	Status update to be phase specific.	Phase 1 Final design complete.	Phase 2 Final design plans are Released for Construction.
EC-21	Prior to construction, the selected CONTRACTOR(s) will send a set of final plans and request for floodplain management compliance to the local County Floodplain Administrator.	Design	Status update to be phase specific.	Phase 1 Final design complete.	Phase 2 Final design plans are Released for Construction.
EC-22	No substantial impacts to floodplain values are anticipated from the proposed project. If conditions change based on final design, additional measures will be evaluated to restore lost floodplain values.	Design	Status update to be phase specific.	Phase 1 Final design complete.	Phase 2 Final design plans are Released for Construction.

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-23	To mitigate for natural upland forested habitats, lost as a result of the project, SCDOT will plant trees (native species), as defined by the final design plans, within the rights-of-way adjacent to new or improved interchanges and roadways outside of required clear safety zones. Impacts to areas providing significant wildlife habitat, such as river floodplains and other large riparian buffers, will be minimized to the extent practicable through avoidance and minimization design measures such as the use of appropriate BMP's. Construction activities will be conducted within the disturbed footprint of the existing roadway and utility right-of-way to the maximum extent practicable.	Programmatic	(blank)	N/A	N/A
EC-24	To mitigate the temporary impacts to the Saluda Riverwalk Extension, SCDOT will notify the City of Columbia Parks and Recreation Department at least 48 hours in advance as to when the trail will be temporarily closed. SCDOT will also work closely with the Parks and Recreation Department to communicate the closing to trail users during construction. When construction is complete, the condition of the trail will be equal to existing conditions.	Construction	Status update to be phase specific.	Cooridination is on-going with the City of Columbia as needed relative to the Saluda Riverwalk.	N/A for Phase 2.
EC-25	Prior to construction, the project CONTRACTOR will perform Phase II ESAs on the properties identified within the footprint, including the subject properties, and/or on the adjoining properties or the ROW. Ultimately, the Phase II ESAs will include environmental sample collection (e.g. soil, soil gas, and groundwater), specifically, in areas where a potential for disturbance of soil and/or groundwater exists. Asbestos Containing Material (ACM) and/or Lead Based Paint (LBP) testing will be assessed separately. Materials containing asbestos and lead-based paints will be managed and disposed of properly at an appropriate permitted facility to minimize impacts during the construction and cleanup. Activities will be monitored by a professional that is certified in the removal, handling and disposal of lead-based paint and/or asbestos-containing materials.	Programmatic	SCDOT has completed some of the identified Phase II ESAs.	N/A	N/A
EC-26	A spill prevention, control, and countermeasures (SPCC) plan will be prepared in accordance with 40 CFR 112, for the handling of oils or oil-based products during construction to prevent a discharge of oil into navigable waters.	Design	Status update to be phase specific.	SPCC is currently being implemented.and it will be monitored during construction.	Contractor has submitted the SPCC and it will be monitored during construction.
EC-27	A hazardous waste management plan will be prepared for the handling of hazardous materials during construction, and an on-site health and safety plan will be developed for construction activities to protect human health (i.e. workers, residents, recreation and trespassers) and the environment within/proximate to the site. The hazardous waste management plan will also state that disposal of waste materials will be disposed of in approved landfills.	Construction	Status update to be phase specific.	Contractor has submitted a project specific hazardous waste management plan which is currently in place.	Contractor has submitted a project specific hazardous waste management plan which is currently in place.

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-28	If avoidance of hazardous materials is not a viable alternative and soils that appear to be contaminated are encountered during construction, the South Carolina Department of Health and Environmental Control (SCDHEC) will be informed immediately. Hazardous materials will be tested and removed and/or treated in accordance with the United States Environmental Protection Agency and the SCDHEC requirements, if necessary. SCDHEC Hazardous Waste Treatment, Storage, and Disposal compliance staff can be contacted at 803-898-0290.	Construction	Status update to be phase specific.	When encountered during construction, hazardous materials will be tested and removed and/or treated in accordance with the United States Environmental Protection Agency and the SCDHEC	Should hazardous materials be encountered the will be properly disposed of according to the site specific hazardous waste management plan and this commitment.
EC-29	During the construction phase of the project, the CONTRACTOR and subCONTRACTORs must notify their workers to watch for the presence of any prehistoric or historic remains, including but not limited to arrowheads, pottery, ceramics, flakes, bones, graves, gravestones, or brick concentrations. If any such remains are encountered, the Construction Manager for Mega Projects would be immediately notified and all work in the vicinity of the discovered materials and site work shall cease until the SCDOT Chief Archaeologist directs otherwise. SCDOT Chief Archaeologist, Tracy Martin, can be contacted at 803-737-6371	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly. Minor clearing has been conducted.	Contractor and subcontractors shall comply.
EC-30	An archaeological professional will be present during any ground disturbing activities related to Site 38LX212 and 38RD59. Additionally, sites 38RD140, 38RD1175, and 38RD1176 will be protected from indirect effects, including borrow sites and equipment staging. Sites will be clearly marked in the field using orange construction fencing prior to beginning construction activities in the vicinity of the resources.	Construction	Status update to be phase specific.	A reminder was sent to archaeologies about ground disturbance activities near Saluda Canal (site 38RD59)	N/A for Phase 2
EC-31	The Saluda Canal (Site 38RD59) would be clearly plotted on all construction plans. SCDOT has reduced ROW widths in the vicinity of the canal to avoid impacts to the canal during construction & any future maintenance activities along the ROW. A 25-foot buffer will be maintained around the canal for the majority of the resource. This zone would be clearly marked in the field using orange fencing during construction, and all ground disturbance and construction staging activities would be conducted outside of this buffer in order to avoid all possible impacts to the resource. SCDOT proposes to revise the commitment of a 25-foot buffer for a distance of approximately 700 feet along the proposed ramp to allow room for temporary construction access & equipment near I-26 Ramp C. To protect the boundary of the canal at this location, the following will be added to the contract as commitments: •Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage. •Prior to construction activities silt fencing will be installed along the edge of SCDOT right of way to prevent runoff. •For areas along the identified Saluda Canal located along the I-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the right of way but grubbing will be limited to within a distance of 5-feet inside of the right of way. Grubbing activities within the 5-foot buffer will require approval from SCDOT prior to occurring. •During land clearing activities prior to construction, an archaeologist will be present at all times to ensure that these activities undertaken close to the fencing do not damage the canal. •During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO. •As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCDOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.	Construction	Status update to be phase specific.	Canal plotted on plans and orange fencing has been installed.	N/A for Phase 2

EC ID	Description	Category	Status	Phase 1 Updates	Phase 2 Updates
EC-32	The CONTRACTOR(s) will ensure that all construction equipment is properly tuned and maintained. Idling time will be minimized to save fuel and emissions.	Construction	Status update to be phase specific.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.	Discussion will occur in pre-activity meeting with the Contractor and documented accordingly.
EC-33	Water will be applied to control dust as needed to prevent dust impacts off site. There will be no open burning of removed vegetation. Vegetation will be chipped or delivered to waste energy facilities.	Construction	Status update to be phase specific.	Water will be applied as necessary to control dust.	Water will be applied as necessary to control dust.
EC-34	The federal Migratory Bird Treaty Act, 16 USC § 703-711, states that it is unlawful to pursue, hunt, take, capture or kill; attempt to take, capture or kill; possess, offer to or sell, barter, purchase, deliver or cause to be shipped, exported, imported, transported, carried or received any migratory bird, part, nest, egg or product, manufactured or not. The South Carolina Department of Transportation (SCDOT) will comply with the Migratory Bird Treaty Act of 1918 in regard to the avoidance of taking of individual migratory birds and the destruction of their active nests. The CONTRACTOR will notify the Construction Manager for Mega Projects at least four (4)weeks prior to construction/demolition/maintenance of bridges and box culverts. The Construction Manager for Mega Projects will coordinate with SCDOT Environmental Services Office (ESO), Compliance Division, to determine if there are any active birds using the structure. SCDOT will be responsible for the removal/management of any active bird nests.	Construction	Status update to be phase specific.	Surveys were conducted on Ramps C and D prior to maintenance/rehab activities.	Prior to construction activities on bridges and culverts, ESO is notified.
EC-35	Potential borrow areas to be used for fill dirt for the project will be field reviewed and assessed for the presence of any jurisdictional features, and BMPs will be applied prior to disturbance to avoid and/or minimize erosion and runoff of sediments.	Construction	Status update to be phase specific.	Contractor shall comply.	Contractor shall comply.
EC-36	Construction operations will be scheduled for off-peak traffic hours when reasonable/feasible.	Construction	Status update to be phase specific.	Project specific traffic management plan has been submitted and is being monitored.	Project specific traffic management plan has been submitted.
EC-37	A traffic maintenance plan will be developed prior to construction initiation to minimize interference to traffic flow from construction equipment and activities.	Design	Status update to be phase specific.	Contractor has submitted a conceptual traffic maintenance plan and it is being monitored during construction.	Contractor has submitted a conceptual traffic maintenance plan and it is being monitored during construction.
EC-38	After SCDOT acquisition, wetland delineations will be performed on Parcels 270, 187 and 316; archaeological investigations will be conducted on Parcels 187 and 316.	Programmatic	SCDOT has complied.	N/A	N/A

Introduction

The Federal Highway Administration (FHWA) and South Carolina Department of Transportation (SCDOT) propose to implement various strategies that will improve the mobility and enhance traffic operations within the I-20/26/126 corridors in Richland and Lexington Counties, South Carolina. The proposed project, Carolina Crossroads (CCR), will ultimately increase roadway capacity throughout the corridor and improve operations by reconstructing or improving the following interchanges: the I-20 and I-26 system to system interchange, I-26 at Broad River Road (Exit 101), I-26 at Lake Murray Boulevard (Exit 102), I-26 at Harbison Boulevard (Exit 103), I-25 at Piney Grove Road (Exit 104), I-26 at St. Andrews Road (Exit 106), I-26 at Bush River Road, I-26 at I-126, I-126 at Colonial Life Boulevard, I-20 at Broad River Road (Exit 65) and I-20 at Bush River Road (Exit 63).

FHWA approved a Final Environmental Impact Statement (FEIS) and Record of Decisions (ROD) for the Carolina Crossroads Project on May 2, 2019. Since that time, the project has progressed to construction of Phases 1 and 2 through the design-build process. Five re-evaluations have been approved for the project since the FEIS/ROD which have included design changes as design has progressed, design revisions based on the design-build process (Phases 1 and 2), and changes to right of way and parcel acquisitions based on right of way negotiations.

SCDOT is continuing to administer the project through multiple phases. The phases of construction are proposed to overlap or be performed consecutively with little or no time between phases.

This re-evaluation will address three types of project updates for the CCR project:

1. Re-phasing of the project construction
2. Design changes to be incorporated into the project
3. Right of way updates

These changes have led SCDOT to re-evaluate the environmental impacts documented in the FEIS/ROD and subsequent re-evaluations.

None of the proposed changes to project execution/construction and/or design changes would affect the ability of the CCR project to meet the purpose and need of the project as documented in the FEIS/ROD.

In addition to these updates, in re-evaluation #5, the contractor's proposed final design for Noise Barriers R and S reflected configuration changes from the originally proposed walls (refer to Table 3, Noise Barrier R Design Changes and Table 4: Noise Barrier S Design Changes in Re-eval 5 Noise Addendum dated June 16, 2022). In the Record of Decision, the use of absorptive material was originally recommended on Barriers O & S due to the potential reflections from the noise walls to unshielded receptors located on the other side of the highway. In the case of Barrier S, the original study did not recommend Barrier R, so those receptors would have been unshielded. Noise modeling was not completed to demonstrate the need for absorption; however, absorptive material was originally included as a precaution since there were unshielded receptors located across the highway. Per commitments, both walls were modeled based on the final proposed roadway design and documented in a traffic noise analysis. Portions of proposed Noise Barriers R and S run on opposing sides of the interstate where the ratio of the distance between the barriers and the height of the barrier panels is less than 10:1 (refer to Table 6: Parallel Barrier Analysis

Locations in Re-eval 5 Noise Addendum dated June 16, 2022). A parallel barrier analysis was completed at 10 receivers across the entire length of Noise Barriers R and S. The parallel barrier analysis indicated that sound levels behind Noise Barrier R may increase due to the sound reflecting between the parallel noise barrier panels. The increase in sound levels could be up to 2.0 dBA above the sound levels with the proposed barriers in place. Per guidance in the *FHWA Noise Barrier Design Handbook*, because the increase is less than 3.0 dBA this degradation is barely perceptible to the human ear. Therefore, sound absorptive material is not required to be added or included as part of Noise Barriers R and S.

These proposed changes to the barrier design resulted in additional benefited receptors and both barriers remained reasonable and feasible. Therefore, this updated design was approved as part of re-eval 5, signed November 14, 2022.

To provide additional clarification regarding the barrier designs proposed in the conclusion of the final noise analysis, SCDOT proposes the following revision to the environmental commitment EC 10:

SCDOT will install highway traffic noise abatement measures in the form of noise barriers at Noise Sensitive Areas (NSA) O, R and S. Since there are residences located on the opposite side of the interstate adjacent to Barrier O, the use of sound absorption materials will be assessed and analyzed during final design to minimize noise reflectivity of the barriers towards receptors on the other side of the interstate. If changes are proposed to the noise wall configuration during design, the CONTRACTOR shall be responsible for revising the environmental documents (re-evaluation), updating traffic noise analysis, public involvement and construction of noise wall(s).

1. Re-phasing of project construction

SCDOT has developed additional phases of work to continue the development and construction of the CCR project. The new phasing plan was developed to reduce project risk related primarily to complex utility relocations and geotechnical conditions discovered during the construction of Phases 1 and 2. The original Phase 3, which included the I-20 / I-26 system to system interchange has been divided into additional phases so that construction can continue as risks are minimized.

New phasing details and schedule are reflected in Figure 1, which includes:

- Phase 3A – Utility and Frontage Road Relocation
- Phase 3B – Clearing and Grubbing
- Phase 3C – I-20 Widening
- Phase 3D – I-26/ I-126 Improvements
- Phase 3E – I-20/I-26 System to System Interchange

Figure 1. CCR Updated Project Phasing

2. Design changes to be incorporated into the project

During detailed design and constructability reviews, the development of right of way plans, and right of way acquisition for construction of Phases 1 and 2 of the Carolina Crossroads Project, several design changes have been proposed to the Refined Recommended Preferred Alternative (RRPA) described in the FEIS/ROD. These changes are described below.

