Collum, John
[EXTERNAL] FW: I-77 Widening DGNs & Data Files

This Message originated outside your organization.

John,
I hope all is well with you. I have received a request from Tyke for all of the files used to prepare the permit for I-77. Can you upload these files to box and put them on your ftp site for me to download?

Andy

Subject: I-77 Widening DGNs & Data Files

Hey Michael-

I hope that you are doing well. For I-77 Widening, please send the latest DGNs, pre-construction survey files (ASCIs, Lidar, error reports, etc.), cores/soil tests and locations, and updated wetlands data and permit/JD line files. For surveys and cores/soil tests, we are looking for data collected after the dates of the files provided by SCDOT. If you have questions, please do not hesitate to contact me. Thanks!

William "Tyke" Redfearn III, P.E., DBIA
