*Note: Based on the studies thus far accomplished, SCDOT intends to install noise barrier walls near the Westcott Ridge and Arbor Springs neighborhoods. Studies and design to-date indicate that barrier walls can be constructed within the cost thresholds outlined by the SCDOT Traffic Noise Abatement Policy. If it subsequently develops during final design that these conditions have substantially changed, the barrier walls might not be provided. A final decision of the installation of the barrier walls will be made upon completion of the project’s design and the ongoing public involvement processes.