As a result of these changes, SCDOT has re-evaluated the social, environmental and economic impacts documented in the FEIS/ROD.

A. I-20 / Bush River Road Interchange

The RRPA originally proposed a diverging diamond design at the I-20 / Bush River Road interchange with an overpass across I-20 connecting Berryhill Road to Rockland Road. In efforts to improve constructability and minimize impacts to surrounding businesses, an alternative design was considered. The revised design would maintain the existing partial cloverleaf (parclo) configuration (No-build alternative in the EIS), and make improvements to ramps, intersections, and turn-lane storage thereby improving traffic operations and efficiency (Figure 2).

The revised design is within the previous project study area (PSA) and right-of-way has already been acquired. As a result of these design changes, there would be no change in impacts at this location. No other studies documented in the FEIS/ROD required updating as a result of this design change.

Traffic analyses for this design changes through a design year of 2040 were conducted during the Design-Build procurement phase; the study was reviewed by FHWA for SO&E (Safety, Operations and Engineering) approval, which was issued by FHWA Executive Director.

For this interchange, the level of service (LOS) for operational movements remains the same or improves from the original RPA concept. See LOS comparison at the I-20 / Bush River Road interchange summarized in the table below:

Table 1: Bush River Road Interchange at I-20 LOS Comparison

	RPA Design		**Parclo design**	
	AM Peak LOS	PM Peak LOS	AM Peak LOS	PM Peak LOS
I-20/Bush River Rd Merge LOS	B	F	B	D
I-20/Bush River Rd Diverge LOS	A	A	A	A

Please see Appendix C: FHWA SO&E Approvals for I-20 / Bush River for copies of FHWA approval and Appendix D: MSA Traffic Technical Report.

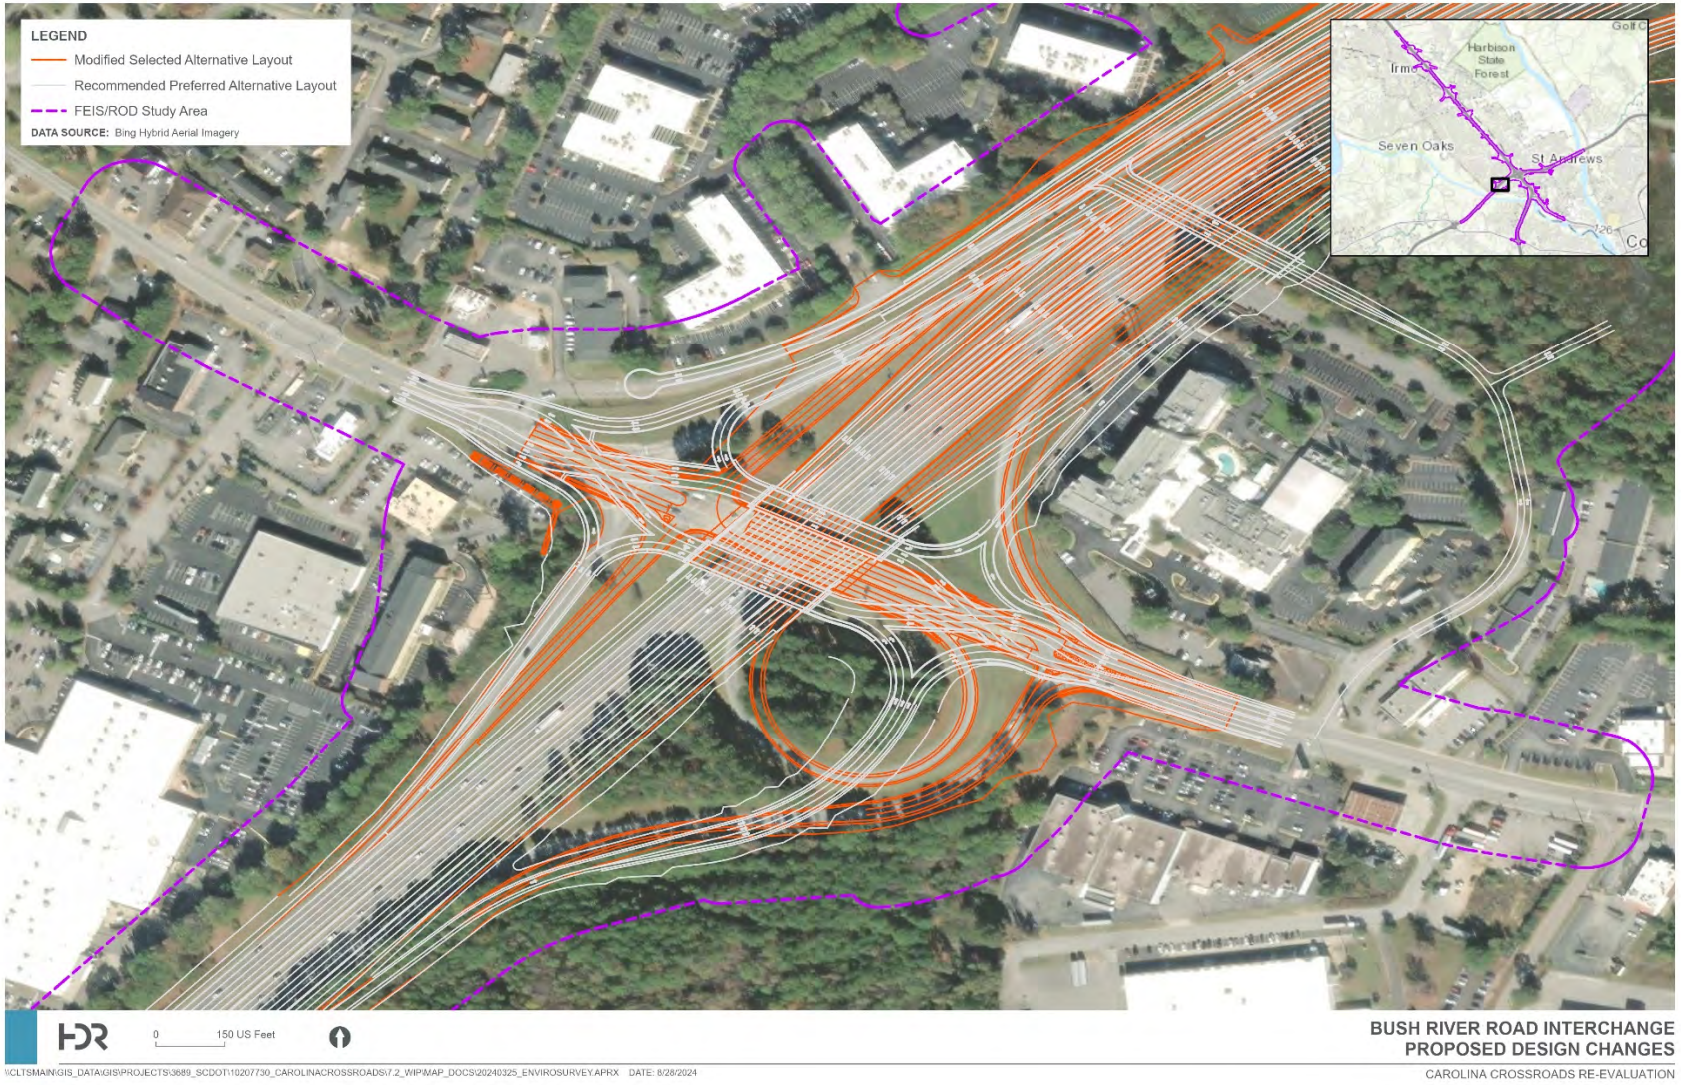

Figure 2. I-20 / Bush River Road Interchange

B. Berryhill Road Realignment

The RRPA did not make any adjustments to the alignment of Berryhill Road. An alternative design was developed which realigned Berryhill Road for approximately 750 feet through vacant parcels to its intersection with Woodland Hill Road. The realignment would relocate the existing intersection 350 feet further away from the Woodland Hill Road and St. Andrews Road intersection thereby increasing the intersection spacing by simplifying movements at the two intersections which also improves safety. In addition, the relocated Stoops Creek crossing will accommodate a bridge crossing and provide more room for utility relocations. (Figure 3).

All areas within the FEIS/ROD study have been surveyed and impacts have been assessed in the ROD and/or previous re-evaluations. Relocations in the vicinity of Berryhill Road, including the Red Roof Inn, were previously documented and this proposed realignment would not cause any additional relocations.

The re-alignment of Berryhill Rd would impact three parcels outside of the FIES/ROD PSA including Parcels 632, 633 and 634 (see Figure 3). The alignment crosses the southernmost boundary of Parcel 632 across a paved, parking lot behind the restaurant building. The alignment also crosses the northernmost boundary of Parcel 633 across a previously excavated, wooded area. Curb and drainage improvements along Woodland Hills Road could impact a minor amount of Parcel 634 along its western boundary; final amount of impacts would be dependent on the design proposed under Phase 3A.

Since these improvements/changes extend outside of the FEIS/ROD PSA, SCDOT has re-evaluated the social, environmental and economic impacts documented in the FEIS/ROD. Areas outside of the PSA (Parcels 632, 633 and 634) were surveyed for cultural resources, jurisdictional features (streams and wetlands) and threatened and endangered species (T&E) habitat. Field surveys identified no cultural resources, jurisdictional features or T&E habitat in the area of these proposed design changes.

In addition, the realignment of Berryhill Road from the FEIS alignment reduces the distance of the roadway to nearby residential receptors within noise sensitive areas (NSA) K to less than half of its original distance, so noise levels at those receptors were reanalyzed in TNM.

In the detailed noise analysis for the FEIS, the primary source of noise in the area was I-26 and therefore, traffic was not modeled on Berryhill Road. For the updated noise analysis, traffic was included along Berryhill Road to address the realignment of the road closer to the receptors. Despite modeling traffic on Berryhill Road in TNM and its realignment closer to the receptors, sound levels remained essentially the same, with a maximum increase of 0.1 dBA and a maximum decrease of 0.3 dBA. This is because of increased shielding of noise from the mainline by the profile of the realignment. This effect is generally greater than the noise from the added traffic, resulting in an overall decrease in noise levels. See attached Noise memo in Appendix A.

No new noise impacts are predicted as part of this change; therefore, no mitigation analysis is required.

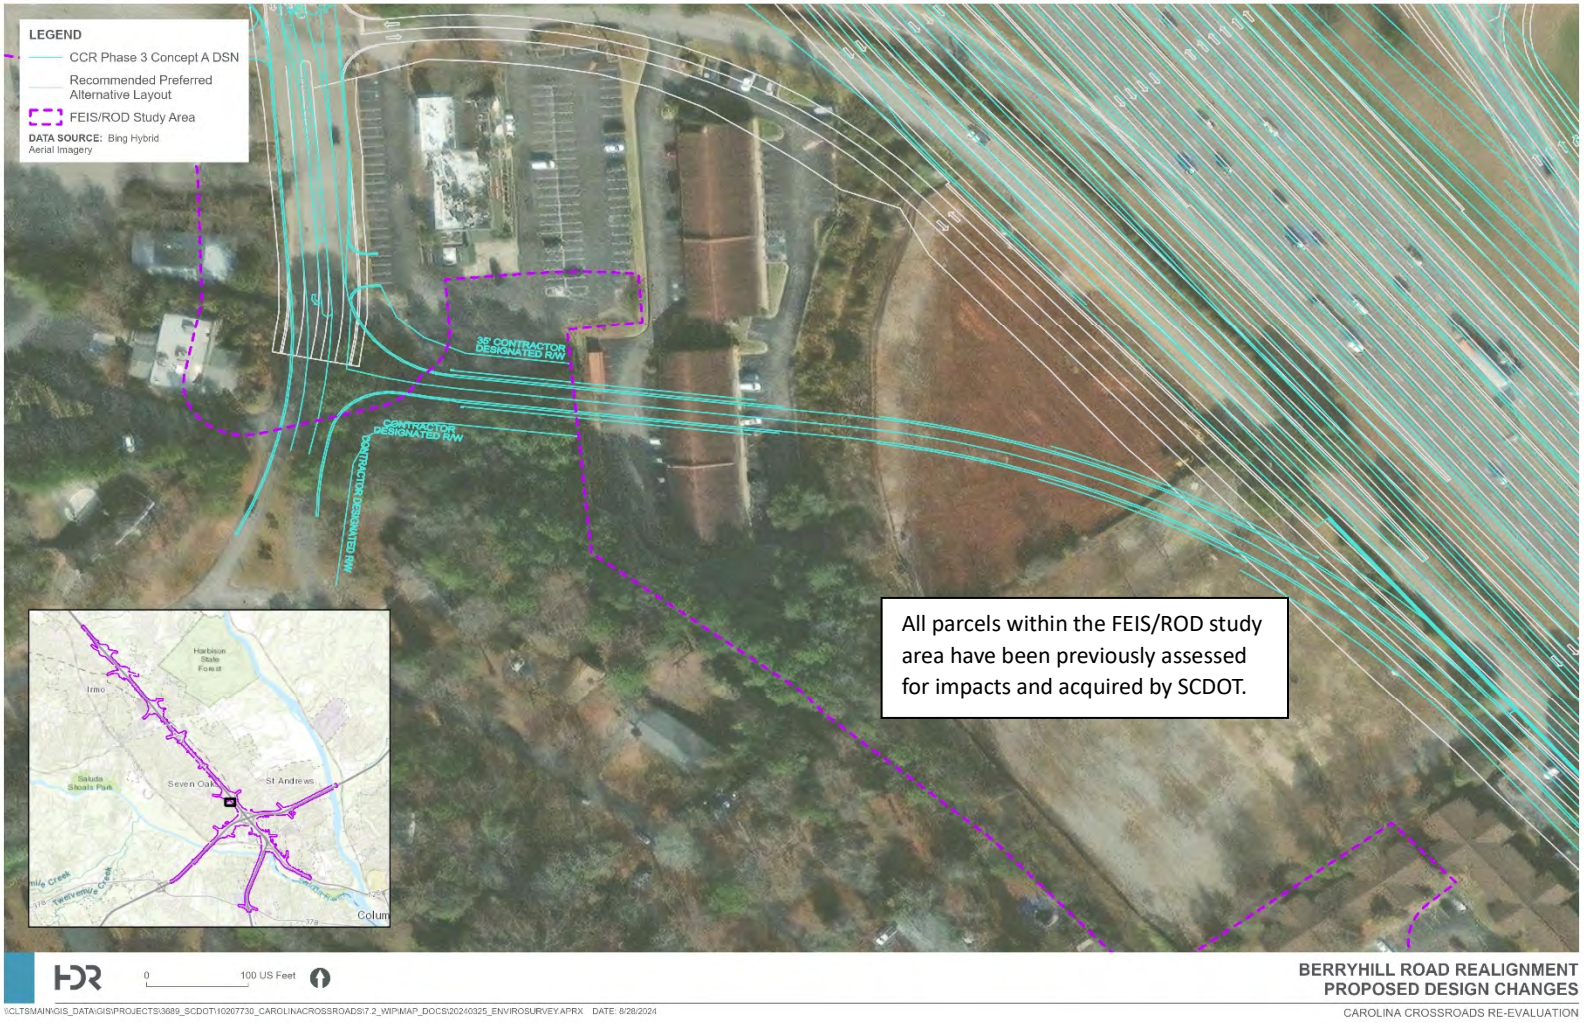

Figure 3. Berryhill Road Realignment

Parcel 632

The area outside of the PSA is located in a parking lot associated with the Tokyo Buffet restaurant along Woodland Hills Road, approximately 260 feet south of the intersection of Woodland Hills Road and Berryhill Road. The portion of the parcel observed during the field visit is approximately 0.43 acres and consists of an asphalt parking lot. The proposed right of way for the alignment would cross the southernmost portion of the parking lot. No shovel tests were excavated at Parcel 632, and no further survey is recommended at this location. No wetlands or streams were observed within this parcel. Figure 4 presents a street view of Parcel 632. Figure 5 presents a plan of Parcels 632, 633, and 634, which are contiguous but distinct.

Figure 4. Parcel 632, facing east (from Google Earth, April 10, 2024)

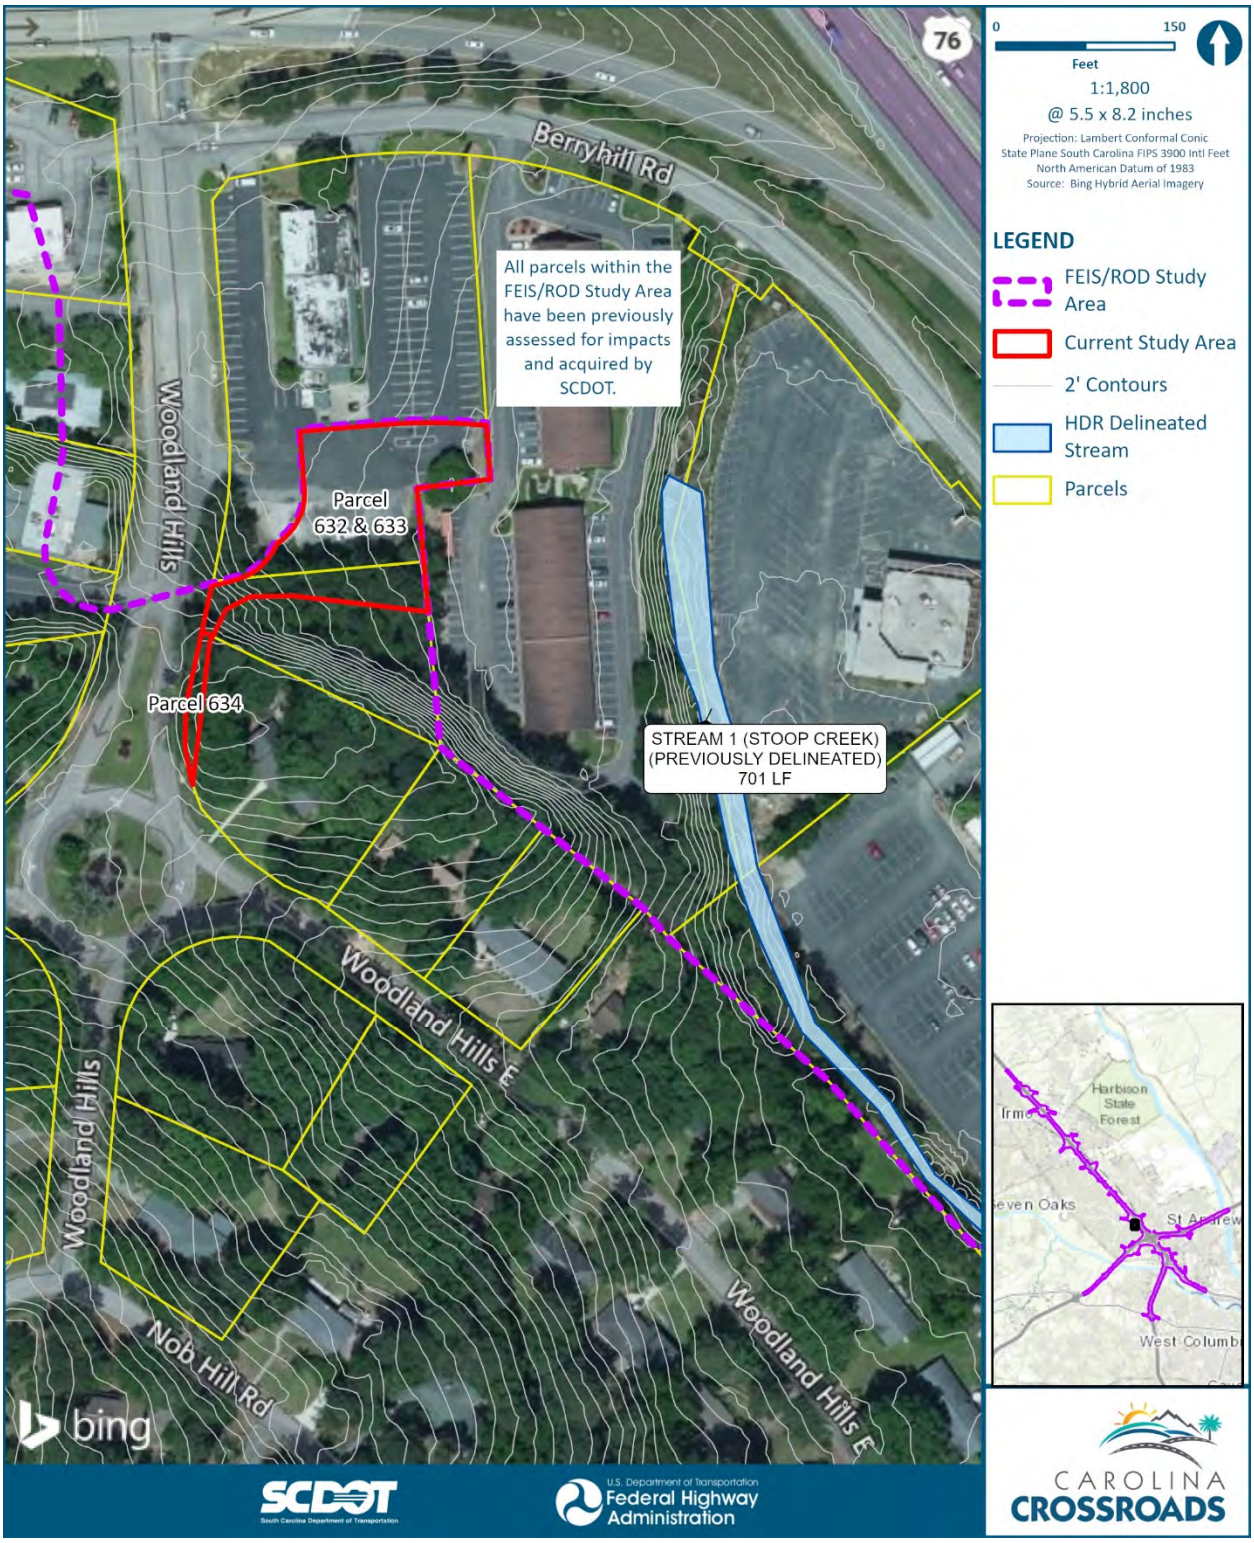

Figure 5. Parcels 632, 633, and 634

Parcel 633

The area outside of the PSA is in a wooded area along Woodland Hills Road, approximately 370 feet south of the intersection of Woodland Hills Road and Berryhill Road (refer to Figure 5). The area is approximately 0.42 acres and consists of a wooded pine and mixed hardwood forest. The area appears to have been excavated/leveled to allow for commercial development of the area. The right of way for the proposed alignment would cross the northern most portion of this parcel. No shovel tests were excavated at Parcel 633, and no further survey is recommended at this location. No wetlands or streams were observed within this parcel. Figure 6 presents a view of Parcel 633.

Figure 6. View of Parcel 633, facing southeast

Parcel 634

The area investigated is located at the intersection of Woodland Hills Road and Woodland Hills Road East (refer to Figure 5). The area is approximately 0.06 acres and consists of a landscaped yard of a single-family residence. Curb and drainage improvements could affect the western most portion of this parcel; however, final impacts at this location will be determined when design is completed for Phase 3A. No shovel tests were excavated at Parcel 634, and no further survey is recommended at this location. No wetlands or streams were observed within this parcel. Figure 7 presents a view of Parcel 634.

Figure 7. View of Parcel 634, facing south

C. I-126/I-26 System to System Interchange: Semi-Directional Ramp

The RRPA proposed a new flyover ramp to connect I-126 Westbound (WB) to I-26 Eastbound (EB). An alternative design, a semi-directional ramp was developed at this location, which shortens the length of the bridge by approximately 1,500 feet. In addition, the semi-directional ramp eliminates a heavily skewed span over the CSX railroad and eliminates a bridge over the Saluda River (Figure 8).

Although this design change is within the previously defined PSA and proposed right of way assessed in the FEIS/ROD, the new ramp alignment will shift the I-126 WB to I-26 EB alignment towards the Lexington Green Condominiums within NSA V. Noise modeling was performed to reflect these changes in the design. The proposed design reduced the number of impacted receptors from 21 to 11. An updated barrier analysis was conducted to evaluate the need for a noise barrier for these impacts, but the barrier was found to be not feasible as it could not achieve a minimum 5 dBA reduction for 75% of the impacted receptors. This is consistent with the NSA V barrier analysis for the original RRPA design, which was also found to be not feasible. See Noise Summary in Appendix B.

No other studies documented in the FEIS/ROD required updating as a result of this design change. No change of impacts presented in the FEIS/ROD are anticipated at this location.

Traffic analyses for this design change through a design year of 2040 were conducted during the Design-Build procurement phase; the study was reviewed by FHWA for SO&E (Safety, Operations and Engineering) approval, which was issued by FHWA Executive Director.

Ramp level of service (LOS) anticipated for the proposed design is the same in the original RPA concept. See LOS comparison at the I-126 / I-26 EB interchange summarized in the table below:

Table 2: I-126 WB to I-26 EB Ramp LOS Comparison

	RPA Design		**Proposed Semi-directional design**	
	AM Peak LOS	PM Peak LOS	AM Peak LOS	PM Peak LOS
I-126 WB Exit to I-26 EB	B	C	A	C

Please see Appendix C: FHWA SO&E Approvals for the I-126 / I-26 ramp for copies of FHWA approval.

Figure 8: I-126 Semi-directional Ramp

D. Willow Creek flood improvement

This 20-acre property is the site of a demolished apartment complex (Parcels 150 and 153) is anticipated to be a new right of way acquisition. SCDOT will explore the use of the property to provide floodplain storage capacity along Stoop Creek to minimize potential changes in flow conditions and water elevations as the result of the proposed project. SCDOT is performing a detailed hydraulic analysis of Stoop Creek and evaluating alternatives to retain the existing culvert structures at I-26 and I-20 reducing construction costs and traffic impacts during construction.

This proposed improvement would extend outside of the FEIS/ROD PSA and SCDOT has re-evaluated the social, environmental, and economic impacts documented in the FEIS/ROD. Areas outside of the PSA were surveyed for cultural resources, jurisdictional features (streams and wetlands) and T&E habitat.

Parcels 150 & 153

The areas outside of the PSA are located within a former multifamily housing development that was demolished and now lies barren, covered in asphalt and concrete with only small patches of trees along its edges, to the east of the former AirTime Climate Control, LLC along Fernandina Road, approximately 415 feet northwest of the intersection of St Andrews Road and Fernandina Road (see Figure 9). The area outside of the PSA is approximately 19.7 acres (Parcel 150 ~ 10.28 acres and Parcel 153 ~ 9.44 acres). The unpaved portion consists of graded uplands. No shovel tests were excavated at Parcels 150 and 153, and no further survey is recommended at these locations. Figures 10 and 11 present views of Parcels 150 and 153.

One stream (Stream 1, Stoop Creek) transects both Parcel 150 and Parcel 153 (approximately 1,259 linear feet) and flows north to south. Stoop Creek is a perennial stream with a bank height of between 8 and 10 feet and a bank full width of approximately 20 feet.

An additional perennial stream, Stream 2, was observed on the northern portion of Parcel 150 (approximately 92.6 linear feet) and flows from west to east. The stream was identified as a perennial stream with a bank height of between 3 and 8 feet and a bank full width of approximately 16 to 20 feet.

One ephemeral channel (Stream 3) was observed in the central portion of Parcel 153 (approximately 24.7 linear feet). The ephemeral channel was observed to be hydrologically connected to Stream 1 (Stoop Creek). The stream was identified as an ephemeral channel with a bank height of between 6 inches and 1 foot and a bank full width of approximately 1 foot. This ephemeral channel was observed conveying stormwater runoff during large rain events.

Marginal wetland areas have started emerging within the former paved parking areas and other impervious areas in portions of Parcels 150 and 153 due to stormwater runoff, resulting in pooling and the growth of vegetation typically found in wetland environments. These areas were observed after a large rain event. Although these areas exhibit wetland vegetation and hydric soil indicators, upon observation, they do not meet the hydrology standards set by the US Army Corps of Engineers (USACE) to classify them as potentially jurisdictional waters.

As currently proposed, the project would not impact wetlands or streams on this parcel; however, if an alternate design is proposed that did impact wetlands or streams at this location, those impacts would be documented in a re-evaluation and USACE IP modification.

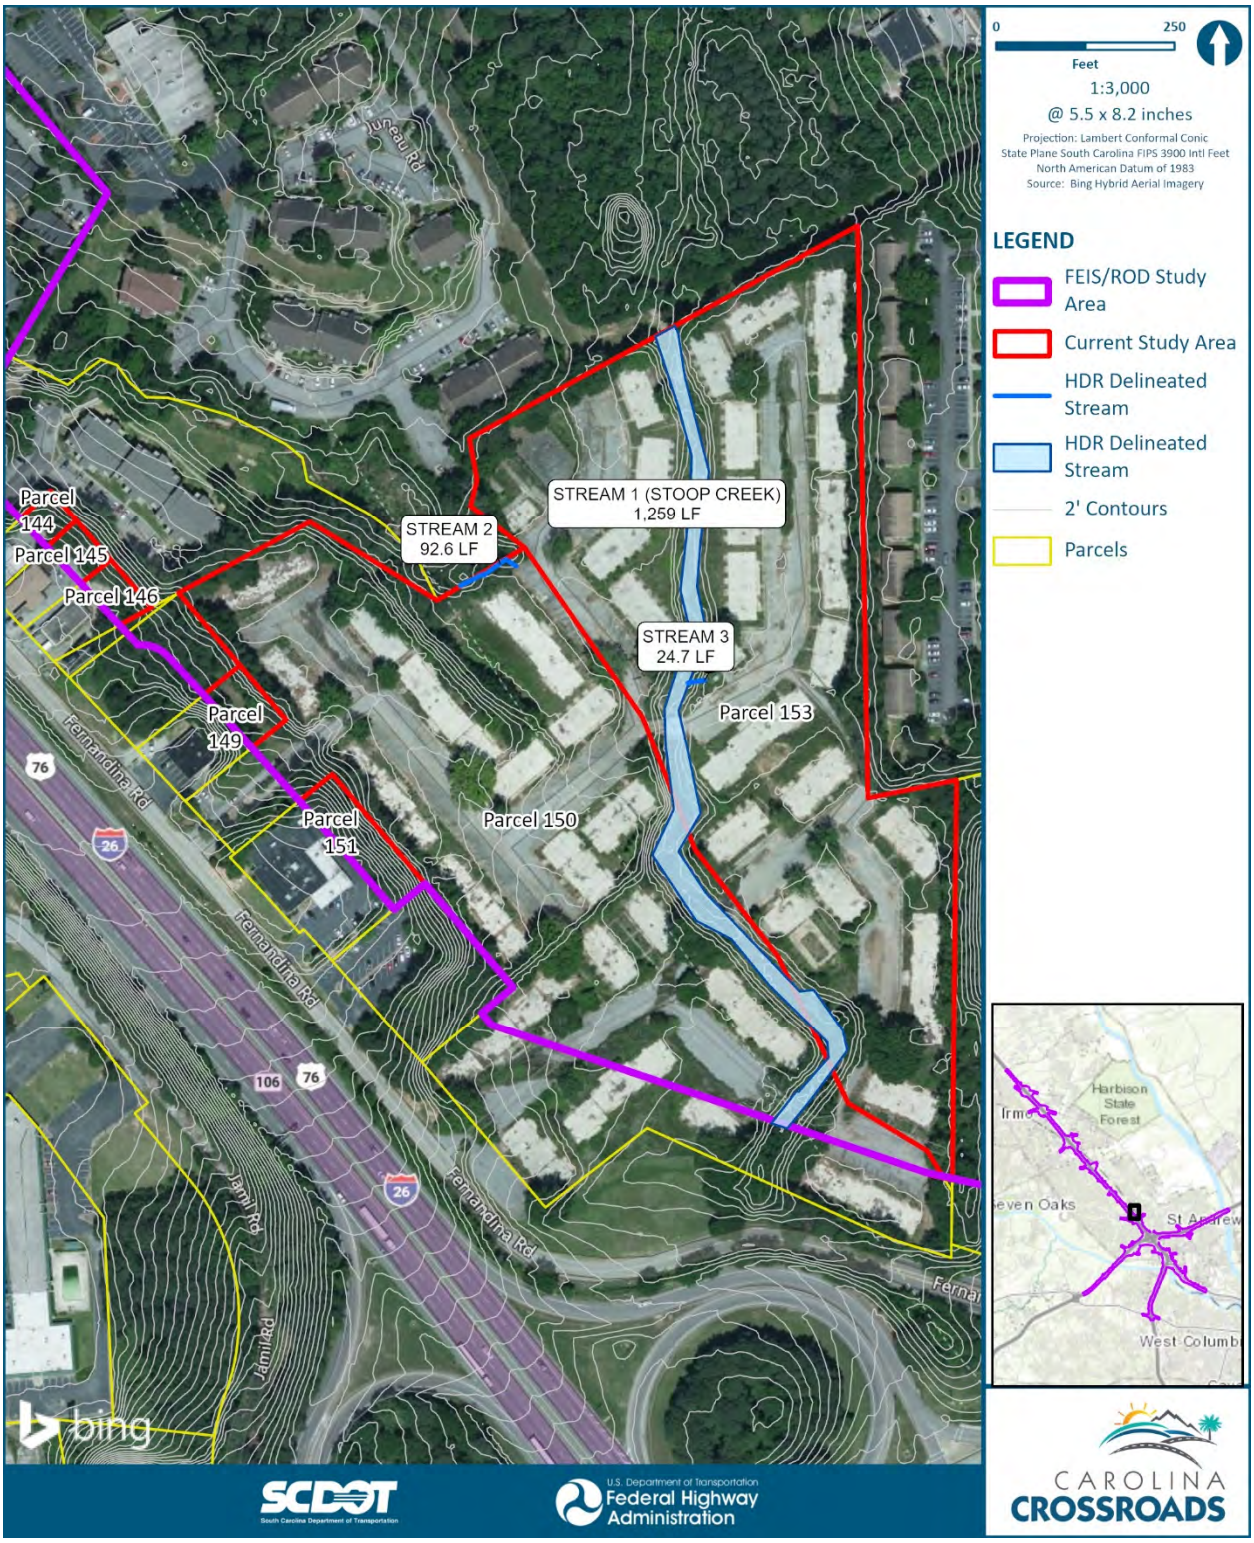

Figure 9. Parcels 144, 145, 146, 149, 150, 151, and 153

Figure 10. View of Parcel 150, facing northwest

Figure 11. View of Parcel 153, facing southwest

3. Right of way updates

As the right of way acquisition process for the CCR project continues, it has been determined that some acquired tracts included portions of the parcel(s) that extended beyond the FEIS/ROD PSA boundary. Thirteen (13) parcels had additional right-of-way extending beyond the PSA. These parcels are listed in Table 1. In Figures 5, 9, 18, 23, 25, and 27, the purple line shows the original FEIS PSA, and the red line is the updated Study Area limits that were not previously covered in the FEIS. These study area limits are generally the parcel boundary. On March 27-29, 2024, field investigations were conducted for cultural resources, jurisdictional features (streams and wetlands) and T&E habitat on all parcels that extended beyond the FEIS PSA. The investigations are summarized below.

Table 3 Summary of Parcels Extending Beyond the FEIS PSA		
General Parcel Location		
Fernandina Road	Jamil Road	Giles Parkway
151	660	698
149	661	699
146	681	
145	662	
144		
137		
109		

Parcel 151

The area outside of the PSA is located in a vacant lot along Fernandina Road, approximately 1,300 feet northwest of the intersection of Fernandina Road and St. Andrews Road (refer to Figure 9). The portion of the parcel observed during the field visit is approximately 0.33 acres and consists of a steep, wooded embankment, and paved lot. No shovel tests were excavated at Parcel 151, and no further survey is recommended at this location. No wetlands, streams, or T&E habitat were observed within this parcel. Figure 13 presents a view of Parcel 151.

Figure 13. View of Parcel 151, facing southeast

Parcel 149

The area outside of the PSA is in a vacant lot along Fernandina Road, approximately 1,650 feet northwest of the intersection of Fernandina Road and St. Andrews Road (refer to Figure 9). The portion of the parcel is approximately 0.2 acres and consists of a steep, wooded embankment, and a paved lot. No shovel tests were excavated at Parcel 149, and no further survey is recommended at this location. No wetlands, streams or T&E habitat were observed within this parcel. Figure 14 presents a view of Parcel 149.

Figure 14. View of Parcel 149, facing north

Parcels 144, 145, and 146

The area outside of the PSA is located in a vacant lot along Fernandina Road, approximately 900 feet southeast of the intersection of Fernandina Road and Evelyn Drive (refer to Figure 9). The portion of the parcels is approximately 0.27 acres (Parcel 144 ~0.07 acres, Parcel 145 ~ 0.10 acres, and Parcel 146 ~0.10 acres) and consists of a steep, wooded embankment, and a paved lot. No shovel tests were excavated at Parcels 144, 145, and 146, and no further survey is recommended at these locations. No wetlands, streams or T&E habitat were observed within these parcels. Figures 15-17 present views of Parcels 144, 145, and 146.

Figure 15. View of Parcel 144, facing north

Figure 16. View of Parcel 145, facing east

Figure 17. View of Parcel 146, facing northeast

Parcels 660 and 661

The area outside of the PSA is occupied by a CubeSmart Self Storage facility and Parcel 661 is occupied by a vacant lot along Jamil Road, approximately 620 feet northwest of the intersection of Jamil Road and Paisley Lane (Figure 18). The western portions of Parcels 660 and 661 are wooded in a mix of pines and hardwoods. The portion of the parcels surveyed is approximately 3.78 acres (Parcel 660 ~2.94 acres and Parcel 661 ~0.84 acres). Portions of both parcels are covered in asphalt and concrete with only small patches of herbaceous vegetation growing in the margins between the impervious areas. Figures 19 and 20 present views of Parcels 660 and 661.

Two shovel tests were excavated at Parcel 660. The shovel tests generally exposed a 10YR4/3 brown loam from 0-25 centimeters below surface (cm bs) over a compact 10YR6/8 brownish yellow clay subsoil from 25-45+ cm bs. The fill from the shovel tests was sifted through ¼-inch mesh hardware cloth. No cultural materials were recovered from the investigations at Parcel 660. No shovel tests were excavated at Parcel 661. Therefore, no further archaeological survey is recommended at these locations.

One stream (Stream 4) transects Parcels 660 and 661 (approximately 336 linear feet) and flows from west to east. The stream was identified as intermittent with a bank height of between three to eight feet and a bank full width of approximately six feet.

One ephemeral stream (Stream 5) is located on the western border of Parcel 660 (approximately 480 linear feet) and flows from south to north. The stream was observed during the field reconnaissance to be potentially ephemeral with a bank height of between one to ten feet and a bank full width of approximately three to four feet. This ephemeral feature is hydrologically connected to intermittent stream (Stream 4).

One wetland was observed on the western edge of Parcel 660. This area exhibited indicators such as wetland vegetation, wetland hydrology, and hydric soils. This wetland feature is hydrologically connected to an ephemeral channel which drains into Stream 4.

Marginal wetland areas have started emerging within the former paved parking areas and other impervious areas in portions of Parcels 660 and 661 due to stormwater runoff, resulting in pooling and the growth of vegetation typically found in wetland environments. These areas were observed to be heavily disturbed and were examined after a large rain event. Although these areas exhibit wetland vegetation and hydric soil indicators upon observation, they do not meet the hydrology standards set by the USACE to classify them as potentially jurisdictional waters.

As currently proposed, the project would not impact wetlands or streams on this parcel; however, if an alternate design is proposed that did impact wetlands at this location, those impacts would be documented in a re-evaluation and USACE IP modification. No T&E habitat was observed on these parcels.

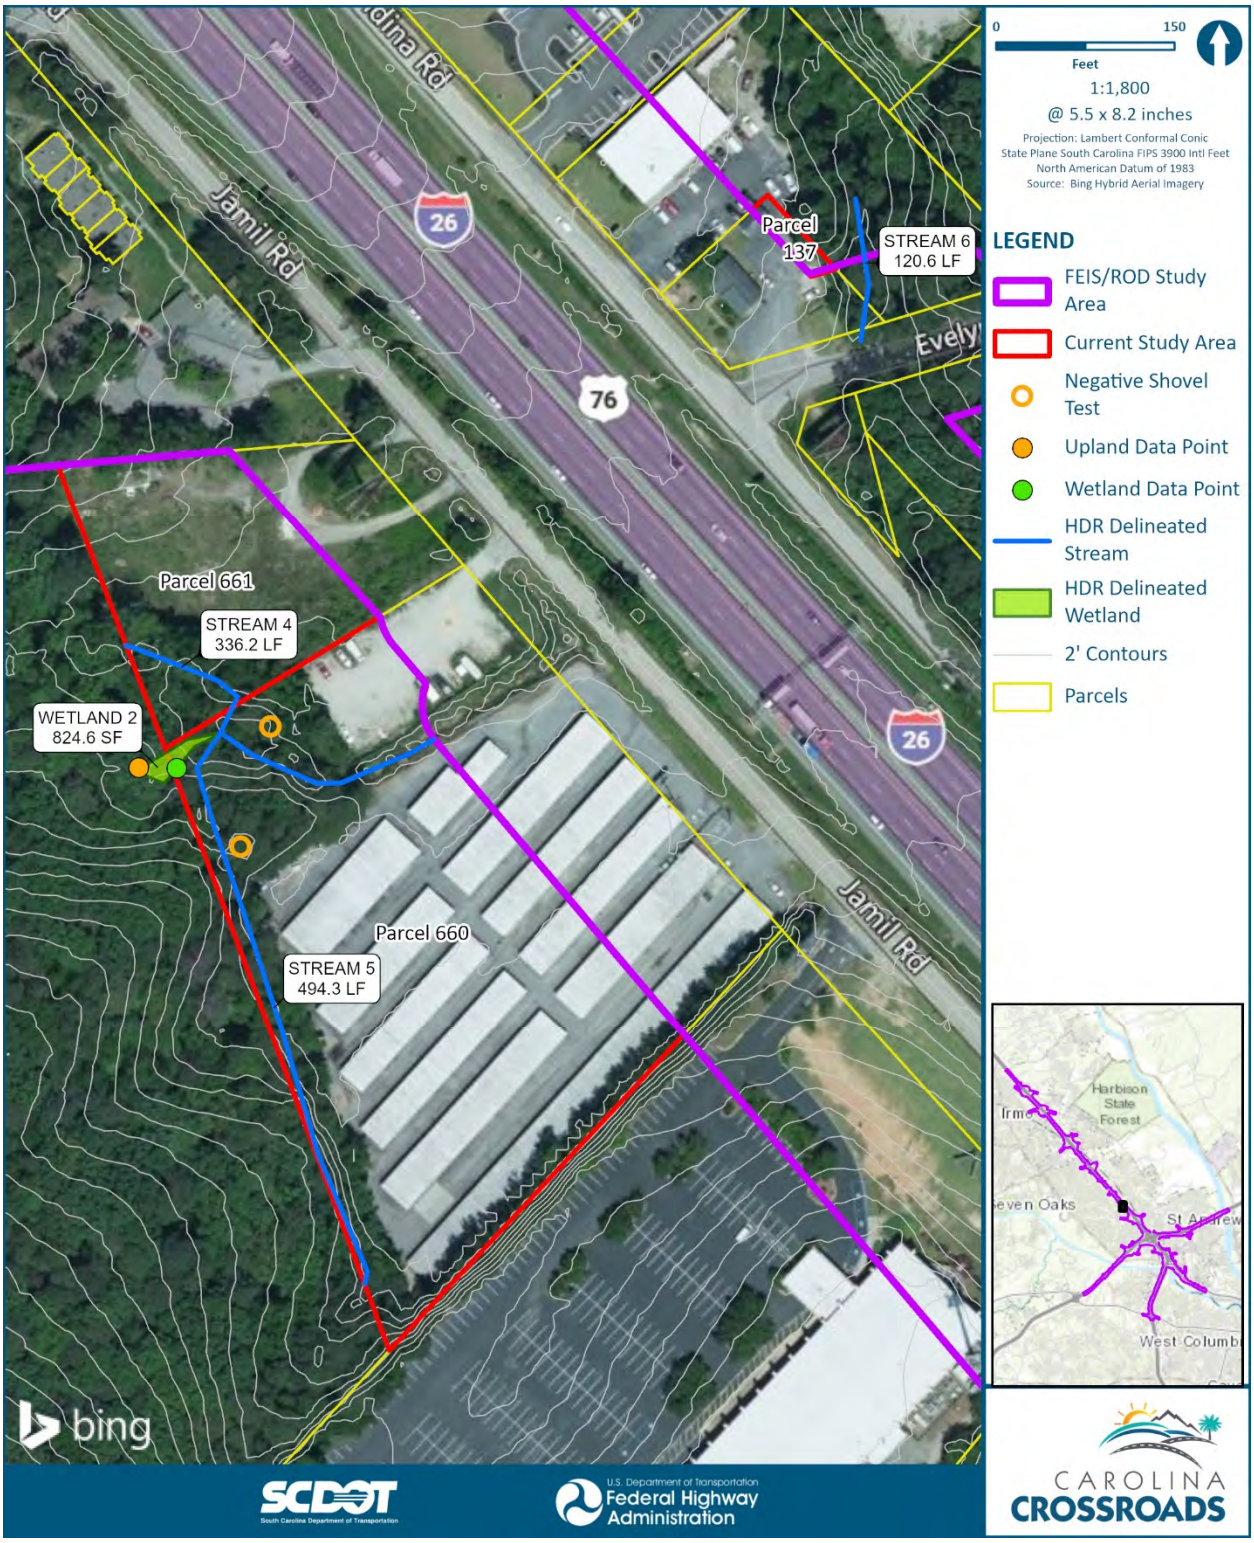

Figure 18. Parcels 660, 661, and 137

Figure 19. View of Stream 4 in Parcel 661, facing west

Figure 20. View of Parcel 661, facing southeast towards Parcel 660

Parcel 137

The area outside of the PSA is located in a parking lot of the "We the People Services" commercial building along Fernandina Road, approximately 130 feet north of the intersection of Fernandina Road and Evelyn Drive (refer to Figure 18). The portion of the parcel outside the current PSA is approximately 0.06 acres and consists of a paved parking area with sparse vegetation along the parcel boundary. No shovel tests were excavated at Parcel 137, and no further survey is recommended at this location. No wetlands, streams, or T&E habitat were observed within this parcel. Figure 21 presents a view of Parcel 137.

Figure 21. View of Parcel 137, facing north

Parcel 662

Parcel 662 is occupied by the Lakewood Village Condominium Complex on Jamil Road, just southeast of the intersection of Jamil Road and King George Way. The portions of the parcel outside of the PSA is temporary right of way that will be held by SCDOT until the end of project construction; however, this area is likely to be cleared during construction. The area is occupied by the foundations of condominiums and garages that were acquired for the project and subsequently demolished. Three small portions of the parcel total approximately 0.23 acres. All portions of the parcels are covered in asphalt and concrete with only small patches of herbaceous vegetation growing in the margins between the impervious areas. These areas were previously maintained as residential lawns prior to demolition. Figure 22 presents a view of Parcel 662. Figure 23 presents a plan view of Parcel 662.

No shovel tests were excavated at Parcel 662, and no further survey is recommended at this location. No wetlands, streams or T&E habitat were observed within this parcel.

Figure 22. View of Parcel 662, facing north

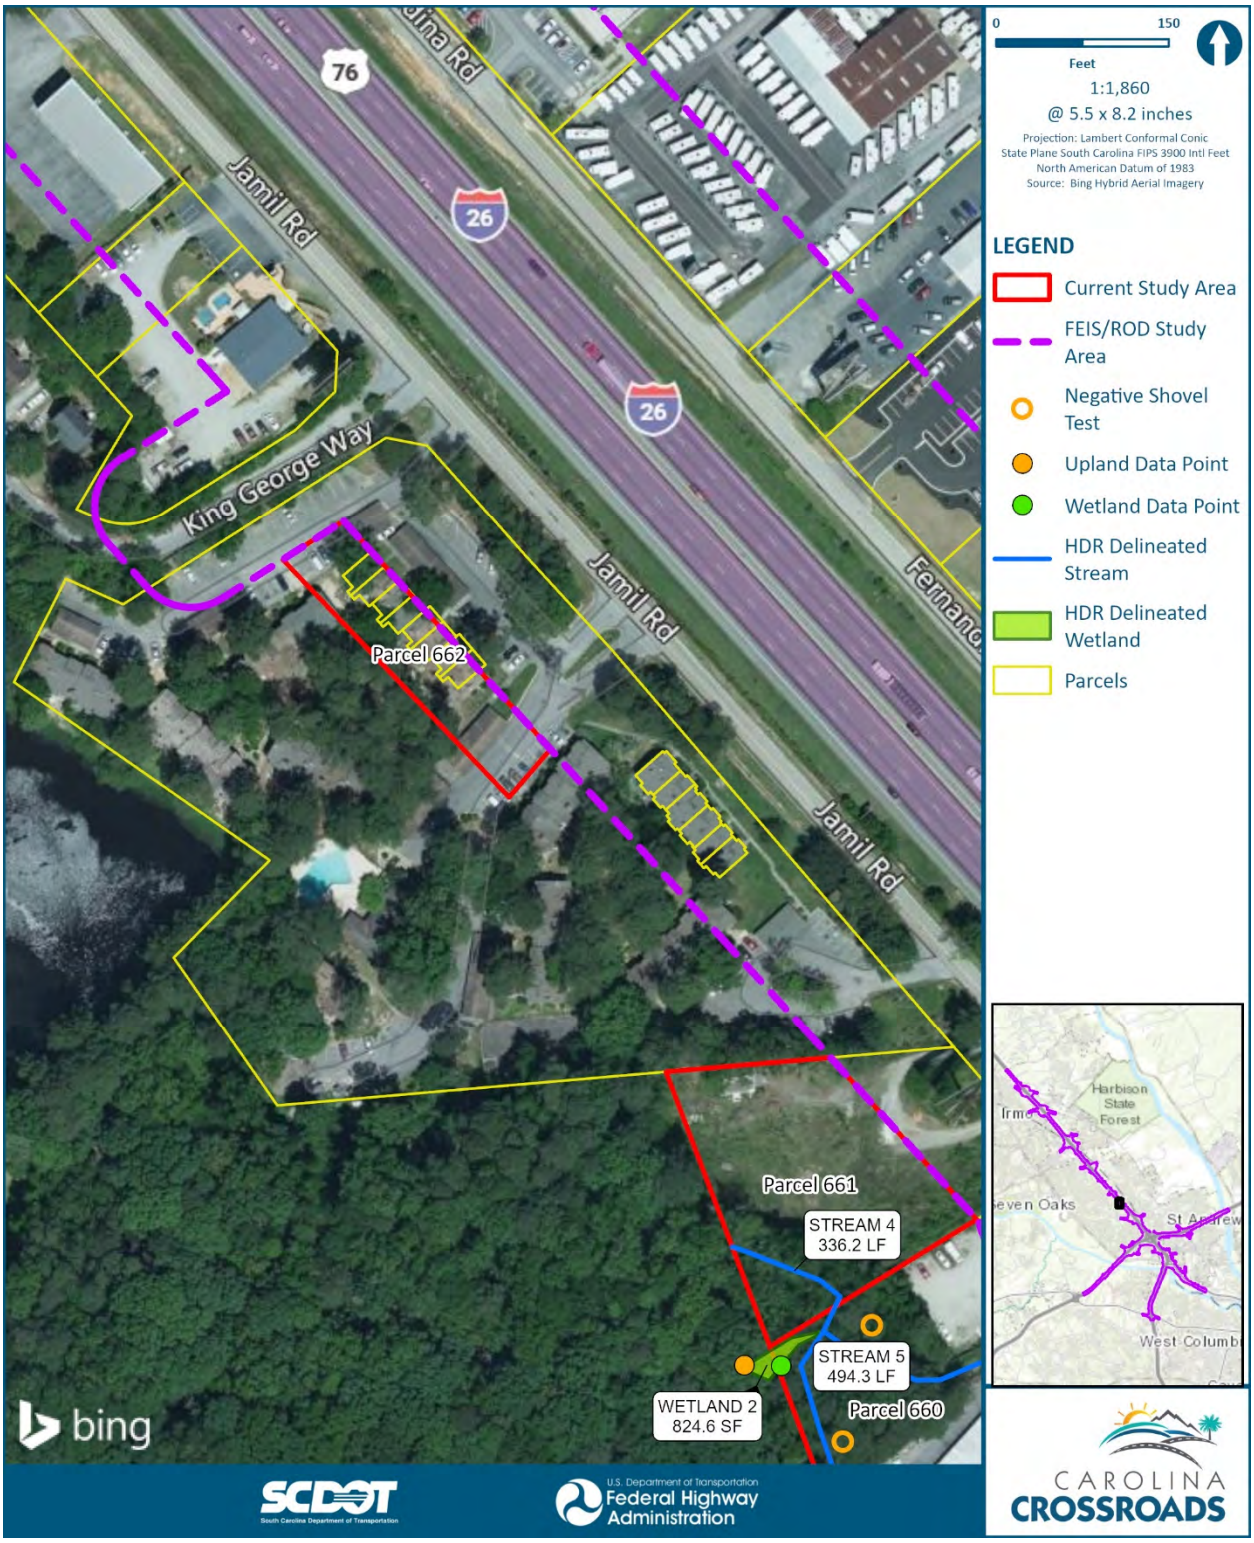

Figure 23. Parcel 662

Parcel 109

The outside of the PSA is located in a wooded area along Steward Drive, approximately 175 feet east of the intersection of Fernandina Road and Steward Drive. The portion of the parcel outside the PSA is approximately 0.02 acres located adjacent to a fenced-in tower and consists of a wooded pine and mixed hardwood forest along the parcel boundary. No shovel tests were excavated at Parcel 109, and no further survey is recommended at this location. No wetlands, streams or T&E habitat were observed within this parcel. Figure 24 presents a view of Parcel 109. Figure 25 presents a plan view of Parcel 109.

Figure 24. View of Parcel 109, facing southeast

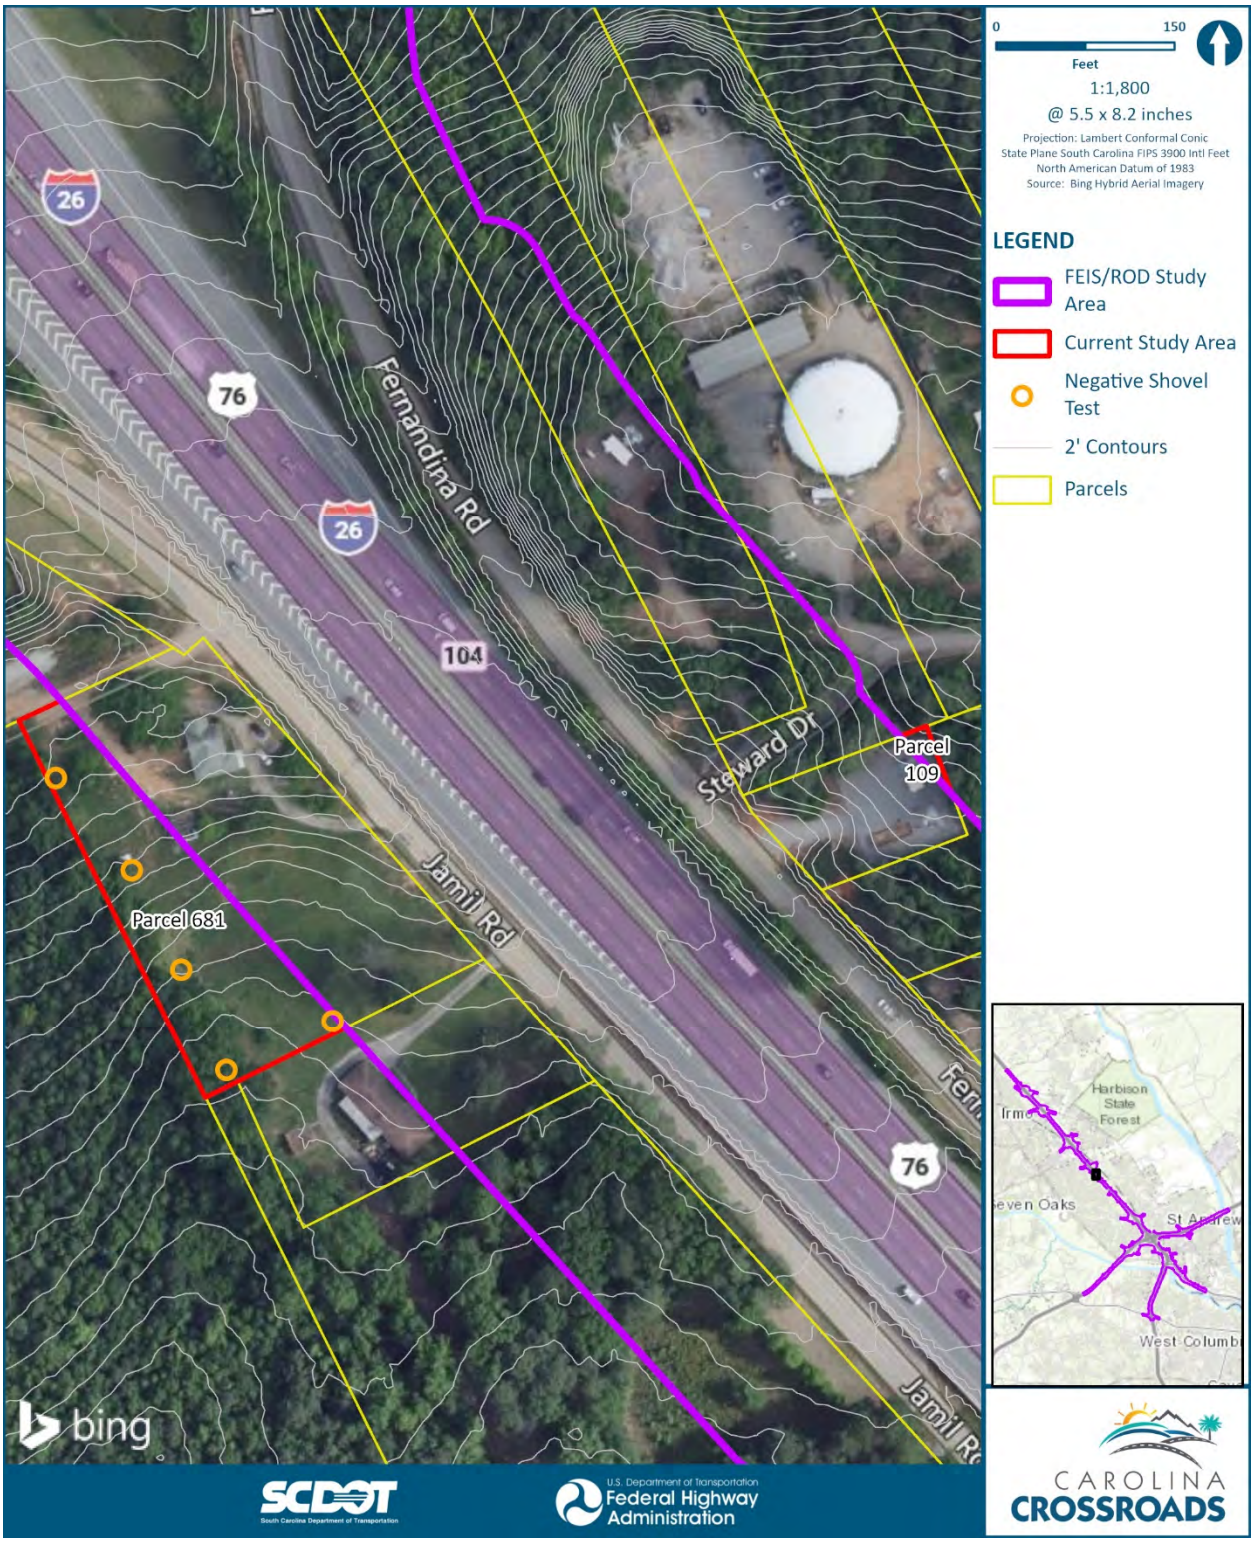

Figure 25. Parcels 109 and 681

Parcel 681

The area outside of the PSA is located in a lightly wooded area to the south of the intersection of Jamil Road and Paris Road (refer to Figure 25). A transmission line corridor borders the parcel to the north. The area is approximately 0.77 acres and consists of mixed evergreen and hardwoods with a moderate understory of small trees and vines.

Investigators excavated five shovel tests in the currently investigated western portion of the parcel. The shovel tests generally exposed a 10R3/4 dusky red clay loam from 0-10 cm bs over a compact 10R4/8 red clay subsoil from 10-30+ cm bs. The fill from the shovel tests was sifted through ¼-inch mesh hardware cloth. No cultural materials were recovered from the investigations at Parcel 681. No further archaeological survey is recommended at this location. No wetlands, streams or T&E habitat were observed within this parcel. Figure 26 presents a view of Parcel 681.

Figure 26. View of Parcel 681, facing southeast

Parcels 698 and 699

The area outside of the PSA is located along Giles Court, approximately 250 feet northwest of the intersection of Piney Grove Road and US Highway 26 (Figure 27). The portion of the parcels outside the PSA are approximately 0.71 acres combined and consist of a wooded pine and mixed shrub and vine species along the parcel boundaries. No shovel tests were excavated at Parcels 698 or 699, and no further survey is recommended at this location. No wetlands, streams or T&E habitat were observed within this parcel. Figures 28 and 29 present views of Parcels 698 and 699.

4. Summary

Based on the surveys conducted for the proposed design changes, described in Section 2, no new significant impacts have been identified, therefore the previous NEPA decision remains valid. Based on surveys conducted for the right of way updates, new jurisdictional features identified are outside of the footprint of the proposed design and would not be impacted by the project; therefore, no impacts are anticipated. See impact matrix below.

If future design-build updates would require impacts to any newly documented WOTUS features, the contractor would be required to submit jurisdictional determinations and a Section 404 permit modification to the USACE.

See SHPO concurrence letter in Appendix E.

Table 4 Project Changes – Summary of Impact Changes from Previous NEPA decisions

	Wetlands/ Streams (acres)	Cultural Resources (sites/findings)	Relocations	Environmental Justice	T&E Habitat (presence)	Noise (Impacted receivers)
I-20/Bush River Rd Interchange	No new impacts	None found	No new impacts	No change in impacts	No	No new impacts
Berryhill Rd Realignment	No new impacts	None found	No new impacts	No change in impacts	No	No new impacts
I-126 to I-26 Semi-directional ramp	No new impacts	None found	No new impacts	No change in impacts	No	No new impacts
Willow Creek flood improvement	No new impacts	None found	No new impacts	No change in impacts	No	No new impacts
Right of way updates	No new impacts	None found	No new impacts	No change in impacts	No	No new impacts

Traffic Analysis Objective

The South Carolina Department of Transportation (SCDOT) proposes multiple improvements to the I-20, I-26, and I-126 corridors within what is identified as the Carolina Crossroads study area. The limits of the Carolina Crossroads study area include approximately five miles of I-20 between Exit 61 (US-378/Sunset Boulevard) and the crossing over the Broad River, approximately nine miles of I-26 from Exit 101 (Broad River Rd) to Exit 110 (US 378), and approximately two miles of I-126 from I-26 to Grey Stone Boulevard.

This Methodology report outlines the limits, method, and assumptions that will be used to analyze and document existing and future traffic conditions within the Systems Interchange Modification Report (Systems IMR). The analysis results will be documented in the Systems IMR. The analysis will follow procedures and guidance from the latest Highway Capacity Manual (HCM) 7th Edition, Highway Safety Manual (HSM), 1st Edition, with 2014 Supplement, Federal Highway Administration (FHWA) Interstate System Access Information Guide (2010), FHWA Policy on Access to the Interstate System (2017), and SCDOT Interchange Modification Report (IMR)/ Interchange Justification Report (IJR) Guidelines (2019).

The 2019 approved Systems IMR is being reevaluated due to the change in the Design Year (from 2040 to 2050), Design Changes at multiple interchanges and the change in TransModeler Version**.** In this reevaluation, the study area will be calibrated using the latest TransModeler version (version 7) for 2024 conditions. Using the calibrated parameters, the approved 2019 Systems IMR concept will be compared with the proposed improvements in the Systems IMR Reevaluation for the Design Year 2050 conditions.

Introduction

The Carolina Crossroads Project includes three interstate routes and incorporates the modification of the I-20/I-26 system interchange (Exit 64/Exit 107) and the I-26/I-126 system interchange (Exit 108). Several immediately adjacent service interchanges are expected to be modified as well. Due to the proximity and interconnected movements of the service interchanges with the system interchanges, the modifications of all the interchanges are to be evaluated collectively.

I-20 is an east-west interstate highway that begins near Kent, Texas at I-10. From this origin, I-20 runs eastward through Texas, Mississippi, Alabama, Georgia, and South Carolina where it ends at I-95 in Florence, South Carolina. I-26 is an east-west interstate highway that begins at the junction of U.S. Route 11W and U.S. Route 23 in Kingsport, Tennessee. From this origin, I-26 runs generally southeastward through Tennessee, North Carolina, and South Carolina, where it ends at U.S. Route 17 in Charleston, South Carolina. I-126 is an east-west auxiliary route of I-26 that begins and ends in Columbia, South Carolina.

The proposed project is a transportation corridor improvement located in Lexington and Richland counties. To date, the project area has been defined as a mainline corridor including I-20 from US 378 to the Broad River (approximately five miles), I-26 from Broad River Road to US-378 (approximately nine miles), and I-126 from I-26 to Grey Stone Boulevard (approximately two miles). **Figure 1** illustrates the extent of the Carolina Crossroads study area.

The original I-20/I-26/I-126 Systems IMR, dated May 2019, evaluated the anticipated interchange modifications as depicted in the Final Environmental Impact Statement (FEIS) for the project. Since the approval of the Systems IMR, the Carolina Crossroads I-20/I-26/I-126 Corridor Improvement Project has been separated into five construction phases. The first three phases of the Carolina Crossroads Project comprise most of the work documented in the Systems IMR. Improvements to the I-126 at Colonial Life Boulevard interchange are now part of Phase 1 of the Carolina Crossroads Project Delivery while the I-20 Exit 65 Interchange at Broad River Road is now part of Phase 2. Phases 1 and 2 are both under

construction as design-build projects and the construction are expected to be completed in 2025. The improvements to I-20/I-26/I-126 system interchanges, along with I-20 Exit 63 (Bush River Road) and I-26 Exit 106 (St. Andrews Road) were part of Phase 3, which was also to be a design-build project. Traffic Technical Memoranda addressing changes to the I-126 Colonial Life Boulevard interchange and I-20 Exit 65 (Broad River Road) were submitted as part of the Phase 1 and Phase 2 design-build projects, ID P039718 and ID P039719, respectively.

As the evolution of the Carolina Crossroads Project through the phased construction delivery is discussed, it is important to understand the key terms that define various milestones in the evolution of the design as it relates to the FEIS and the Record of Decision (ROD) for the Carolina Crossroads Project and the Systems IMR. The design concept depicted in the FEIS was referred to as the **Refined Recommended Preferred Alternative (RRPA)**, which as the name implies was a refinement to the Recommended Preferred Alternative (RPA) presented the in the Draft Environmental Impact Statement (DEIS). Since the Systems IMR was developed in parallel with the EIS documents, the nomenclature associated with the design concept in the documents was consistent and therefore the Systems IMR refers to the design concept used in the "Build" analysis as the RRPA. Once the ROD was issued in May of 2019, the RRPA concept became known as the **Selected Alternative (SA)**; however, many of the reference documents to the FEIS/ROD were not updated to reflect this change in nomenclature, including the Systems IMR. *Therefore, the terms RRPA and SA are synonymous.*

As the Carolina Crossroads Project has advanced through the initial construction phases and right-of-way acquisition, the design concept has been updated periodically. These updates include changes to the design associated with the final design that have been developed during Phases 1 and 2 and changes made to the design concept outside of Phases 1 and 2 based on refinements made during right-of-way acquisition throughout the entire limits of the Carolina Crossroads Project. The version of the design concept that includes all these changes is referred to as the **Modified Selected Alternative (MSA)**.

Background

The following studies were conducted as a part of the Carolina Crossroads Project:

Alternatives Traffic Analysis (April 2019)

The traffic analysis of the Representative Alternatives (RA) consisted of an iterative process involving the development of traffic projections incorporating previously collected data, screening of interchange Accessory Options (AO) that led to the development of the individual RA, evaluating microsimulation networks of individual RA concepts that included microsimulation model calibration, review of areas of congestion within each alternative, and preparation of measures of effectiveness to facilitate the comparison of individual RA. As areas of congestion and improvements in conceptual design of the RA were addressed, the microsimulation networks were modified to incorporate improvements to the original RA concept. Detailed information regarding the alternatives development and screening process is contained in the Alternatives Development and Screening Report.

The Alternatives Traffic Analysis evaluated multiple improvements within the I-20/I-26/I-126 corridor designed to reduce existing traffic congestion, upgrade interchanges to meet design requirements, and accommodate future traffic needs. The study considered widening of I-20 from three to four lanes in each direction from about one mile west of Exit 63 (Bush River Road) to Broad River, widening of I-26 from three to four lanes in each direction from just west of Exit 101 (Broad River Road) to Exit 110 (US 378), and realigning the connection to I-126 from I-26 towards the Colonial Life Boulevard interchange. In addition, the study examined modifications to the I-20/I-26/I-126 system interchange, Exit 101 (Broad River Road), Exit 102 (Lake Murray Boulevard), Exit 103 (Harbison Boulevard), Exit 104 (Piney Grove

Road), Exit 106 (St. Andrews Road), Exit 108 (Bush River Road), Exit 110 (US 378), Exit 63 (Bush River Road), Exit 65 (Broad River Road), and the Colonial Life Boulevard interchange on I-126. The Study Area for the Alternatives Traffic Analysis is shown in **Figure 1**.

Figure 1 - Carolina Crossroads Study Area from Alternatives Traffic Analysis (April 2019)

The approved Systems IMR (May 2019)

The information discussed in the approved Systems IMR (May 2019) is derived from the Alternatives Traffic Analysis (April 2019). This report focused on traffic analysis of existing, future no-build, and future build conditions. The study area and TransModeler (version 4) remained consistent with the Alternatives Traffic Analysis (April 2019). The traffic conditions were analyzed for the following scenarios:

- Existing Conditions: An analysis of existing conditions in the year 2015
- 2040 No-Build: An analysis of conditions in the year 2040 with no changes to the interstate or interchanges.
- 2040 Build: An analysis of conditions in the year 2040 with modifications to the study area interstate and interchanges

As part of the project development, nine RAs for the entire Carolina Crossroads study area were developed and evaluated along with a tenth 'no-build' alternative. From these alternatives, the RRPA also known as the **SA** was identified. The I-20/I-26 and I-26/I-126 system interchanges and adjacent service interchanges in the RRPA were modified as follows:

- I-20/I-26 System Interchange: the existing full cloverleaf interchange (I-20 Exit 64 and I-26 Exit 107) will be modified to a directional 'turbine' interchange. Multiple existing complex weaving movements will be eliminated from the mainline and relocated to collector-distributor roads which will be constructed in each direction on I-20 and I-26 to separate movements traveling between I-20 and I-26 from through traffic on the mainline travel lanes.

- I-26/I-126 System Interchange: the existing interchange (I-26 Exit 108), which includes ramps from I-26 to Bush River Road, will be modified to eliminate the ramps to Bush River Road, improve the continuity of I-26, and revise the connection to and from I-126.

- I-20 Exit 63 (Bush River Road): the existing diamond interchange, which includes a loop on-ramp from eastbound Bush River Road to eastbound I-20, will be modified to provide a diverging diamond interchange. This modification includes eliminating the intersection of Berryhill Drive with Bush River Road and adding an overpass to connect Berryhill Drive over I-20 to Bush River Road via Rockland Road.

- I-20 Exit 65 (Broad River Road): the existing diamond interchange at Broad River Road, which includes a short, two-way segment on the eastbound on-ramp to connect Garner Lane to Broad River Road, will be modified to provide a single point urban interchange. The Garner Lane connection to the off-ramp was eliminated, making the interchange consistent with current standards and FHWA policy. A new connection was added to link Garner Road to Longcreek Drive.

- I-26 Exit 106 (St Andrews Road): the existing partial cloverleaf interchange includes a westbound loop off-ramp and eastbound loop on-ramp to and from westbound St Andrews Road. It will be modified to provide a single point urban interchange. The connections from the westbound off-ramp to eastbound St Andrews Road and to Burning Tree Drive will be maintained and adjusted to connect to the remainder of the modified interchange.

- I-26 Exit 110 (US 378): the existing single point urban interchange will remain unchanged; however, the eastbound off-ramp to US 378 will be relocated and extended by approximately 2,500 feet to reduce or eliminate the potential for off-ramp traffic queues from extending back to the eastbound I-26 mainline lanes.

- I-126 Colonial Life Boulevard: the existing partial interchange with ramps only oriented to and from downtown Columbia to the east will be replaced with a full access tight urban diamond interchange.

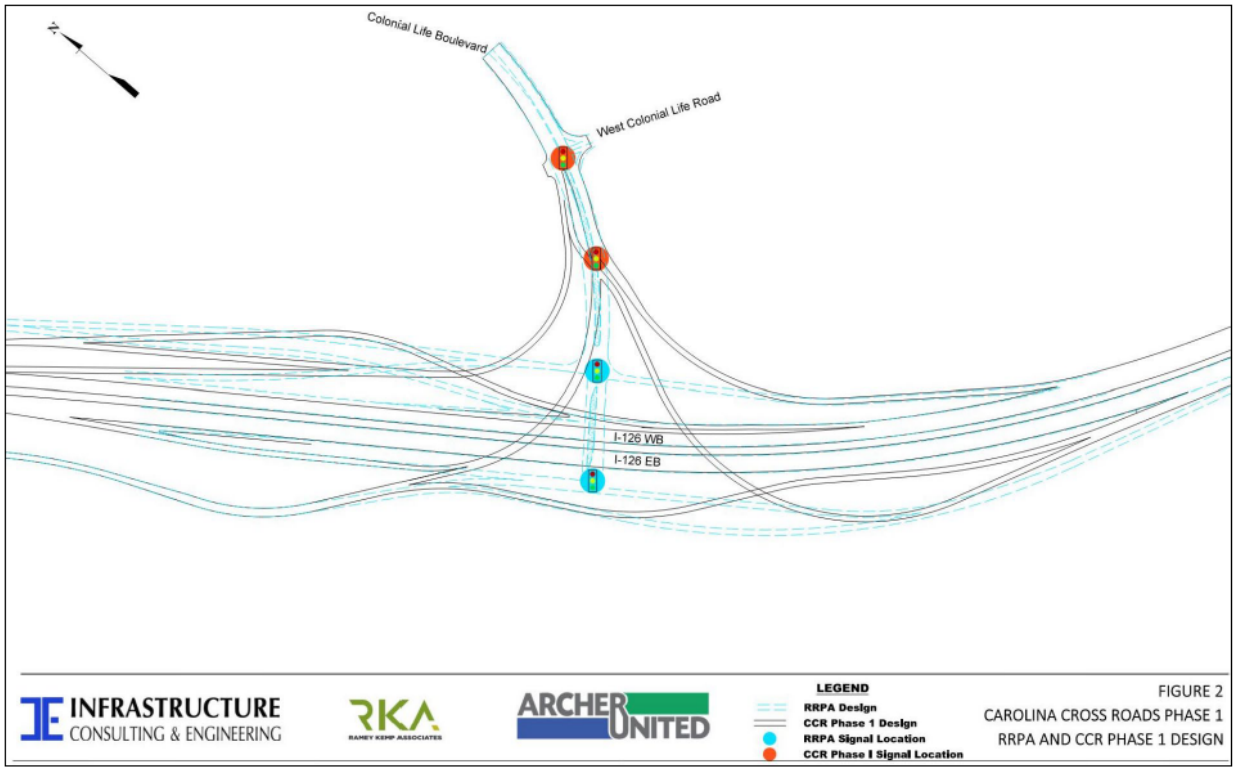
NEPA

A National Environmental Policy Act (NEPA) DEIS was completed in 2019, where the environmental impacts associated with the project were analyzed and documented. The Record of Decision was issued by FHWA in May 2019.

NEPA Re-evaluation #1 - Colonial Life Boulevard (Phase I)

For this interchange, a full access tight urban diamond interchange was proposed in the approved Systems IMR. As part of the Phase 1 construction, an alternative design (partial diverging diamond interchange) (see **Figure 2**) concept was chosen as the most preferred concept based on several factors such as design innovation, constructability, cost effectiveness, and traffic operations.
This analysis was conducted using TransModeler version 4 to ensure that the proposed interchange design would not have significant impacts on the traffic operations and safety during AM and PM peak hours under current year (2020) and design year (2040) traffic conditions. The full traffic analysis including the interchange justification for this preferred alternative can be found in the September 2021 *Technical Memorandum I-126 at Colonial Life Boulevard Interchange – Traffic Analysis.* The changes to the Phase 1 design from the 2019 Systems IMR concept were included in the NEPA Re-evaluation #1 approved in August 2020.

Figure 2 - Phase 1 Preferred Concept for Colonial Life Boulevard Interchange



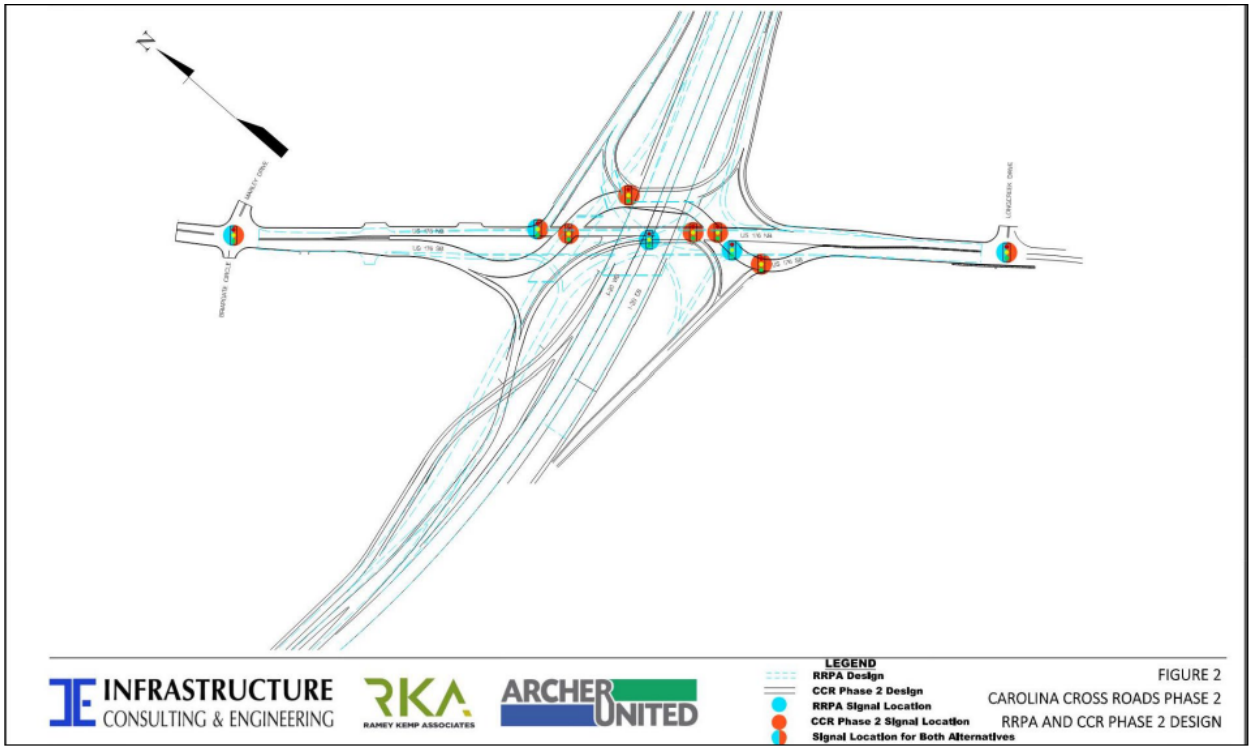
Source: Figure 2 of the *I-126 at Colonial Life Boulevard Interchange – Traffic Analysis Technical Memorandum (page 3)*

NEPA Re-evaluation # 5 – Broad River Road Technical Memorandum (Phase II)

For this interchange, a single point urban interchange (SPUI) was proposed in the approved Systems IMR. As part of the Phase 2 construction, an alternative design Offset Diverging Diamond Interchange (DDI) concept (see **Figure 3**) was chosen as the most preferred concept based on several factors such as design innovation, constructability, cost effectiveness, and traffic operations. This design incorporates two new crossover intersections rather than signal point intersection as part of the **Selected Alternative**. The analysis was conducted using TransModeler version 4 to ensure that the proposed interchange design would not have significant impacts on the traffic operations and safety during AM and PM peak hours under current year (2020) and design year (2040) traffic conditions. The full traffic analysis including the interchange justification for this preferred alternative can be found in the March 2022

Technical Memorandum I-20 at Broad River Road Interchange – Traffic Analysis. The changes to the Phase 2 design from the 2019 IMR concept were included in the NEPA Re-evaluation #5 approved in September 2022.

Figure 3 - Phase 2 Preferred Concept for Broad River Road Interchange



Source: Figure 2 of the *I-20 at Broad River Road Interchange – Traffic Analysis Technical Memorandum (page 3)*

Modified Selected Alternative Phase 1/Phase 2 Traffic Technical Report (June 2022)

As the Carolina Crossroads Project has advanced through the initial construction phases, the design concept has been updated to accommodate refinements made during right-of-way acquisition throughout the entire limits of the Carolina Crossroads Project. The version of the design concept that includes all of these changes is referred to as the **MSA**.

Due to substantial updates to the 2040 **SA** network, a simulation-based, dynamic traffic assignment (DTA) was completed for the 2040 AM and PM scenarios using TransModeler version 4. The analysis results of the mainline density segments for the 2040 SA (referred to the 2040 Build RRPA as part of the approved IMR) and the 2040 MSA conditions were compared and summarized in June of 2022 *Technical Memorandum Modified Selected Alternative Phase1/Phase 2 Traffic Report.* This report also summarized the updated MSA network analyses including the final design concepts for Phase 1 and Phase 2 and an updated interchange concept at I-20 Exit 63 (Tie-in) as shown in **Figure 4**. These three changes are described below and constitute the major changes from the RRPA/SA as it relates to effects on the Systems IMR. MSA network analyses MOEs were compared against the approved Systems IMR to demonstrate improved operations and safety.

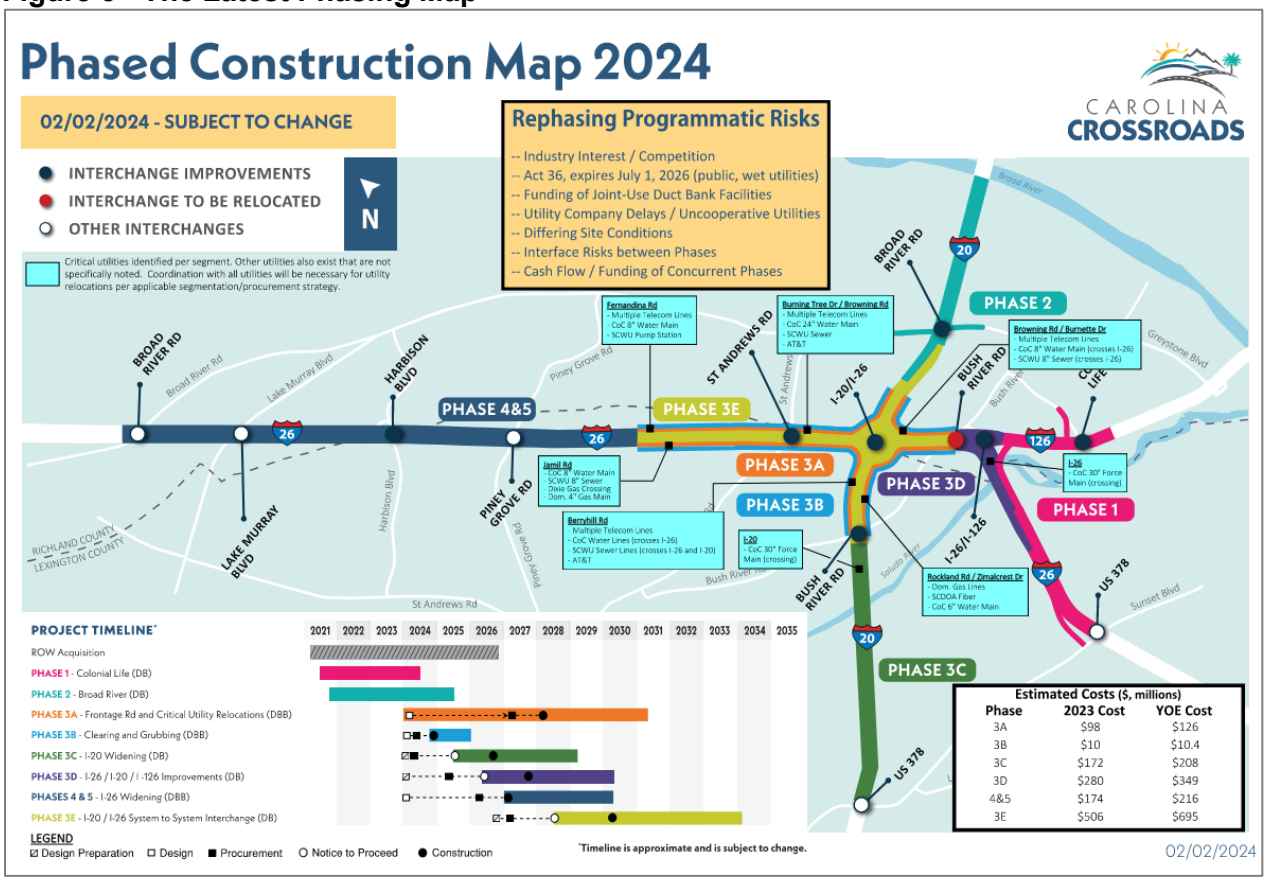
Figure 4 - Exit 63 Bush River Road Existing Tie-In Concept

Systems IMR Reevaluation Overview

As documented in the approved Systems IMR, the primary purpose of Carolina Crossroads Project is to increase capacity and have an adequate future level of service along the I-20/I-26/I-126 System Interchanges and to find improvements to the issues that impact roadway traffic. These issues may include system linkage, capacity, modal interrelationships, and safety.

As the Carolina Crossroads Project has advanced through the initial construction phases and right-of-way acquisition, the design concept has been updated periodically and the latest phasing and the schedule is shown in **Figure 5**. The primary purpose of this Systems IMR Reevaluation is to reassess the safety and traffic operations of proposed design changes with updated data and forecasting projections. Additionally, the Systems IMR Reevaluation aims to address any changes in traffic volumes that may have emerged since the approval of the Systems IMR in 2019.

Figure 5 - The Latest Phasing Map



Systems IMR Re-evaluation Reasons

There are three primary reasons necessitating the reevaluation of the approved Systems IMR. These are listed below.

Reason 1 – Change in the Design Year

The approved IMR and subsequent traffic analyses for Phase 1, Phase 2 and MSA have used Design Year 2040. The basis for 2040 projected traffic volumes was the 2040 South Carolina Statewide Model (SCSWM) and a 20-year design life of the project. The SCSWM is currently updated to Horizon Year 2050 and will be used to project traffic volumes for the Design Year 2050. Procurement challenges have resulted in the rephasing of the Project in 2024 which extends the Carolina Crossroads construction schedule and results in the I-20/I-26 system interchange construction phase planned to start in 2028. To evaluate the 2020-year design life of the project, the design year has been revised to 2050.

Reason 2 – Design Changes

To obtain SO&E and NEPA approval for changes documented in the MSA and proposed design changes at the following interchanges:

- I-20 and I-26 System Interchange
- I-126 and I-26 System Interchange
- I-26 at St. Andrews Road

- I-20 at Bush River Road
- I-20/I-26 System Interchange collector-distributor system
- Colonial Life Boulevard at I-126
- Broad River Road at I-20

Reason 3 – Change in TransModeler Version

- The TransModeler (Version 4.0 Build 6275) was used for the approved Systems IMR and subsequent traffic analysis for Phase 1, Phase 2 and MSA. The Highway Capacity Manual (HCM) methodologies have evolved from HCM 2010 since the Systems IMR approval to the latest HCM 7th edition. Similarly, the current TransModeler is version 7 which implements the latest HCM methodologies. This reevaluation will conduct traffic analysis using the latest TransModeler version 7.

Systems IMR Re-evaluation Schedule

The current Systems IMR Reevaluation Study tentative schedule is as follows:

- Systems IMR Reevaluation Start: March 2024
- Data Collection: April/May 2024
- TransModeler Calibration: July 2024
- Draft Systems IMR Reevaluation for FHWA: October 2024

Study Area

The Systems IMR Reevaluation Study area will be same as the approved Systems IMR as shown in **Figure 1**. The study area includes the following:

I-26 from Broad River Road to US-378 (approximately nine miles) including eight interchanges:

- I-26 at Broad River Road (SR 176)
- I-26 at Lake Murray Boulevard (SR 60)
- I-26 at Harbison Boulevard
- I-26 at Piney Grove Road
- I-26 at St. Andrews Road
- I-26 at I-20
- I-26 at Bush River Road
- I-26 at I-126
- I-26 at Sunset Boulevard (US 378) -adjacent interchange analyzed to address FHWA requirements.

I-20 from east of US 378 to the Broad River (approximately five miles) including three interchanges:

- I-20 at Sunset Boulevard (US 378) -adjacent interchange analyzed to address FHWA requirements.
- I-20 at Bush River Road
- I-20 at Broad River Road

I-126 from I-26 to Grey Stone Boulevard (approximately two miles) including two interchanges:

- I-126 at Colonial Life Boulevard
- I-126 at Greystone Boulevard -adjacent interchange analyzed to address FHWA requirements.

All ramp terminal intersections adjacent to the thirteen study interchanges along I-20, I-26 and I-126 are included in the study area.

Analysis Years

The corridor will be analyzed for the following years:

- Existing Year 2024
- Design Year 2050

Analysis Periods

Morning (AM) peak, and afternoon (PM) peak hour traffic conditions will be evaluated within the study area to account for the significant directional flow of traffic in the respective peak hours.

Project Alternatives

The project will evaluate the following:

- **Existing Condition (2024)** – baseline for microsimulation calibration
- **Approved Systems IMR/SA Concept (2050)** – Baseline for comparison
- **Build Alternative (2050)** - Proposed improvements in the Systems IMR Reevaluation

Data Collection and Traffic Forecasting

Data Collection

Consistent with the approved Systems IMR the following data will be obtained:

- **Road Inventory Data:** Road Inventory Data will be obtained from SCDOT RIS Database.
- **Turning Movement Count:** New turning movement counts including pedestrian and bike counts will be collected at the study intersections and ramp terminal intersections as identified in the **Study Area Section**.
- **Vehicle Classification Counts:** Vehicle classification counts will be collected at the study segments identified in the **Study Area Section**.
- **Automatic Traffic Recorder (ATR) Data:** ATR data will be obtained from SCDOT for all active stations within the study area for available days in 2023 and 2024.
- **AADT Data:** Historic AADT data will be obtained from SCDOT from 1996 through 2023.

- **Speed Data:** SCDOT will provide NPMRDS (National Performance Management Research Data Set) speed data for the dates on which new traffic counts will be conducted.

- **Regional Origin-Destination Data**: 2024 StreetLight origin-destination data will be provided by SCDOT.

- **Crash Data:** Crash data for the study area will be provided by the SCDOT Safety Office for three years, from January 01, 2021, to December 31, 2023 (latest available data).

- **Traffic Signal Timing and Signal Plans:** Latest (2024) Traffic signal plans and coordinated signal timing plans will be obtained from SCDOT.

- **Travel Demand Model (TDM):** Regional TDM and SCSWM will be obtained from SCDOT.

Traffic Factors

The traffic factors for the mainline segments, ramps, and ramp terminal intersections will be developed from the existing data. These factors include the Directional Design Hour Volume factor (D), the Design Hour Volume factor (K), and the truck percentage (T).

Traffic forecasting

The methodology to be followed for the traffic forecasting is consistent with the approved Systems IMR and general SCDOT traffic forecasting guidelines. The methodology includes but it is not limited to the following:

- Collect traffic counts information from historical traffic count records, field count data, previous studies, traffic characteristics, and other relevant data. Existing counts will be adjusted for COVID-19 impacts if necessary.
- Based on the data collection process, estimate future travel characteristics of the corridor.
- Base year volumes will be developed and balanced using traffic counts information and traffic characteristics. Base year volume includes AM and PM peak hour intersection volumes, and directional peak hour volumes.
- Establish the growth rate by evaluating various independent sources including:
    - SCSWM and Regional Travel Demand Model will be reviewed to obtain growth rates. No model calibration will be conducted as a part of this project.
    - Traffic growth trends will be calculated for 10, 20 and 30 years of historic AADT. Linear, exponential, and decaying exponential methods will be evaluated and the best method in terms of R-squared (coefficient of determination) will be selected.
    - Population and employment growth trends will be estimated for Lexington and Richland Counties.
- Develop future year traffic volume forecasts for the corridor and turning movements based on trend analysis of historical traffic counts and/ or officially adopted travel demand models. Future year traffic volume includes AM and PM peak hour intersection volumes, and directional peak hour volumes.

Traffic Operational Analysis

TransModeler Traffic Simulation Software (version 7.0) will be used to evaluate the study area. A peak hour model will be developed for AM and PM conditions. Existing TransModeler models will be calibrated to 2024 conditions per FHWA Traffic Analysis Toolbox Volume III: Guidelines for Applying Traffic Microsimulation Modeling Software (2019) calibration criteria.

It is anticipated that NPMRDS travel time/speed data will be sufficient for model calibration and no field travel time runs will be conducted. The TransModeler simulation development and calibration procedures/parameters will be documented as part of the existing conditions analysis. The FHWA acceptable targets, as documented in the 2019 Traffic Analysis Toolbox Volume III: Guidelines for Applying Traffic Microsimulation Modeling Software for volume and speed criteria, will be used for calibration.

The following microsimulation analyses will be conducted for the existing and future conditions:

- Basic Freeway analysis
- Ramp merge, diverge, and weave analysis
- Intersection analysis

The following measures will be collected from TransModeler models:

- Freeway and ramp merge/diverge: Density, and LOS.
- Intersection: Intersection delay and intersection LOS

Safety Analysis

This section discusses a detailed methodology for existing and future safety analysis in the study area. The analysis will be consistent with the FHWA Interstate System Access Information Guide (2010).

Safety Analysis

The safety analysis will include historical crash analysis for crashes reported from January 01, 2021, to December 31, 2023. The historical crash analysis will include identification of crash trends and patterns, calculations of crash rate and safety ratio, and heat maps. Crash trends will be identified by evaluating observed crashes by location, type, time of day, year, severity, presence of lighting, weather, distraction, contributing factors, and other characteristics. Based on the data obtained, the existing safety analysis will identify high crash locations, areas of safety concern, and potential crash countermeasures based on probable causes and crash trends.

A predictive safety analysis will be conducted consistent with Highway Safety Manual (HSM) using the Enhanced Interchange Safety Analysis Tool (ISATe) for project alternatives for 2050 conditions. ISATe incorporates the disaggregate safety evaluation approach recommended by the Highway Safety Manual for its Part C predictive methods. In this regard, the freeway facility is disaggregated into one or more freeway sections and interchanges. The interchange is disaggregated into one or more ramps, C-D roads, and crossroad ramp terminals.

Future safety analyses will be performed for approved Systems IMR/SA Concept (2050) and Build Alternative (2050). For purposes of the comparative analysis, only facilities with geometric or volume differences between the approved Systems IMR/SA Concept and Build Alternative will be assessed. This

analysis method measures the effectiveness of a safety treatment by quantifying the change in average crash frequency as a result of a proposed design alternative. HSM resources, including the Crash Modification Factor (CMF) Clearing House, National Cooperative Highway Research Program (NCHRP), and Federal Highway Administration (FHWA) studies, will be used, as necessary.

The safety analysis will be documented in the Systems IMR Reevaluation. The documentation will include details of the analytical procedures and results of the existing and future safety analyses. It will include tables and figures summarizing crash data, crash rates, safety ratios, crash contributing factors, applicable CMFs, and other relevant data.

Consistency with Other Plans/Projects

This Project is included in the 2045 South Carolina Statewide Multimodal Transportation Plan and the South Carolina Statewide Transportation Improvement Program (STIP) (FY 2021 - 2027).

Environmental Considerations

Currently, a NEPA re-evaluation for proposed project changes is being developed concurrently with this document. The results of the re-evaluation will be documented in the Systems IMR Reevaluation.

Anticipated Design Exceptions and Variations

Any known exceptions/variations to SCDOT, AASHTO or FHWA rules, policies, standards, criteria, or procedures will be documented in the Systems IMR Reevaluation.

Conceptual Signing Plan

A conceptual signing and marking plan shall be prepared and included in the Systems IMR Reevaluation.

Access Management Plan

The access management plan within the interchange area will not be changed by the proposed improvements in this project.

Documentation

This traffic analysis will be documented in the Systems IMR Reevaluation. The documentation will include details of the analytical procedures and results of the travel demand forecasts, operational, and safety analyses. It will include tables and figures summarizing traffic forecasts (AM and PM peak hour intersection volumes, directional peak hour volumes) and results of the traffic operations and safety analyses.
